DOCUMENTS NEEDED:

Closure Letter, and any conditional closure letter issued		X
Copy of most recent deed, including legal description, for all affected properties		X
Certified survey map or relevant portion of the recorded plat map (if referenced in the legal description) for all affected properties		X
County Parcel ID number, if used for county, for all affected properties		X
Location Map which outlines all properties within contaminated site boundaries in sufficient detail to permit the parcels to be located easily (8.5x14" if paper copy)		X
Detailed Site Map(s) for all affected properties, showing buildings, roads, property boundaries, contaminant sources, utility lines, monitoring wells and potable wells. (8.5x14", if paper copy)		X
Tables of Latest Groundwater Analytical Results (no shading or cross-hatching)		X
Isoconcentration map(s), if available from site investigation (SI) (8.5x14" if paper copy). The isoconcentration map should have flow direction and extent of contamination defined. If not available, include the following 2 types of maps:		X
Latest groundwater flow/monitoring well location map		X
Latest extent of contaminant plume map		X
Geologic cross-sections, if available from SI. (8.5x14" if paper copy)		X
RP certified statement that legal descriptions are complete and accurate		X
Copies of off-source notification letters (if applicable)		X
Letter informing ROW owner of residual contamination (if applicable)		
Copy of (soil or land use) deed restriction(s) or deed notice if any required as a condition of closure.		X

Subject: Closure Request for Former Valet Dry Cleaners, Inc./ Cash Advance, 3825 Durand Avenue, Racine, WI. FID#252178190; BRRTs#02-52-350162 and 03-52-373822

Dear Ms. Clabault:

The Department has received and reviewed the information submitted to complete the closure at this site. At this time your site will be noted as being closed with Soil and Groundwater GIS on the Department's database.

State Statute 101.143 requires that PECFA claimants seeking reimbursement of interest costs, submit a final reimbursement claim within 120 days after they receive a closure letter on their site. For claims not received by the PECFA Program within 120 days of the date of this letter, interest costs after 60 days of the date of this letter will not be eligible for PECFA reimbursement.

Please be aware that the case may be reopened pursuant to s. NR 726.09, Wis. Adm. Code, if additional information regarding site conditions indicates that contamination on or from the site poses a threat to public health, safety, or welfare or to the environment.

Proceed with abandoning the monitoring wells and any other sumps or systems that are not necessary for vapor venting concerns. Submit the abandonment forms to this office for inclusion in the file. Also, proceed with recording the deed restriction document and the maintenance plan for the property. Send a copy of the recorded documents with the stamp showing it has been recorded to this office for inclusion in the file. Once that information is received the GIS packet will be submitted for entry on the database.

Thank you for your efforts in remediating your site. If you have any questions regarding this letter please contact me at 262-884-2341.

If you have any questions please contact me at 262-884-2341.

Sincerely,

Shanna L. Laube-Anderson, P.G.
Hydrogeologist

Morristown, New Jersey 07960

RE: Landowner Notification
Cash Advance
3825 Durand Ave.
Racine, Wisconsin
WDNR BRRTS No. 02-52-350162
WDNR FID No. 252178190
ATC Project No. 11.18067.0993

Dear Mr. Pugliano:

Groundwater contamination that appears to have originated on the Cash Advance property located at 3825 Durand Avenue, in the City of Racine, Racine County, Wisconsin, has migrated onto your property at 3701 Durand Avenue. The levels of tetrachloroethene (PCE) contamination in one sample of the groundwater on your property are above the state groundwater enforcement standards found in chapter NR 140, Wisconsin Administrative Code. However, the environmental consultants who have investigated this contamination have informed me that this groundwater contaminant plume is stable or receding and will naturally degrade over time. I believe that allowing natural attenuation to complete the cleanup at this site will meet the requirements for case closure that are found in chapter NR 726 and chapter NR 746 Wisconsin Administrative code, and I will be requesting that the Department of Natural Resources accept natural attenuation as the final remedy for this site and grant case closure. Closure means that the Department will not be requiring any further investigation or cleanup action to be taken, other than the reliance on natural attenuation.

