RECEIVED

NOV 29 1989

To Whom It May Concern:

BUREAU OF SOLID -
 HAZARDOUS WASTE MANAGEMENT

As noted on the Groundwater Monitoring Turnaround Document (Form 3400-73), some of the sample results for the various sample points indicated odor, color, or turbidity. This sheet specifies the sample point I.D., and the associated descriptions as based on CBC Environmental Services' field notes. Please maintain the information for your reference, if appropriate.

<u>WELL ID.</u>	<u>ODOR</u>	<u>COLOR</u>	<u>TURBIDITY</u>
MW 1			
MW 2	none	clear	clear
MW 3	none	clear	clear

<u>Well I.D.</u>	<u>ODOR</u>	<u>COLOR</u>	<u>TURBIDITY</u>
43	slight	clear	slightly cloudy
44			(DRY)
45			(DRY)
46	none	clear	clear
47	very severe	greenish brown	very cloudy
48	slight	clear	none

Please note that some of the aforementioned wells were dry (i.e. 44, 45), and therefore, no data is provided. Also, per standard protocol, some wells may not have been required to be sampled this quarterly sampling period; hence, odor, color, and/or turbidity data may not be given for those particular wells.

Sincerely,
FREEMAN CHEMICAL CORPORATION

Craig R. Bostwick
Waste Management Specialist
