***Environmental Cooperation
Pilot Program
Signing Event***

**Monday, October 1, 2001, 2:00 p.m.
Senate Parlor Room, 2nd Floor, South Wing
Wisconsin State Capitol Building
Madison, Wisconsin**

On behalf of Cook Composites and Polymers Co., (CCP), the Wisconsin Department of Natural Resources (DNR) cordially invites you to join us as we sign an important Environmental Cooperative Agreement.

CCP has taken a leadership role as one of the first participants in the Environment Cooperation Pilot Program. CCP is working with the DNR to find new ways of doing business. Even more importantly, CCP is charting new courses by deliberately involving the community in constructive dialogue and environmental problem solving. CCP has committed to superior environmental performance and activities they are not required to do by DNR's existing environmental regulations.

With input from the Saukville community, environmentalists, and general public, CCP and DNR have developed an Agreement and are looking forward to carrying it out. Hard work and negotiations went into creating this Agreement, and great lessons will be learned regarding regulatory flexibility and superior environmental performance.

If you have questions about the Agreement or the Signing Event, you can call Lynn Persson, DNR, 608/267-3763. You can find additional information about the Environmental Cooperation Pilot Program at:
