RE: Freeman Chemical Corporation
Groundwater Remediation
Saukville, Wisconsin
Odor Analyses
Job No. 0001-003

Dear Mark:

This letter is to confirm our telephone conversation earlier today regarding the sampling and analysis of odor at the Freeman site. As we discussed, during the September quarterly sampling we will collect and analyze water samples for odor at the four municipal wells (MW-1, MW-2, MW-3, MW-4), at the four pumping wells (21A, 24A, 28, 29) and at wells near the outside perimeter of the site (1A, 3A, 3B, 4A, 7, 8, 16A, 18A, 19A, 22, 23, 39 and 40).

We feel that this program should provide more than adequate coverage of any odor in the groundwater. If you have any questions, please just give me a call.

Sincerely,
HATCHER INCORPORATED

James D. Knauss, Ph.D.
