SUBJECT: Annual Groundwater Monitoring Report and Semi-Annual Inspection Report
April 2011 Monitoring Event
Stoughton City Landfill
FID No.113005950 - License No. 00133
USEPA ID #WID980901219

Dear Mr. Edelstein:

This letter provides the Annual Groundwater Monitoring Report and the Semi-Annual Inspection Report for the April 2011 monitoring events at the Stoughton City Landfill, located in Stoughton, Wisconsin. Ayres Associates conducted the semi-annual facility inspection on April 26, 2011, and the annual groundwater monitoring event on April 28, 2011. A CD-ROM with the electronic data files of analytical results is also being submitted to the Wisconsin Department of Natural Resources (WDNR) Central Office, along with the WDNR *Environmental Monitoring Data Certification Form 4400-231 (R1/04)*.

1.0 SEMI-ANNUAL INSPECTION RESULTS

The semi-annual facility inspection was conducted on April 26, 2011. The following items were noted during the inspection.

Perimeter Security Fencing - No broken slats or signs of vandalism were noted for the wooden perimeter fence. Site signage was unobstructed and legible. The chain-link fencing at the site was in good condition with no damage or vandalism noted. Access gates were in satisfactory condition with both padlocks functioning properly. No further action is required for this inspection feature.

Landfill Cover - Vegetation on the landfill cap was emerging. The ground surface appeared wet due to recent rains. No localized areas of ponding or bare soil were observed, and erosion formations such as gulleys or sparse vegetation were not observed. Two sets of animal burrows were filled in near gas vent number nine (GV-9) and GV-12 during this inspection. No further action required for this deficiency or inspection feature.

Stormwater Management System - No visible erosion was observed in the drainage channels. The culverts were undamaged, and the riprap was not clogged with any obstructive debris. No further action is required for this inspection feature.

Landfill Gas Venting System - During the inspection, GV-8 was found lying on the ground near its installed location. The pipe union near the ground surface had become separated. There was no damage noted to the piping, and the inspector was able to reattach and secure the gas vent back to original condition. No further action required for this deficiency. All 21 gas vent screens

were in good condition and unobstructed. No further action is required for this inspection feature.

Monitoring Wells and Wellhead Covers - The monitoring wells and wellhead covers were in good condition. No signs of tampering, damage, or damaged locks were found at any of the monitoring well locations. No further action is required for this inspection feature.

Access Road - The site access road was in good condition with no ruts or erosion noted. No further action is required for this inspection feature.

Refer to [Attachment A](#) for the field form completed during the semi-annual inspection.

2.0 BI-MONTHLY GAS MONITORING RESULTS

Bi-monthly gas monitoring of the three perimeter gas probes was conducted on April 28, 2011. Based on the monitoring results, migration of landfill gas to the north of the landfill was not occurring during the event. The completed field for the Bi-Monthly Gas Monitoring Inspection is included in [Attachment A](#).

3.0 ANNUAL GROUNDWATER MONITORING EVENT

3.1 FIELD PROCEDURES

The field procedures for groundwater sample collection were conducted in accordance with provisions detailed in the WDNR-approved *Quality Assurance Project Plan (QAPP), Operation and Maintenance, Stoughton City Landfill, Stoughton, Wisconsin* (Ayres, April 2011).

CT Laboratories of Baraboo, Wisconsin, analyzed the groundwater samples for volatile organic compounds (VOCs) including dichlorodifluoromethane (DCDFM) and tetrahydrofuran (THF) by EPA Method SW 8260B.

3.2 GROUNDWATER MONITORING ANALYTICAL RESULTS

A summary of detections and NR 140 standard exceedances from analytical results for the groundwater monitoring event is provided in [Table 1](#). A summary of field parameter measurements as collected during the event is provided as [Table 2](#). The new water table elevations summary is included as [Table 3](#).

The original laboratory analytical report is enclosed as [Attachment B](#).

3.2.1 Target Compounds at the Shallow Monitoring Wells

Three shallow monitoring wells were analyzed for either the full list of VOCs by Method 8260B. Analytical results and historical ranges for the current sampling event are summarized in [Table 4](#).

3.2.2. Target Compounds at the Intermediate and Deep Monitoring Wells

Ten intermediate and deep monitoring wells were analyzed for the full list of volatile organic compounds (VOCs) by Method 8260B or for dichlorodifluoromethane (DCDFM) and Tetrahyrafuran (THF) only by Method 8260B. Analytical results and historical ranges for the current sampling event are summarized in Table 4.

3.3.3 Other VOCs Detected

The following VOCs, in addition to DCDFM and THF, were detected above the preventive action limit (PAL) or enforcement standard (ES):

Compound	ES (µg/L)	PAL (µg/L)	Result (µg/L)
MW-9I			
Trichloroethene	5	0.5	1.2
Vinyl chloride	0.2	0.02	0.24
MW-9S			
Benzene	5	0.5	0.7
MW-10I			
Tetrachloroethene	5	0.5	2.8
Trichloroethene	5	0.5	0.68
MW-14I			
Tetrachloroethene	5	0.5	0.71
Trichloroethene	5	0.5	0.52
Vinyl chloride	0.2	0.02	0.24
MW-14S			
Tetrachloroethene	5	0.5	2.5

Notes:

1. **Bolded** values indicate and exceedance of the NR 140 PAL.
2. **Bolded and shaded** values indicate and exceedance of the NR 140 ES.

