RE: Cook Composites and Polymers Co.
Saukville, WI Incinerator- Monthly Spill Reporting

Dear Mr. Brady

This is to inform the department that, as required in the February 9, 1988 Feasibility Determination and Plan of Operation Approval for Cook Composites and Polymers Co.'s (CCP's) Saukville, WI hazardous waste, storage and incinerator facility, that during the month of January, 2001, a singular spill occurred in Building 68 when ten gallons of spent solvent discharged from a leaking diaphragm on the solvent injection pump. The spill occurred at 5:30 P.M. on January 10, 2001. Notification of this fact satisfies Condition No. 25, "Spills Reporting," which requires CCP to inform the Department whether or not any spills have occurred in the hazardous waste small storage and incinerator facility.

The Foreman took immediate corrective action by stopping the injection pump, and closing all valves to the pump. The collected waste was subsequently incinerated in the hazardous waste incinerator. After the clean up the incinerator operator was called in to repair the pump, and restart the incinerator.

If you have any questions please feel free to contact me.

Sincerely,
COOK COMPOSITES AND POLYMERS CO.

Michael Lotman
Plant Manager
