SUBJECT: Determination of the Need for WPDES Permit  
WI-0027731-09-0

Dear Mr. Linton:

The Wisconsin Department of Natural Resources (hereafter the Department) has determined that RETIA USA LLC does not need Wisconsin Pollutant Discharge Elimination System Permit No. WI-0027731-09-0, issued on September 22, 2017, for the facility located at 340 South Railroad Street. This determination is based on the fact that the discharge is now regulated through the WPDES general permit, "Contaminated Groundwater from Remedial Action Operations (WI-0046566-07-0)". Any remaining discharges must follow requirements specified in the general permit.

Per s. 283.536 (2), Wis. Stats. and ch. NR 203, Wis. Adm. Code, the Department has, with the consent of the permittee, terminated WPDES permit number WI-0027731-09-0 without public notice. A review of this decision by the Department may be obtained under s. 283.63 Wis. Stats. and ch. NR 203, Wis. Adm. Code.

A significant change in the operations or discharge(s) or any changes in applicable Wisconsin Statutes or Administrative Codes may, however, require that additional permit coverage be obtained in the future. If you are in doubt or have any questions, at this time or in the future, please so advise the Department promptly by writing to Lisa Creegan at DNR, 1027 W St Paul Ave, Milwaukee, WI 53233.

Sincerely,

Bryan Hartsook  
Wastewater Field Supervisor