Several other VOCs were detected at levels below their respective PAL and ES limits as summarized in [Table 1](#).

3.3.4 Sampling Plan Deviations

There were deviations from the sampling plan.

4.0 RECOMMENDATIONS

Due to ES and PAL exceedances for DCDFM, THF, benzene, tetrachloroethene, trichloroethene, and vinyl chloride, we recommend to continue the VOC monitoring program.

Notice: Personally identifiable information collected will be used for program administration and enforcement purposes. The Department may also provide this information to requesters as required under Wisconsin's Open Records law, ss. 19.31 to 19.39, Wis. Stats.

When submitting monitoring data, the owner or operator of the facility, practice or activity is required to notify the Department in writing that a groundwater standard or an explosive gas level has been attained or exceeded, as specified in ss. NR 140.24(1)(a); NR 140.26(1)(a); NR 507.30NR 635.14(9)(a); NR 635.18(20) and NR 507.30, Wis. Adm. Code. Failure to report may result in fines, forfeitures or other penalties resulting from enforcement under ss. 289.97, 291.97 or 299.95, Wis. Stats.

Instructions:

- Prepare one form for each license or monitoring ID.
- Please type or print legibly.
- Attach a notification of any values that attain or exceed groundwater standards (that is, preventive action limits, enforcement standards or alternative concentration limits). The notification must include a preliminary analysis of the cause and significance of each value.
- Attach a notification of any gas values that attain or exceed explosive gas levels.
- Send the original signed form, any notification, and Electronic Data Deliverable [EDD] to: GEMS Data Submittal Contact - WA/5 Bureau of Waste Management Wisconsin Department of Natural Resources 101 South Webster Street Madison WI 53707-7921

Notification attached?

- No. No groundwater standards or explosive gas limits were exceeded.
- Yes, a notification of values exceeding a groundwater standard is attached. It includes a list of monitoring points, dates, sample values, groundwater standard and preliminary analysis of the cause and significance of any concentration.
- Yes, a notification of values exceeding an explosive gas limit is attached. It includes the monitoring points, dates, sample values and explosive gas limits.

Certification

To the best of my knowledge, the information reported and statements made on this data submittal and attachments are true and correct. Furthermore, I have attached complete notification of any sampling values meeting or exceeding groundwater standards or explosive gas levels, and a preliminary analysis of the cause and significance of concentrations exceeding groundwater standards.

General Description of Site Conditions: *Overall, no major deficiencies noted. Vegetation is emergent, and cap appears in good condition. Site is fairly wet from recent rains.*

Specific Inspection Items	Potential Problem Areas	Status *	Notes
Perimeter Security Fencing	Broken or missing wood slats, torn chain link fabric.	1	<i>10 broken slats. Chain ok.</i>
Entrance Gate and Locking Mechanism	Lock broken/missing, mechanism inoperative.	1	<i>Good Condition</i>
Monitoring Wells and Wellhead Covers	Signs of tampering, casing damaged, lock missing.	1	<i>No Damage</i>
Final Cover Vegetation	Bare spots, stressed vegetation, deep rooted vegetation.	1	<i>No Bare Spots or Stressed Veg.</i>
Final Cover Slope (explain below)	Gullies, lack of vegetation, subsidence, ponding.	1	<i>No Ponding or Gullies.</i>
Evidence of Burrowing Animals	Damage to final cover, evidence of waste.	2	<i>Burrow holes near GV-9 and GV-12.</i>
Stormwater Drainage Channels	Gullies, erosion, debris, culvert blocked.	1	<i>Good Condition.</i>
Landfill Gas Venting System	Damaged or blocked vent risers, stressed vegetation.	2	<i>GV-8 on gravel.</i>
Access Road	Ponding, rutting, erosion.	1	<i>Good Condition for road.</i>
Cover Mowing and Tall Vegetation Removal (October Inspection Only)	Mowing and tall vegetation removal done to specified vegetation height, any missed areas		<i>Some brush starting to grow around gas vents. Will remove during mowing.</i>

* (1) Acceptable - No Maintenance Required. (2) Not Acceptable - Identify Required Maintenance. *GV-8 piping came apart @ union near ground level. Dug around base and reattached. Replaced gravel around base. Filled in burrow holes around GV-9 + GV-12.*

SUBJECT: Semi-Annual Report
October 2011 Semi-Annual Facility Inspection
Bi-Monthly Gas Monitoring Results
Stoughton City Landfill
FID No.113005950 - License No. 00133
USEPA ID #WID980901219

Dear Mr. Edelstein:

This letter provides the Semi-Annual Report for the October 2011 Semi-Annual Facility Inspection, and Bi-Monthly Gas Monitoring events at the Stoughton City Landfill, located in Stoughton, Wisconsin. A discussion of the results of the inspection and monitoring events are summarized in the sections below.

