Subject: Report of Results – Summer 2018 Groundwater Monitoring Event

Arkema Coating Resins
340 Railroad Street, Saukville, Wisconsin
WDNR FID: 246004330

Dear John:

Per the Wisconsin Department of Natural Resources (WDNR) approved Revised Groundwater Monitoring Plan, a groundwater sample was collected from the Village of Saukville Municipal Well No. 1 (MW-1) for volatile organic compound (VOC) analysis in July 2018. A duplicate sample and a trip blank sample were also analyzed.

SAMPLING NARRATIVE

On July 17, 2018, Mr. Tim Petrick of Endpoint Solutions Corp. (Endpoint) met Village of Saukville Water Utility staff at municipal well MW-1 to collect a groundwater sample from this location. Upon arriving, the sampling tap on the well head was opened and water was allowed to purge from the well to the floor drain for approximately five (5) minutes prior to collecting the sample. A parent sample (MW-1-18-3) and a blind duplicate sample (DUP1-18-3) were collected in six (6) 40 milliliter vials preserved with hydrochloric acid for VOC analysis using EPA Method SW846 8260B. The samples were labeled, packaged in a cooler on ice and prepared for shipping via courier to Synergy Environmental Lab, (Synergy) located in Appleton, Wisconsin (Certification # 445037560).

SAMPLE RESULTS

Results of the analysis indicated the sample (MW-1-18-3) and blind duplicate sample (DUP1-18-3) collected from MW-1 were analyzed without any dilution. No VOC constituents were detected above the limit of detection (LOD) in either of the field collected samples. In addition, the trip blank (TB1-18-3) sample supplied by Synergy was also free of any detectable VOC constituents. Analytical results are summarized on the attached **Table 1 – Municipal Well Results**. Copies of the analytical report and the chain-of-custody form are also attached.

OVERALL SUMMARY OF DATA USABILITY

The content of the data package, including raw data, sample custody records, and field and laboratory Quality Assurance/Quality Control (QA/QC) data were evaluated for consistency with EPA protocol. The data was also evaluated for compliance with the Data Quality Objectives provided in the project-specific Quality Assurance Plan.

Endpoint Solutions

The data package validation procedures were based on the criteria outlined in the "Functional Guidelines for Organic Data Review", (USEPA, 1999) and the "Contract Laboratory Program National Functional Guidelines for Inorganic Data Review", (USEPA, 2002).

The analytical data is usable for this site as qualified.

Endpoint collected one (1) field investigative and one (1) field duplicate water sample on Jul 17, 2018. The samples were identified as data set 5034949 with individual sample identifiers of A through C.

The samples were analyzed at Synergy.

SW846 Method 8260B (VOCs – Standard List):

MW-1-18-3 DUP1-18-3 TB1-18-3

GC/MS ANALYSIS FOR VOLATILE COMPOUNDS (8260)

Sample Receipt

All samples were received by the laboratory on ice.

Holding Times

All method holding times were met for sample preparation and sample analysis.

Calibration

All method acceptance criteria were met for initial and continuing verification calibration.

Field Duplicate Samples

One (1) Field Duplicate was submitted: DUP1-18-3. No VOCs were detected above LODs in either the parent (MW-1-18-3) or the duplicate (DUP1-18-3).

Surrogate Spikes

Each sample was spiked with known concentrations of four (4) surrogates. Surrogate recoveries were all within acceptable standards.

CLOSING

We trust the information contained in this letter clearly and concisely reports the results of the July 2018 groundwater monitoring event. The next groundwater monitoring event is scheduled for October 2018. If you have any questions regarding the results reported herein, please feel free to contact me directly at 414-858-1202.

Sincerely,

Endpoint Solutions

Robert A. Cigale, P.G.
Principal Consultant

cc: Doug Loutzenhiser – Retia USA

"J" Flag: Analyte detected between LOD and LOQ LOD Limit of Detection LOQ Limit of Quantitation

Code **Comment**

1 Laboratory QC within limits.

All solid sample results reported on a dry weight basis unless otherwise indicated. All LOD's and LOQ's are adjusted for dilutions but not dry weight. Subcontracted results are denoted by SUB in the analyst field.
