Re: Groundwater Monitoring Data  
Freeman Chemical/Waters  
Instruments, Saukville, Wisconsin  
Job No. 0001-003

Dear Kenneth:

Accompanying this letter are five (5) sets of the groundwater monitoring data from Saukville, Wisconsin for the first two (2) quarters of 1985. This data is in the form received from CompuChem Laboratories, Inc. We are currently in the process of transferring the data to the summary sheets which have been provided to you in the past. This transfer process has been slowed down by the switching of analytical laboratories.

A review of the accompanying data will not reveal major findings. The concentrations of the various contaminants vary from time to time, but very few new contaminants appear in the samples. Also, the contaminated sampling sources originally identified tend to remain contaminated while the uncontaminated sources continue to remain clean.

If you have any questions concerning this monitoring data, please do not hesitate to contact us.

Sincerely,

*Roger F. Hatcher*

Roger F. Hatcher, Ph.D.  
President
