Re: Town of Grafton, Lime Kiln Park, Schedule for Monitoring "At-Risk" Private Wells

Dear Ms. Underwood:

This is to request a projected schedule for when your firm, acting for the Town of Grafton, will sample four private wells designated as potentially at risk should the contamination plume spread beyond the established Village Water Service Area.

This was discussed publicly as a prudent and responsible measure to assure protection of remaining private wells in the Township, and should be part of the Village's long term plan for investigation and remediation of the site.

I'm enclosing my letter of October 28, 1997 which lists four wells (and three alternates). Two of these residents (Stockwell and Watts) recently contacted me inquiring about this matter. I would appreciate your reply. I can be reached at (414)263-8628 in Milwaukee.

Sincerely,

Chad Czarkowski
Drinking Water and Groundwater Specialist

Re: Lime Kiln Park Groundwater Investigation, Monitoring Select Wells On Fringe of Health Advisory Area, Town of Grafton

Dear Mr. Hofland:

This is to request, in part with investigation and remediation of the Lime Kiln Park groundwater problem, annual sampling of four residential wells for Volatile Organic Chemicals. This preventive action was discussed at various public meetings as a necessary safeguard for citizens just outside the Health Advisory Area established by EPA and DNR. These properties are not scheduled for connection to Village water, but are potentially first affected if contamination spreads. Along with any monitoring wells constructed by your consultant, sampling these active residential wells provides tangible evidence of drinking water safety on the fringe of the problem area.

1. Ann Hazelwood, 675 Green Bay Road PW# 74
2. Harold Keefe, 612 Green Bay Road PW# 70 [Alternate: Grafton Dells Handpump PW# 64]
3. George Watts Residential Well, 1716 Lakefield Rd. PW# 28 [Alternate: Michael Cudahy PW# 29]
4. Stephan Stockwell, 717 Heather Court PW# 26 [Alternate: Russ Richardson PW# 25]

Sampling frequency and wells chosen can certainly be modified in the future based on results of the first two rounds and other data on groundwater flow as determined by your consultant's investigation. In the interest of public health during these critical first years of the investigation, I request that these few wells be diligently monitored.

All nominated well owners have expressed interest in cooperating with this sampling effort. If you have any questions please call me at (414)229-0828.

Sincerely,

Chad Czarkowski

Drinking Water and Groundwater Specialist
