Hi Linda:

I hope this message finds you well. Thank you for your voice message to my colleague Kevin Hedinger last week regarding the Milwaukee Plating facility. I wanted to let you know that we completed sub-slab and ambient vapor sampling in the alley, between the Milwaukee Plating facility and the 1422 building, and also background sampling. We just received the results and Kevin has developed data table and some very intriguing figures. We believe the results suggest the TCE previously identified in the 1422 building has entered the building from the air intakes on the north side of the 1422 building.

We shared the data with Don Gallo on Friday, May 13<sup>th</sup> and he will be meeting with the site owner this coming week. Do you have time to participate in a Teams meeting with Kevin, Don, and I to discuss the results and our ideas for next steps on the afternoon of May 24<sup>th</sup> or 26<sup>th</sup>? If so, I will send an invitation to you.

Thank you for your consideration.

Jim
