Subject: RE: Workplan for site investigation at former Northern Signal/Zareba/JT Roofing

John – just a couple of comments to pass onto GaiaTech:

1. Municipal Well No. 2 (MW-2) shown north of Church Street was abandoned several years ago.
2. The onsite well GaiaTech is referring to as the “deep well” is identified in the CCP Modified Groundwater Monitoring Plan as PW-08.
3. The monitoring well they have identified on the southern edge of the site as “W-24A” is identified in the CCP Modified Groundwater Monitoring Plan as W-19A. Monitoring well W-24A is located across the railroad right-of-way in the southwest corner of the CCP facility.

The last two items will be important when data is being compared to historical trends.