Since the source of the groundwater contamination is not on your property, neither you nor any subsequent owner of your property will be held responsible for investigation or cleanup of this groundwater contamination, as long as you and any subsequent owners comply with the requirements of section 292.13, Wisconsin Statutes, including allowing access to your property for environmental investigation or cleanup if access is required. For further information on the requirements of section 292.13, Wisconsin Statutes, you may call 1-800-367-6076 for call originating in Wisconsin, or 608-264-6020 if you are calling from out of state or within the Madison area, to obtain a copy of the Department of Natural Resources' publication #RR-589, Fact Sheet 10: Guidance for Dealing with Properties Affected by Off-Site Contamination". The Department of Natural Resources will not review my closure request for at least 30 days after the date of this letter. As an affected property owner, you have a right to contact the Department to provide any technical information that you may have that indicates that closure should not be granted for this site. If you would like to submit any information to the Department of Natural Resources that is relevant to this closure request, you should mail that information to: Ms. Victoria Stovall, Wisconsin Department of Natural Resources, 2300 North Martin Luther King Jr. Drive, Milwaukee, Wisconsin 53212.

If this case is closed, all properties within the site boundaries where groundwater contamination exceeds Chapter NR 140 groundwater enforcement standards will be listed on the Department of Natural Resources' geographic information system (GIS) Registry of Closed Remediation Sites. The information

on the GIS Registry includes maps showing the location of properties in Wisconsin where groundwater contamination above Chapter NR 140 enforcement standards was found at the time that the case was closed. This GIS Registry will be available to the general public on the Department of Natural Resources' Internet web site. Please review the enclosed legal description of your property, and notify me within the next 30 days if the legal description is incorrect.

Should you or any subsequent property owner wish to construct or reconstruct a well on your property, special well construction standards may be necessary to protect the well from the residual groundwater contamination. Any well driller who proposes to construct a well on your property in the future will first need to call the Diggers Hotline (1-800-242-8511) if your property is located outside of the service area of a municipally owned water system, or contact the Drinking Water program within the Department of Natural Resources if your property is located within the designated service area of a municipally owned water system, to determine if there is a need for special well construction standards.

Once the Department makes a decision on my closure request, it will be documented in a letter. If the Department grants closure, you may obtain a copy of this letter by requesting a copy from me, by writing to the agency address given above or by accessing the DNR GIS Registry of Closed Remediation Sites on the internet at www.dnr.state.wi.us/org/at/et/geo/gwur. A copy of the closure letter is included as part of the site file on the GIS Registry of Closed Remediation Sites.

If you need more information, you may contact me at 1034 West Boulevard, Racine, Wisconsin 53405, or 262-633-7510 or you may contact Ms. Victoria Stovall, Program Assistant, Wisconsin Department of Natural Resources, at 2300 North Martin Luther King Jr. Drive, Milwaukee, Wisconsin 53212 or 414-263-8688.

Sincerely,

ARB ENTERPRISES, L.L.P.

EXHIBIT "A"

LEGAL DESCRIPTION

PARCEL I

That part of the Northeast 1/4 of Section 30, Township 3 North, Range 23 East of the Fourth Principal Meridian bounded as follows: Beginning at a point on the South line of Durand Avenue at the Northeast corner of Lot 2, in Block 6 in Scheckler Addition as recorded In Volume "0" of Plats, page 24 in the Racine County Register of Deeds Office; running thence South 0° 15' 30" West 135 feet on the East line of Lot 2 of said Block 6 to the Southeast corner of said Lot 2; thence North 89° 59' 30" West 113.6 feet on the South line of Lots 1 and 2 of said Block 6 to the East line of Lathrop Avenue; thence South 0° 15' 30" West 252.5 feet on the East line of Lathrop Avenue to the Northwest corner of Lot 18 of said Block 6; thence South 89° 59' 30" East 344 feet on the North line of Lots 18 and 11 of said Block 6 and said line projected East to the East line of Munroe Avenue; thence South 0° 15' 30" West 232.5 feet on the East line of Munroe Avenue; thence South 89° 59' 30" East 966.38 feet on the South line of said Scheckler Addition; thence North 33° 11' East 451.68 feet to the point of curvature of a curve of Southeasterly convexity whose radius is 1,063.87 feet and whose long chord bears North 29° 50' 45" East; thence Northeasterly 123.92 feet on said curve to a point of compound curvature with a curve of Southeasterly convexity whose radius is 119.61 feet and whose long chord bears North 12° 53' 30" East; thence Northeasterly 56.84 feet on said curve to a point of tangency; thence North 0° 43' 30" West 79.62 feet to the South line of Durand Avenue; thence North 89° 59' 30" West 1,514.37 feet to the place of beginning. Said land being in the City of Racine, County of Racine, State of Wisconsin.

