PO Box 7921  
Madison, WI 53707

**SUBJECT:** Annual Groundwater Monitoring Report and Semi-Annual Inspection Report  
April 2012 Monitoring Event  
Stoughton City Landfill  
FID No.113005950 - License No. 00133  
USEPA ID #VID980901219

Dear Mr. Edelstein:

This letter provides the Annual Groundwater Monitoring Report and the Semi-Annual Inspection Report for the April 2012 monitoring events at the Stoughton City Landfill, located in Stoughton, Wisconsin. Ayres Associates conducted the annual groundwater monitoring event on April 26, 2012, and the semi-annual facility inspection on April 30, 2012. A CD-ROM with the electronic data files of analytical results is also being submitted to the Wisconsin Department of Natural Resources (WDNR) Central Office, along with the WDNR *Environmental Monitoring Data Certification Form 4400-231 (R1/04)*.

### 1.0 Semi-Annual Inspection Results

The semi-annual facility inspection was conducted on April 30, 2011. The following items were noted during the inspection.

Perimeter Security Fencing - No broken slats or signs of vandalism were noted for the wooden perimeter fence. Site signage was unobstructed and legible. The chain-link fencing at the site was in good condition with no damage or vandalism noted. Access gates were in satisfactory condition with both padlocks functioning properly. No further action is required for this inspection feature.

Stormwater Management System - No visible erosion was observed in the drainage channels, and the culverts appeared undamaged. Existing riprap was clogged with obstructions and sediment in the south stormwater drainage feature. Obstructions included cattails and woody vegetation. Refer to the October 2011 semi-annual inspection report for photographs of these areas.

Landfill Cover - Vegetation on the landfill cap was emerging. The ground surface was wet due to recent rains. No localized areas of ponding or bare soil were observed.

One gully, approximately 12-inches deep was observed on the northwest side of the landfill cap near gas vent 18 (GV-18). Three areas of animal burrows and established woody vegetation were also observed near GV-10, GV-11, and GV-12 during this inspection. These

items will be repaired prior to the next semi-annual inspection. Refer to the October 2011 semi-annual inspection report for photographs of these areas.

Landfill Gas Venting System - All 21 gas vents and screens were in good condition and unobstructed. No further action is required for this inspection feature.

Monitoring Wells and Wellhead Covers - Several of monitoring wells and wellhead protective covers are in poor condition and require corrective action as detailed in the October 2011 semi-annual report. Deficiencies observed at the site which will be repaired prior to the next semi-annual inspection include:

- Broken hinges on protective well casings
- Missing expandable well caps
- Artesian/flowing wells requiring plugging

In addition to the items listed above, the following deficiencies were noted during the April 2012 semi-annual inspection.

- Monitoring well MW-09B is incorrectly labeled (stenciled) as "MW-09D" on the protective casing at the site. Recommend repainting and labeling at the site. Refer to Photograph 2012-04-001 in Attachment A for a depiction of this deficiency.
- Monitoring well OW-04 has visible evidence of tampering due to graffiti on the protective casing. Recommend repainting and labeling at the site. Refer to Photograph 2012-04-002 in Attachment A for a depiction of this deficiency.

Access Road - The site access road was in good condition with no ruts or erosion noted. No further action is required for this inspection feature.

Refer to Attachment B for the field form completed during the semi-annual inspection.

## **2.0 Bi-Monthly Gas Monitoring Results**

Bi-monthly gas monitoring of the three perimeter gas probes was conducted on December 30, 2011, February 29, 2012, and April 23, 2012. Based on the monitoring results, migration of landfill gas to the north of the landfill was not occurring during the event. The completed field forms for the Bi-Monthly Gas Monitoring Inspections are included in Attachment C.

## **3.0 Annual Groundwater Monitoring Event**

### **3.1 Field Procedures**

The field procedures for groundwater sample collection were conducted in accordance with provisions detailed in the WDNR-approved *Quality Assurance Project Plan (QAPP), Operation and Maintenance, Stoughton City Landfill, Stoughton, Wisconsin* (Ayres; April 2011).

CT Laboratories of Baraboo, Wisconsin, analyzed the groundwater samples for volatile organic compounds (VOCs) including dichlorodifluoromethane (DCDFM) and tetrahydrofuran (THF) by EPA Method SW 8260B.

### 3.2 Groundwater Monitoring Analytical Results

A summary of detections and NR 140 Wisconsin Administrative Code standard exceedances from analytical results for the groundwater monitoring event is provided in Table 1. A summary of field parameter measurements as collected during the event is provided as Table 2. A water table elevation summary is included as Table 3.

The original laboratory analytical report is enclosed as Attachment D.