1.0 SEMI-ANNUAL INSPECTION RESULTS

The Semi-Annual Facility Inspection was conducted on October 30, 2011. Supplemental information was collected in March 2012 at the request of the Wisconsin Department of Natural Resources (WDNR) in order to provide additional photo documentation of observations made at the site. The following items were noted during the inspection. A photolog of the inspection event is provided as [Table 1](#).

Perimeter Security Fencing - No broken slats or signs of vandalism were noted for the wooden perimeter fence. Site signage was unobstructed and legible. The chain-link fencing at the site was in good condition with no damage or vandalism noted. Access gates were in satisfactory condition with both padlocks functioning properly. No further action is required for this inspection feature.

Landfill Cover – Vegetation on the landfill cap was established and in late seasonal stage. The ground surface appeared wet due to recent intermittent rain showers. No localized areas of ponding or bare soil were observed.

One gully, approximately 12-inches deep was observed on the northwest side of the landfill cap near gas vent 18 (GV-18). Refer to [Attachment A](#), reference photos 2011-10-001 and 2011-10-002 to see this area.

Three areas of animal burrows and established woody vegetation roots were observed near GV-10, GV-11, and GV-12 during this inspection. Refer to [Attachment A](#), reference photos 2011-10-003 through 2011-10-005 to see this area.

Storm Water Management System - No visible erosion was observed in the drainage channels, and the culverts appeared undamaged. Existing riprap was clogged with obstructions in the

south stormwater drainage feature. Obstructions included cattails and woody vegetation. Refer to [Attachment A](#), reference photos 2011-10-028 through 2011-10-030 to see this area.

Landfill Gas Venting System - All 21 gas vents and screens were in good condition and unobstructed. No further action is required for this inspection feature.

Monitoring Wells and Wellhead Covers – Several of monitoring wells, wellhead protective covers, and locks are in poor condition and require corrective action. [Table 1](#) has been developed to summarize the deficiencies observed at the monitoring wells. Examples of deficiencies observed at the site include:

- Missing or non-functional locks
- Broken hinges on protective well casings
- Missing expandable well caps
- Artesian/flowing wells requiring plugging

Refer to [Attachment A](#), reference photos 2011-10-006 through 2011-10-023 to see these locations.

Access Road - The site access road was in good condition with no significant ruts or erosion noted. No further action is required for this inspection feature.

Refer to [Attachment B](#) for the field form completed during the semi-annual inspection.

2.0 BI-MONTHLY GAS MONITORING RESULTS

Bi-Monthly Gas Monitoring of the three perimeter gas probes was conducted on July 6, August 29, and October 30, 2011. Based on the monitoring results, migration of landfill gas to the north of the landfill was not occurring during the event. The completed field forms for the Bi-Monthly Gas Monitoring Inspections is included in [Attachment C](#).

3.0 ANNUAL MOWING FOR LANDFILL COVER

The annual landfill cap mowing event was conducted on August 28, 2011. A tractor pulled mower was utilized during the event. Vegetation was cut to a height of 12-inches or less. Vegetation and brush that were present around existing monitoring wells or gas vents were also cut. There are some well-established root systems near the landfill gas vents which remain, and are visible near GV- 10, GV-11, and GV-12. Refer to [Attachment A](#), reference photos 2011-10-024 through 2011-10-027 to see photos of the mowing event.

4.0 RECOMMENDATIONS

Based on the observations made during the Semi-Annual Inspection, the following corrective actions are recommended at the site:

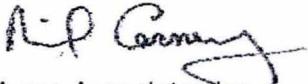

- Place top soil and seed mixture in the localized gully on the northwest side of the landfill cap. Filling the gully, and revegetation of the sloped area, will minimize potential of expansion of the gully over time.
- Plug the existing animals burrows with topsoil and seed.

- Manually cut and excavate the woody root masses near GV-10, GV-11, and GV-12 to mitigate future growth of obstructions.
- Manually cut and remove the cattails and woody vegetation in the south stormwater drainage feature. Following removal of vegetation, evaluation during future semi-annual inspections should be conducted to determine if further action (regrading, new riprap) is warranted.
- Monitoring wells which had locks replaced during the semi-annual inspection were noted in **Table 1**. All replacement locks are identically keyed. A set of these keys has been included with the hardcopy report to the WDNR.
- Retrofit and/or install new hinges and locking ring (EW-1 only) on protective casings which are damaged.
- Replace 2-inch expandable well caps on all monitoring wells which are indicated on **Table 1** as requiring new well caps.
- Install new well packers in self-purging, artesian wells on-site. Currently installed plugging methods are ineffective or have degraded over-time since the initial installation.

A summary of all recommendations is provided in **Table 1**.

If you have any questions regarding site activities or recommendations in this report, feel free to contact me by phone at (608) 443-1298, or by e-mail at carneyn@ayresassociates.com.
