Subject: 2019 Annual Groundwater Monitoring Report
Stoughton City Landfill
FID #113005950 – License #133
USEPA ID #WID980901219
WDNR Purchase Order #37000-0000010307

Dear Mr. Lowery:

This 2019 Annual Groundwater Monitoring Report presents an evaluation of the data from analysis of groundwater samples collected as part of the annual sampling event, for the Stoughton City Landfill site. The data include results from field measurements and analysis of samples collected from 13 groundwater monitoring wells on April 25 and 26, 2019, by SCS Engineers (SCS) staff. The groundwater samples were submitted to Eurofins TestAmerica Chicago (Wisconsin Lab Certification No. 999580010) for laboratory analysis.

A completed Environmental Monitoring Data Certification Form (Form 4400-231), Exceedance Report, and compact disc (CD) with the electronic data deliverable (EDD) file were transmitted to the Wisconsin Department of Natural Resources (WDNR) Groundwater and Environmental Monitoring System (GEMS) Data Submittal Contact.

SAMPLE COLLECTION AND ANALYSIS

In accordance with the approved Quality Assurance Project Plan (QAPP) and Field Sampling Plan - Revision 2, March 31, 2016, SCS collected groundwater samples from 13 monitoring wells. SCS staff also collected duplicate samples at wells MW13I and MW14I, and prepared a field blank (FB) at the site for shipment to, and analysis by, the laboratory. A trip blank (TB) was prepared by the laboratory and accompanied the sample containers until analyzed with the site samples by the laboratory. Samples from the monitoring wells were analyzed for field parameters by SCS staff, and submitted to Eurofins TestAmerica Inc. for analysis of volatile organic compounds (VOCs) by Environmental Protection Agency (EPA) Method SW 8260B. In accordance with the approved Field Sampling Plan, results from analysis of samples from six of the wells sampled were reported for two VOCs - dichlorodifluoromethane (DCDFM) and tetrahydrofuran (THF). The data from laboratory analysis of those samples are presented in the analytical report for job 500-162371-1, a copy of which is provided in **Appendix A**. Results from analysis of the samples from the remaining seven wells are reported for a typical list of VOCs. The data from laboratory analysis of those samples are presented in the analytical report for job 500-162370-1, a copy of which is also provided in **Appendix A**.

GROUNDWATER DATA

A summary of the VOCs quantified in groundwater samples by the laboratory during this reporting period is presented in **Table 1**. **Table 1** also includes VOCs reported during the three prior annual sampling events (i.e., 2016, 2017, and 2018). The depth to water measurements at the monitoring wells and calculated groundwater elevations for this reporting period are presented in **Table 2**. The results from analysis for field parameters on the samples collected during this period are summarized in **Table 3**. A comparison of the concentrations of DCDFM and THF reported from analysis of the samples collected in 2019 to prior results is included in **Table 4**. A copy of the analytical reports from the laboratory for this period, which includes the case narrative, chain of custody forms, and quality control report is included in **Appendix A**. A copy of the data certification form and the data summaries that identify results in excess of the NR 140 Preventive Action Limit (PAL) or Enforcement Standard (ES) (i.e., the Exceedance Report) prepared by TestAmerica is provided in **Appendix B**.

Groundwater Elevations

As shown in **Table 2**, the depth to water measurements, and corresponding groundwater elevations from this reporting period, are generally consistent with prior data. Groundwater was flowing from the top of three of the 13 monitoring wells at the time of the 2019 sampling event. Groundwater elevations were slightly higher (0.68 to 1.28 feet) in 2019 than at the time of the prior annual sampling event in 2018. The groundwater elevation at MW10S was 0.02 feet lower in 2019, than in 2018. The depth to water measurements can be found on the Field Forms included in **Appendix C**.