#### 3.2.1 Target Compounds at the Shallow Monitoring Wells

Three shallow monitoring wells were analyzed for either the full list of VOCs by Method 8260B. Analytical results and historical ranges for the current sampling event are summarized in Table 4.

#### 3.2.2. Target Compounds at the Intermediate and Deep Monitoring Wells

Ten intermediate and deep monitoring wells were analyzed for the full list of volatile organic compounds (VOCs) by Method 8260B or for dichlorodifluoromethane (DCDFM) and Tetrahyrafuran (THF) only by Method 8260B. Analytical results and historical ranges for the current sampling event are summarized in Table 4.

#### 3.3.3 Other VOCs Detected

The following VOCs, in addition to DCDFM and THF, were detected above the preventive action limit (PAL):

Compound	ES ( $\mu\text{g/L}$ )	PAL ( $\mu\text{g/L}$ )	Result ( $\mu\text{g/L}$ )
<b>MW-9I</b>			
Trichloroethene	5	0.5	<b>0.89</b>
<b>MW-13I</b>			
Tetrahydrofuran	50	10	<b>11</b>
<b>MW-14I</b>			
Tetrachloroethene	5	0.5	<b>0.62</b>
<b>MW-14S</b>			
Tetrachloroethene	5	0.5	<b>1.7</b>

**Notes:**

1. **Bolded** values indicate an exceedance of the NR 140 PAL.

Several other VOCs were detected at levels below their respective PAL and ES limits as summarized in Table 1.

#### 3.3.4 Sampling Plan Deviations

There were no deviations from the sampling plan.

Mr. Gary A. Edelstein  
July 16, 2012  
Page 4

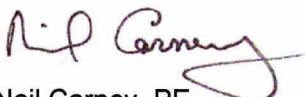

#### 4.0 Recommendations

Due to PAL exceedances for THF, tetrachloroethene, and trichloroethene, we recommend continuing the VOC monitoring program.

If you have any questions regarding site activities or this report, feel free to contact me by phone at 608.443.1298 or by e-mail at [carneyn@ayresassociates.com](mailto:carneyn@ayresassociates.com).

Sincerely,

Ayres Associates Inc

Management

**Instructions:**

- Prepare one form for each license or monitoring ID.
- Please type or print legibly.
- Attach a notification of any values that attain or exceed groundwater standards (that is, preventive action limits, enforcement standards or alternative concentration limits). The notification must include a preliminary analysis of the cause and significance of each value.
- Attach a notification of any gas values that attain or exceed explosive gas levels.
- Send the original signed form, any notification, and Electronic Data Deliverable [EDD] to: GEMS Data Submittal Contact - WA/5 Bureau of Waste Management Wisconsin Department of Natural Resources 101 South Webster Street Madison WI 53707-7921

Redevelopment

**Monitoring Data Submittal Information**

Name of entity submitting data (laboratory, consultant, facility owner):

Contact for questions about data formatting. Include data preparer's name, telephone number and E-mail address:

Name: Neil E. Carney Phone: (608) 443-1298

E-mail: carneyn@ayresassociates.com

Facility name:

License # / Monitoring ID Facility ID / FID Actual sampling dates (e.g., July 2-6, 2003)

Stoughton City Landfill	License# - 00133 FID - 13005950	April 26, 2012
-------------------------	------------------------------------	----------------

The enclosed results are for sampling required in the month(s) of: (e.g., June 2003)

Type of Data Submitted (Check all that apply)

- Groundwater monitoring data from monitoring wells  
 Groundwater monitoring data from private water supply wells  
 Leachate monitoring data

- Gas monitoring data  
 Air monitoring data  
 Other (specify) \_\_\_\_\_

Notification attached?

- No. No groundwater standards or explosive gas limits were exceeded.  
 Yes, a notification of values exceeding a groundwater standard is attached. It includes a list of monitoring points, dates, sample values, groundwater standard and preliminary analysis of the cause and significance of any concentration.  
 Yes, a notification of values exceeding an explosive gas limit is attached. It includes the monitoring points, dates, sample values and explosive gas limits.

**Certification**

*To the best of my knowledge, the information reported and statements made on this data submittal and attachments are true and correct. Furthermore, I have attached complete notification of any sampling values meeting or exceeding groundwater standards or explosive gas levels, and a preliminary analysis of the cause and significance of concentrations exceeding groundwater standards.*

Type of Inspection Routine  Special

Persons/Equipment Present: Neil Carney

General Description of Site Conditions: Overall good site conditions. Growth on landfill cap is emergent. Cattails and vegetation growth observed in South drainage swale as noted in Oct 2011 Report. Animal burrows and vegetation are present as noted in Oct 2011 report. Repairs to be conducted prior to next semi-annual inspection for cap burrows and vegetation. Date for swale repair TBD.

