**Re: Additional Groundwater Sampling - Site Investigation Activities
Redi-Quick Cleaners, 9508 West Greenfield Avenue
West Allis, Wisconsin
BRRTs No. 02-41-000676
FID No. 241170490**

Dear Mr. Amungwafor:

The purpose of this letter is to provide estimated costs to conduct groundwater sampling to complete site investigation activities as requested by you during our phone conversation on February 2, 2004.

The additional groundwater monitoring activities to complete the site investigation phase of the project are as follows:

- Collect groundwater samples from pre-existing monitoring wells MW-2, MW-4, MW-8, MW-10, MW-11, MW-12, MW-13 and piezometer PZ-10 using low flow sampling techniques.
- Collect groundwater samples from newly installed monitoring well MW-21 and piezometer PZ-20 to establish trends.
- Submit groundwater samples for analysis of volatile organic compounds (VOC).
- Groundwater disposal.
- Data evaluation, letter report.

The estimated cost to implement the additional site investigation activities is as follows:

	Shaw Environmental (labor & expenses)	Subcontractor
Groundwater sampling (low flow)	\$1,700	\$ 0
Groundwater disposal (bidding, forms)	\$ 200	\$300
Laboratory analysis		
Groundwater (10 samples)	\$ 0	\$636
Data evaluation, project management and letter report outlining results of the additional groundwater sampling	\$ 420	\$ 0
Subtotal	\$2,320	\$939
		Total \$3,252

Please call me at (262) 549-6898 ext. 431 if you have any questions.

Sincerely,

SHAW ENVIRONMENTAL & INFRASTRUCTURE, INC.
