RE: Additional Groundwater Sampling – Site Investigation Activities, Redi-Quick Cleaners, 9508 West Greenfield Avenue, West Allis, Wisconsin. FID # 2411700490, BRRTS # 02-41-000676

Dear Mr. Gruichich:

The results of groundwater sampling submitted in Environgen's Report dated January 14, 2004 and a Historical Groundwater Laboratory Results for this site dated January 29, 2004 submitted by Shaw Environmental & Infrastructure, Inc. at the request of the Department revealed monitoring wells that have been sampled only once or twice since investigation started at this site. The analytical results from these sampled monitoring wells (once or twice) indicate increasing trends in contaminant concentrations. Therefore, It is important to sample these monitoring wells and any newly installed monitoring wells on this site to establish the contaminant trend for the site (stable and or decreasing). The Department approves the sampling plan for: MWs (2, 4, 8, 10, 11, 12, 13, 21) and PZs (10 and 20).

If you have any question on this letter, please contact me at 414-263-8607.

Sincerely,

Binyoti F. Amungwafor  
Hydrogeologist