Specific Inspection Items	Potential Problem Areas	Status *	Notes
Perimeter Security Fencing	Broken or missing wood slats, torn chain link fabric.	1	Good condition
Entrance Gate and Locking Mechanism	Lock broken/missing, mechanism inoperative.	1	Good condition
Monitoring Wells and Wellhead Covers	MW-09B mislabeled. Graffiti on OW-4 Signs of tampering, casing damaged, lock missing.	2	MW Hinges to be repaired prior to next inspection. See 10-2011 Report.
Final Cover Vegetation	Bare spots, stressed vegetation, deep rooted vegetation.	1	Excellent condition
Final Cover Slope (explain below)	Gullies, lack of vegetation, subsidence, ponding.	1	Good condition
Evidence of Burrowing Animals	Damage to final cover, evidence of waste.	2	To be repaired prior to next inspection. See above.
Stormwater Drainage Channels	Gullies, erosion, debris, culvert blocked.	2	Cattails & woody vegetation present. See Above.
Landfill Gas Venting System	Damaged or blocked vent risers, stressed vegetation.	1	Good Condition
Access Road	Ponding, rutting, erosion.		
Cover Mowing and Tall Vegetation Removal	Mowing and tall vegetation removal done to specified vegetation height, any missed areas	1	Good Condition.
Removal (October Inspection Only)			

\* (1) Acceptable - No Maintenance Required. (2) Not Acceptable - Identify Required Maintenance.

Summary of Deficiencies and/or Corrective Actions: Graffiti present on OW-4. Monitoring Well "MW-09B" mislabelled as "MW-09D".

**SUBJECT:** Semi-Annual Report  
October 2012 Semi-Annual Facility Inspection  
Bi-Monthly Gas Monitoring Results  
Stoughton City Landfill  
FID No.113005950 - License No. 00133  
USEPA ID #WID980901219

Dear Mr. Edelstein:

This letter provides the Semi-Annual Report for the October 2012 Semi-Annual Facility Inspection, and Bi-Monthly Gas Monitoring events at the Stoughton City Landfill, located in Stoughton, Wisconsin. A discussion of the results of the inspection and monitoring events are summarized in the sections below.

## 1.0 Semi-annual Inspection Results

The Semi-Annual Facility Inspection was conducted on October 12, 2012. Representatives from both the Wisconsin Department of Natural Resources (WDNR) and United States Environmental Protection Agency (USEPA) were present during the inspection. The following items were noted during the inspection. A photolog of the inspection event is provided as Attachment A.

Perimeter Security Fencing - Site signage was unobstructed and legible. The chain-link fencing at the site was in good condition with no damage or vandalism noted. Access gates were in satisfactory condition with both padlocks functioning properly. A broken slat and warped boards are present at the south access gate. Additionally, frost heave has caused the concrete fence supports to rise, and has created an elevated area of fenceline where unauthorized access to the landfill is possible on the southwest perimeter of the landfill. Refer to [Attachment A](#), reference photos 2012-10-001 and 2012-10-002 to see these areas. **Recommend resetting the concrete support to return the fenceline to original condition/elevation, and repairing the warped and broken wooden fence slats.**

Landfill Cover – Vegetation on the landfill cap was established and in late seasonal stage. No localized areas of ponding or bare soil were observed.

One gully, approximately 6-inches deep was observed on the northwest side of the landfill cap near gas vent 18 (GV-18). A pile of sandy soil was observed downgradient of the gully. Refer to [Attachment A](#), reference photo 2012-10-003. **Recommend replacement of sandy material to eliminate gully in this area.**

Multiple animal burrows and deep-rooted woody vegetation were observed during the inspection. The table below summarizes the locations and provides cross-reference to the photolog in Attachment A.

Location	Observation	Photolog Reference
GV-9	Burrow, Woody Vegetation	2012-10-004
GV-5	Burrow	2012-10-005
MW-6S	Burrow	2012-10-006
MW-6S Near Fence	Burrow	2012-10-007
MW-11S	Woody Vegetation	2012-10-008
GV-16	Woody Vegetation	2012-10-009
SE of GV-9	Burrow	2012-10-010
GV-13	Woody Vegetation	2012-10-011
GV-19	Woody Vegetation	2012-10-012
GV-12	Burrow	2012-10-013

**Recommend plugging animal burrows, and removing all woody vegetation and root masses at above-listed locations.**

Storm Water Management System - No visible erosion was observed in the drainage channels, and the culverts appeared undamaged. Existing riprap was clogged with obstructions in the south stormwater drainage feature. Obstructions included cattails and woody vegetation, consistent with past inspections. Based on WDNR direction during the inspection event, no further action will be taken in this area.