PARCEL II

That part of the Northeast 1/4 of Section 30, Township 3 North, Range Twenty-three East, bounded as follows: Beginning at a point on the West line of the Northeast 1/4 of said Section 30, located 660.00 feet South of the North 1/4 corner of said Section; running thence South 89° 59' 30" East, 1,199.93 feet; thence South 33° 14' West 329.94 feet; thence South 59° 8' 40" West, 71.93 feet; thence North 85° 20' 50" West, 220.00 feet; thence South 69° 16' 10" West 207.00 feet; thence South 36° 9' 10" West, 151.16 feet; thence North 78° 28' 10" West 466.52 feet to the West line of the Northeast 1/4 of said 1/4 Section; thence North 0° 15' 30" East, 397.20 feet to the point of beginning, EXCEPTING THEREFROM: That part of the North East 1/4 of Section 30, Township 3 North, Range 23 East, bounded as follows: Beginning at a point on the West line of the Northeast 1/4 of Section 30, located 898.98 feet South of the North 1/4 corner of said Section; running thence South 89° 44' 30" East, 546.14 feet; thence South 0° 15' 30" West, 126.96 feet; thence South 36° 09' 10" West, 151.16 feet; thence North 78° 28' 10" West, 466.52 feet; thence North 0° 15' 30" East, 158.22 feet to the point of beginning. Said land being in the City of Racine, County of Racine, State of Wisconsin.

PARCEL III

Lots 4 and 5, Block 4, In Great Elms No. 2, being a subdivision of a part of the Northeast 1/4 of Section 30, Township 3 North, Range 23 East. Said land being in the City of Racine, County of Racine, State of Wisconsin.

WHEREAS, MRED (Lathrop/Durand) Associates, a Wisconsin Limited Partnership, is the owner of the above described property.

WHEREAS, soil contaminated with petroleum hydrocarbon-based oil and chlorinated volatile organic compounds is present on this property. Soil contaminated with petroleum hydrocarbon and chlorinated hydrocarbon compounds may remain on this property at the following locations: beneath the building footprint of the former Cash Advance facility in the vicinity of soil borings MW-3, MW-9, GP-1 and GP-3, in the vicinity of soil borings B-14 and B-16, and in the vicinity of soil borings MW-1 and MW-5 as shown in Figure 1. In November 2002, soil samples taken at a depth of approximately 0 to 12 feet below the concrete surface contained concentrations of chlorinated organic compounds that exceeded the generic residual contaminant levels in NR 720.19 as summarized in Table 1. In October 2002, soil samples taken at a depth of approximately 2 feet below the asphalt surface contained concentrations of polycyclic aromatic hydrocarbons above interim guidance residual contaminant levels as summarized in Table 1; soil samples taken at a depth of approximately 10 feet below the asphalt surface contained concentrations of benzene above generic residual contaminant levels in 720.09 as summarized in Table 1.

WHEREAS, it is the desire and intention of the property owner to impose on the property restrictions which will make it unnecessary to conduct further soil remediation activities on the property at the present time.

NOW THEREFORE, the owner hereby declares that all of the property described above is held and shall be held, conveyed or encumbered, leased, rented, used, occupied and improved subject to the following limitation and restrictions:

The paved surfaces, concrete building foundations, and concrete floor slabs that existed on the above-described property on the date that this restriction was signed form a barrier that must be maintained in order to prevent direct contact with residual soil contamination that might otherwise pose a threat to human health.

0000108

These structures are also required in order to minimize the infiltration of water and prevent groundwater contamination that would violate the groundwater quality standards in ch. NR 140, Wis. Adm. Code. The paved surfaces, concrete building foundations, and concrete floor slabs shall be maintained on the above-described property in the locations shown on Figure 1 unless another barrier, with an infiltration rate of 10^{-7} cm/sec or less, is installed and maintained in their place.

The existing structures, and any replacement barrier with an infiltration rate of 10^{-7} cm/sec or less, shall be maintained on the above-described property in compliance with the "Barrier Operation and Maintenance Plan" dated April 1, 2005, that was submitted to the Wisconsin Department of Natural Resources by MRED (Lathrop/Durand) Associates, as required by section NR 724.13(2), Wisconsin Administrative Code (1999).

In addition, the following activities are prohibited on that portion of the above-described property where a barrier exists as depicted on Figure 1, unless prior written approval has been obtained from the Wisconsin Department of Natural Resources or its successor or assign: (1) Excavating or grading of the land surface; (2) Filling on the capped area; (3) Plowing for agricultural cultivation; and (4) Construction or installation of a building or other structure with a foundation that would sit on or be placed within the cap or cover.

