RE: Groundwater Laboratory Results, Redi-quick Cleaners, 9508 west Greenfield Avenue, West Allis, Wisconsin BRRTs # 02-41-000676, FID # 241170490

Dear Mr. Gruichich:

I have reviewed the above referenced site. The site investigation appears complete for now. However, there could be some future need for additional investigation because data from MW-10, and PZ -10 are still showing possibilities of increasing concentration trends despite information from MW-21 and MW -11 showing decreasing concentration trends.

If you have any questions concerning this letter, please contact me at 414-263-8607.

Sincerely,

Binoyoti F. Amungwafor
Hydrogeologist
