SUBJECT: Corrective Measures Study, on-site areas of concern, Cook Composites and Polymers Co., Saukville, file reference FID #246004330 ERR-LUST

Dear Mr. Gromacki:

I have not received a response from you regarding my letter from February of 1999. This letter asked for delineation of soil contamination, a performance evaluation of the remedial system, and a statement of long term objectives for the remedial system.

I understand that you have objections to conducting this work based on having prior approvals from the department. I spoke to the former project manager's supervisor, Mark Gordon about the matter, and he said that although the investigation (RFI) was approved in 1994, it is appropriate for me to ask for additional investigation if I see gaps in the data. However, I understand that you have a history of working with the department. Please state your case for not conducting additional work by referring to specific documents or agreements, as well as the technical basis for your argument. I am willing to re-look at my demand for additional investigation.

Please respond to my original letter as soon as you can. If you have any questions about this letter, call me at 414-229-0850.

Sincerley

John Feeney
Wisconsin Department of Natural Resources
