RECEIVED

JUN 20 1996

**BUREAU OF SOLID
HAZARDOUS WASTE MANAGEMENT**

Dear Ms. Zellmer:

On behalf of our client Cook Composites and Polymers Co. (CCP), we are writing to request a 60-day extension for submittal of a Corrective Measures Study (CMS) Report for CCP's Saukville, Wisconsin, facility. Based on the date of receipt of a March 22, 1996, letter from the Section approving CCP's RCRA Facility Investigation Report, the CMS Report would be due July 22, 1996. With this 60-day extension request, the revised submittal date would become September 20, 1996.

We are making this request for two reasons. First, as I am sure you are aware, Georgia Gulf Corporation (the former owner) has, under the terms and conditions of sale of the Saukville facility to CCP, taken responsibility for corrective action of the "off-site" areas of concern (i.e., church ball yard, Logemann property). This change in responsible party has yet to be reflected in the RCRA incinerator operating permit currently held by CCP. Thus, commitments by CCP without finalization of the "off-site" remediation solutions would be premature. As Georgia Gulf Corporation proceeds toward remediation, it may be necessary to coordinate activities with CCP.

Second, our recent operational experience with the soil vapor extraction system installed in the vicinity of the solids incinerator is providing useful insights into the extremely complex hydrogeology of this site. Additional operational data would be beneficial prior to assessing this approach as an option for "on-site" areas of concern.

If you have any questions or desire any additional information prior to acting on this request, please contact me directly at 831-1989, extension 3128.

Sincerely,

James S. Rickun

James S. Rickun
Vice President, Northern Region/
Air Program Manager
