HAZARDOUS WASTE MANAGEMENT

5HR-13

11 DEC 1989

Mr. Lee Bostwick
Freeman Chemical Corporation
217 Freeman Drive
Port Washington, Wisconsin 53074

Re: Hazardous Waste
Operating License
WID 980 615 439

Dear Mr. Bostwick:

As you are aware, the Federal portion of a hazardous waste operating license was issued to Freeman Chemical Corporation on June 26, 1989, for the hazardous waste storage and incineration activities conducted at Saukeville, Wisconsin. Condition I.G. of the Federal portion specifies that Freeman Chemical Corporation must certify at least once per year that a program is in place to reduce the volume and toxicity of hazardous waste generated at the site. In order to assist you with the development or improvement of a waste minimization program at your facility, enclosed is a copy of the United State Environmental Protection Agency Manual for Waste Minimization Opportunity Assessments.

I encourage you and other employees of Freeman Chemical to review the contents of the manual. In addition, portions of the manual may provide useful information which can be incorporated in training given to existing and/or future employees concerning waste minimization.

If you have any questions, please call me at (312) 886-6190

Sincerely,

Charles B. Slaustas, Chief
Minnesota/Wisconsin Section,
RCRA Permitting Branch

Enclosure
