Re: Freeman Chemical Corporation
Corrective Action Order
QAPP Comments

Dear Mr. Cerk:

Enclosed please find a copy of comments addressing the Freeman Chemical Corporation Revised Quality Assurance Project Plan (QAPP). The QAPP which is dated July 19, 1989, was received by the United States Environmental Protection Agency (U.S. EPA) on March 29, 1990. The Revised QAPP was reviewed in conjunction with the Revised Task 3 Project Plan. The Task 3 Project Plan was conditionally approved on May 8, 1988 and final approval is dependent on approval of the QAPP.

Although Hatcher-Sayre telefaxed two missing pages of the QAPP (pages 5-1 and 5-2) to U.S. EPA on June 9, 1990, the QAPP comments were completed on June 7, 1990. Therefore, some comments may be in reference to the information contained on the two missing pages because some portions of the QAPP could not be reviewed. These missing pages were transmitted to the authors of the comments and future comments will be revised to reflect this.

A meeting or teleconference may be necessary to discuss the deficiencies found in the Revised QAPP. If you desire to arrange this discussion, please contact Robert Dean Smith of my staff at (312) 886-7568.

Sincerely yours,

William E. Muno, Chief
RCRA Enforcement Branch
