RE: **Biannual Groundwater Monitoring Results – December, 2001
Tecumseh Products Company Facility, Grafton Operation**

Dear John:

Moraine Environmental, Inc. (MEI) has been retained by the Tecumseh Products Company to provide technical field service to monitor groundwater quality on a biannual basis at the Tecumseh Products Company Grafton Operation. Consulting and engineering services continue to be provided by RMT, Inc. of Madison, Wisconsin.

This letter report was prepared to summarize the December, 2001 sampling and analysis of twelve downgradient groundwater monitoring wells and two downgradient potable residential wells for Volatile Organic Compounds (VOCs). Monitoring well MW-3 BR, located on-site at the Tecumseh Products Company is damaged and will require repair or replacement. Monitoring well MW-19 BR (2) was not sampled due to mechanical problems with the nitrogen activated bladder pump. The analytical results are summarized in tabular form and previous sample results are provided for comparison purposes.

Accordingly, the following summarization is presented:

Sample Collection Methodologies

Sample collection from monitoring wells was performed on December 4, 2001. The following downgradient wells were purged and sampled for EPA Method 8260 VOCs analysis:

MW - 3D	MW-18 BR (1)	MW-20 BR(2)
MW-9	MW-18 BR (2)	MW-21 BR(1)
MW-12	MW-19 BR(1)	MW-21 BR(2)
MW-13 BR(2)	MW-20 BR(1)	MW-22 BR

The locations of these wells are illustrated on the enclosed figure.

Private water supply wells PW-38 (Wendtland Property) and PW-5 (Raess Property) were also sampled for VOCs.

Groundwater samples from monitoring wells MW-3D, MW-9, MW-12 and MW-22 BR were purged and sampled using new, disposable teflon bailers. Samples were transferred into 40 milliliter (ml) vials, placed into an ice-filled cooler, and transported to the laboratory (EnChem, Inc.) for analysis. The remaining monitoring wells were sampled through dedicated multi-level bladder pump systems (Solinst Waterloo) installed during well construction. VOC groundwater samples were collected, stored, transported, and analyzed for 8260 VOCs by EnChem, Inc. Laboratories in Green Bay, Wisconsin. The private wells (PW-38 and PW-5) were sampled by allowing the cold taps to run for a minimum of fifteen minutes to allow for aquifer water to enter the system, then reducing the flow volume (removing the faucet aerators) and collecting and storing the samples.

Analytical Results

All groundwater samples were analyzed for EPA Method 8260 VOCs by EnChem, Inc. of Green Bay, Wisconsin. The analytical results are summarized on the enclosed analytical results table. The laboratory reports are enclosed as Attachment A. Tables summarizing previous analytical results are enclosed as Attachment B to allow for a comparison of recent analytical results with previously acquired groundwater quality data. VOCs at concentrations exceeding Wisconsin Administrative Code Chapter NR 140 Groundwater Quality Enforcement Standards were detected in monitoring wells MW-9, MW-12, MW-13 BR (2), MW-18 BR (1), MW-18 BR (2), MW-19 BR(1), and MW-22 BR. The Enforcement Standard and Preventive Action Limit for Bromodichloromethane and Chloroform, respectively were slightly exceeded in the private water supply well PW-38. An increase in the concentration of 1,1-Dichloroethane (7.5 ug/l in June, 2001 to 360 ug/l in December, 2001) was noted in on-site well MW-3D. Increases in the concentrations of 1,1-Dichloroethene, cis-1,2-Dichloroethene, 1,1,1-Trichloroethane, and Trichloroethene were noted in on-site well MW-12. The analytical results from the remaining monitoring points were similar to previously acquired analytical results.

Biannual samples will again be collected in June, 2002. If you have any questions or concerns regarding this letter, the monitoring methodologies or results, please call our office at (262) 377-9060.

Sincerely,
MORaine ENVIRONMENTAL, INC.

The "Q" flag is present when a parameter has been detected below the LOQ. This indicates the results are qualified due to the uncertainty of the parameter concentration between the LOD and the LOQ.

Soil VOC detects are corrected for the total solids, unless otherwise noted.

I certify that the data contained in this Final Report has been generated and reviewed in accordance with approved methods and Laboratory Standard Operating Procedure. Exceptions, if any, are discussed in the accompanying sample comments. Release of this final report is authorized by Laboratory management, as is verified by the following signature. Reported results shall not be reproduced, except in full, without the written approval of the lab. The sample results relate only to the analytes of interest tested.

SAMPLE NARRATIVE**

Volatiles: One or more samples in this package have analytes qualified with an "&" qualifier because they are associated to a Laboratory Control Sample (LCS) that had recoveries outside of the laboratory control limits. Data for these analytes is qualified, without further corrective action, because the laboratory SOP allows a limited number of analytes to be outside of the control limits based in the number of analytes spiked.

- Analytical Report -

Project Name : TECUMSEH-GRAFTON

Project Number : 1177

Client : MORaine ENVIRONMENTAL INC

Field ID : WENDTLAND RESIDENCE

Report Date : 12/14/01

Lab Sample Number : 816107-014

Collection Date : 12/4/01

WI DNR LAB ID : 405132750

Matrix Type : WATER

Notes:

All Concentrations and Standards Expressed as Micrograms per Liter (ug/l) (parts per billion)
 NA - Not Analyzed ; Q - parameter detected below quantitative limit (qualified results)
 NSE - No Standard Established ; ND - No Detect ; NSC - No Sample Collected
 ES = NR140.10 Enforcement Standard
 PAL = NR140.10 Preventative Action Limit
 Highlighted and Bold results indicate concentrations exceeding WDNR NR140 ES
 Bold results indicate concentrations exceeding WDNR NR140 PAL