Landfill Gas Venting System - All 21 gas vents and screens were in good condition and unobstructed. No further action is required for this inspection feature.

Monitoring Wells and Wellhead Covers – The protective casing interferes with the well cap installation on MW4D, MW14I, and MW15D. Refer to [Attachment A](#), reference photos 2012-10-0014 through 0016. **Recommend installation of a new well cover clasp to allow sufficient clearance for expandable caps at each location.**

The stainless steel well casing has been compromised at MW-7B. Refer to [Attachment A](#), reference photos 2012-10-017. It is assumed that the installation of the existing well packer at this location allowed artesian groundwater to freeze and expand within the well casing. No action is recommend at this location as sampling does not occur at this well.

MW-13S has a broken hinge which allows access to the well. Refer to [Attachment A](#), reference photos 2012-10-018. **Recommend installation of a new hinge and clasp at this location.**

Access Road - The site access road was in good condition with no significant ruts or erosion noted. No further action is required for this inspection feature.

Refer to [Attachment B](#) for the field form completed during the semi-annual inspection.

Mr. Gary A. Edelstein  
November 10, 2012  
Page 3

## **2.0 Bi-monthly Gas Monitoring Results**

Bi-Monthly Gas Monitoring of the three perimeter gas probes was conducted on June 28, August 27, and October 12, 2012. Elevated levels of carbon dioxide (10.1%) in combination with low levels of oxygen (4.3%) were detected in GMP-1 during the October 2012 gas monitoring event. These readings deviate from historical results at this well, and also deviate from readings collected from GMP-2 and GMP-3 during the same event. Recommendations for potential corrective action will be made once additional testing provides a larger data set to confirm potential landfill gas migration. The completed field forms for the Bi-Monthly Gas Monitoring Inspections is included in [Attachment C](#).

## **3.0 Annual Mowing for Landfill Cover**

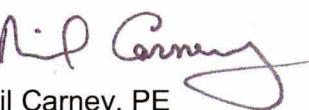

The annual landfill cap mowing event was conducted on August 15, 2012. A tractor pulled mower was utilized during the event. Vegetation was cut to a height of 12-inches or less. Vegetation and brush that were present around existing monitoring wells or gas vents were also cut. There are some well-established root systems near the landfill gas vents which remain as listed in this report. Refer to [Attachment A](#), reference photos 2012-10-019 through 2011-10-020 to see photos of the mowing event.

## **4.0 Conclusion**

If you have any questions regarding site activities or recommendations listed in this report, feel free to contact me by phone at (608) 443-1298, or by e-mail at [carneyn@ayresassociates.com](mailto:carneyn@ayresassociates.com).

Sincerely,

Ayres Associates Inc

  
Neil Carney, PE  
Project Manager

Type of Inspection Routine  Special

Persons/Equipment Present: N. I. Carney, Gary Edelstein (WDNR), Giang-Van Nguyen (USEPA)

General Description of Site Conditions: Cap is in excellent condition with dense vegetation & good coverage. SW drainage swale is full of cattails & has some trees. Per WDNR No action required. Six animal burrows, and five areas of deep rooted woody vegetation present. Erosion gully (or animal dig) near NW side of cap.

Specific Inspection Items	Potential Problem Areas	Status *	Notes
Perimeter Security Fencing	Broken or missing wood slats, torn chain link fabric.	2	Frost heave on SE fence Broken slat and warp @ E gate.
Entrance Gate and Locking Mechanism	Lock broken/missing, mechanism inoperative.	1	OK
Monitoring Wells and Wellhead Covers	Signs of tampering, casing damaged, lock missing.	2	MW-7B casing broken, MW-4D, MW-1SD need new caps MW-3 needs image.
Final Cover Vegetation	Bare spots, stressed vegetation, deep rooted vegetation.	2	See Below
Final Cover Slope (explain below)	Gullies, lack of vegetation, subsidence, ponding.	2	Gully on NW side of cap
Evidence of Burrowing Animals	Damage to final cover, evidence of waste.	2	See Below
Stormwater Drainage Channels	Gullies, erosion, debris, culvert blocked.	2	SW channel clogged w/cattails
Landfill Gas Venting System	Damaged or blocked vent risers, stressed vegetation.	1	OK
Access Road	Ponding, rutting, erosion.		
Cover Mowing and Tall Vegetation Removal (October Inspection Only)	Mowing and tall vegetation removal done to specified vegetation height, any missed areas	1	OK

\* (1) Acceptable - No Maintenance Required. (2) Not Acceptable - Identify Required Maintenance.

Summary of Deficiencies and/or Corrective Actions: Refer to Report. Too many to list here.