This restriction is hereby declared to be a covenant running with the land and shall be fully binding upon all persons acquiring the above-described property whether by descent, devise, purchase or otherwise. This restriction inures to the benefit of and is enforceable by the Wisconsin Department of Natural Resources, its successors or assigns. The Department, its successors or assigns, may initiate proceedings at law or in equity against any person or persons who violate or are proposing to violate this covenant, to prevent the proposed violation or to recover damages for such violation.

Any person who is or becomes owner of the property described above may request that the Wisconsin Department of Natural Resources or its successor issue a determination that one or more of the restrictions set forth in this covenant is no longer required. Upon the receipt of such a request, the Wisconsin Department of Natural Resources shall determine whether or not the restrictions contained herein can be extinguished. If the Department determines that the restrictions can be extinguished, an affidavit, attached to a copy of the Department's written determination, may be recorded by the property owner or other interested party to give notice that this deed restriction, or portions of this deed restriction, are no longer binding.

0000109

IN WITNESS WHEREOF, the owner of the property has executed this Declaration of Restrictions, this 6 day of September, 20 05:

MRED (Lathrop/Durand) Associates

- NS = no standard
- Exceedances: **bold** = Concentration exceeds US EPA SSL
- US EPA PRGs and SSLs only provided for relative benchmark concentrations.
- All methanol blanks exhibited non-detectable concentrations of VOCs.

0000114

**BARRIER OPERATION AND MAINTENANCE PLAN
MRED (LATHROP/DURAND) ASSOCIATES
3825 DURAND AVENUE, RACINE, WISCONSIN
APRIL 1, 2005**

The Barrier Operation and Maintenance Plan (BOMP) is designed to prevent direct contact with soil impacted with residual petroleum hydrocarbons and chlorinated volatile organic compounds that exists beneath the paved asphalt surface and building foundation at the MRED (Lathrop/Durand) Associates property, as shown in Figure 1. The asphalt surface, or any replacement barrier, will function as intended unless disturbed.

Disturbance Management. Redmond. shall take the following steps to assure that uncontrolled disturbances of the barrier do not occur:

- A deed restriction will be recorded for this portion of the MRED property which limits future use, development, and management of the property. This BOMP is incorporated into the deed restriction.
- A copy of this BOMP will be available on-site from the property owner to all interested parties.
- A copy of this BOMP will be provided to all contractors and repair workers during any intrusive subsurface work on this portion of the property.

Inspections of Barrier. Inspections will be required to assure that the barrier is functioning as intended:

- Annual inspections of the paved asphalt surface will be performed by authorized personnel from MRED and will include observations about the integrity of the asphalt surface in the vicinity of the residual soil impacts. Inspections will be compared to the previous inspection notes to monitor the relative condition of the concrete surface.
- As necessary, the engineered barriers will be repaired to maintain integrity. Repairs may include, but are not limited to, patching or replacing the asphalt surface where it has cracked or otherwise broken and would allow direct contact with underlying soil.
- An inspection log will be maintained on-site to record any disturbances of the barrier and the steps that have been taken to maintain the integrity of the barrier. The inspection log will be made available for inspection by representatives of the Wisconsin Department of Natural Resources upon reasonable prior request. The on-site inspection log will be maintained as long as inspection and maintenance of the barrier is required.

0000115

Planned Breaches of Barrier. In the event that a planned breach of the barrier is required, the following precautions shall be taken:

- MRED shall be given 48-hour notice of any planned breach.
- To the extent possible, all material excavated from beneath the barrier will be returned to the excavation prior to the restoration of the barrier. The excavation zone and any soils excavated will be secured from public access until the barrier is restored. While on-site, the excavated soil will be placed on an impervious surface (e.g., existing concrete and/or plastic) and covered with plastic. Soil that cannot be returned to the excavation will be sampled and disposed of at a licensed landfill facility in accordance with applicable solid and hazardous waste rules and regulations. All contaminated soils that are stored, treated, excavated, removed, or transported off-site shall be managed per procedures and reporting requirements set forth in ch. NR 718, Wisconsin Administrative Code.
- The barrier will be restored to meet original conditions. This work, including the proper disposal of excess soils, should be completed within 72 hours following the completion of any on-site work, or as soon as reasonably practical.
- Details of the barrier breach, the handling of excavated soils, individuals responsible for the work, and the restoration of the barrier shall be recorded in the barrier maintenance log.

Amendments. The BOMP may be amended or withdrawn upon written approval from the Wisconsin Department of Natural Resources or its successor agency.