Compounds Reported in Groundwater Samples

The following VOCs were reported at concentrations at or above the PAL in the groundwater samples collected during this reporting period:

- Trichloroethene (TCE) – MW9I at 0.77 micrograms per liter ($\mu\text{g}/\text{L}$) (PAL of 0.5 $\mu\text{g}/\text{L}$)
- Tetrachloroethene (PCE) – MW14S at 0.81 $\mu\text{g}/\text{L}$ (PAL of 0.5 $\mu\text{g}/\text{L}$)
- Tetrachloroethene (PCE) – MW10I at 3.2 $\mu\text{g}/\text{L}$ (PAL of 0.5 $\mu\text{g}/\text{L}$)

No results exceeded the concentrations established as the ES, or federal Maximum Contaminant Levels (MCLs), from analysis of samples collected during this period.

Other VOCs that were reported at concentrations below their respective PAL and ES, or for compounds where a PAL or ES has not been established, are summarized in **Table 1**.

Data Evaluation

The TCE concentration reported from analysis of the sample collected during this period (i.e., 2019) at well MW09I (i.e., 0.77 $\mu\text{g}/\text{L}$) is above the PAL (0.5 $\mu\text{g}/\text{L}$), but below the concentration established as the ES (5.0 $\mu\text{g}/\text{L}$). The current result is consistent with analysis of recent prior samples from this well.

The PCE concentration reported from analysis of the sample collected during this period (i.e., 2019) at well MW14S (i.e., 0.81 $\mu\text{g}/\text{L}$) is above the PAL (0.5 $\mu\text{g}/\text{L}$), but below the concentration established as the ES (5.0 $\mu\text{g}/\text{L}$). The current result is consistent with analysis of recent prior samples from this

well. It should be noted that the result was qualified by the laboratory as an estimated concentration (i.e., J-flagged).

The PCE concentration reported from analysis of the sample collected during this period (i.e., 2019) at well MW10I (i.e., 3.2 µg/L) is above the PAL (0.5 µg/L), but below the concentration established as the ES (5.0 µg/L). The current result (3.2 µg/L) is slightly higher than the range (1.3 – 1.9 µg/L) of values reported from analysis of samples from the past three reporting periods (i.e., 2016 – 2018).

DCDFM was quantified by the laboratory at concentrations below the PAL (i.e., 200 µg/L) in samples from 4 of the 13 wells where samples were collected during this reporting period. As shown in **Table 4**, the highest concentration of DCDFM during this reporting period (i.e., 16 µg/L) was from analysis of the samples collected at wells MW9S and MW9I.

As summarized in **Table 4**, THF was not identified in analysis of any of the samples from this reporting period; thus, there are currently no concentrations above the PAL (10 µg/L) or ES (50 µg/L).

The methylene chloride concentrations identified in samples from five of the groundwater monitoring wells in 2018 were not confirmed by analysis of the samples collected in 2019. The 2019 results support the conclusion that the methylene chloride concentrations reported in 2018 were anomalies related to laboratory contamination.

Data Quality

As summarized in the case narrative of the laboratory report, the analysis of laboratory quality control (QC) samples associated with the site samples during this reporting period did not indicate any significant issues. In addition to the laboratory QC measures, the laboratory analyzed 2 duplicate samples, 1 FB, and 1 TB prepared in association with this sampling event to assess data quality.

Trip blanks are created in the laboratory and accompany the sample containers from the lab, to the field, and back to the lab. The purpose of a trip blank is to assess whether samples were potentially exposed to contaminants during sampling or shipping procedures. One VOC, toluene, was reported at a low, estimated concentration (i.e., between the limit of detection and the limit of quantitation) of 0.19 µg/L, during this sampling event. This value is well below the concentration established as the NR 140 PAL (160 µg/L). Toluene was not identified in any other samples from this sampling event; thus, is not expected to indicate any issues related to sample contamination. FB samples are created in the field using the existing sampling equipment and a known clean water source, and accompany the samples to the laboratory. Analysis of FBs can help assess potential impacts from sampling procedures and sampling equipment. No VOCs were quantified in analysis of the FB prepared during this sampling event.

Duplicate samples were collected as part of this sampling event at monitoring wells MW14I and MW13I. The results for the samples collected at MW13I are consistent in that no VOCs were reported in either sample. The results from analysis of the duplicate samples collected at MW14I are consistent except that trichloroethene was reported at a low concentration (i.e., 0.18 µg/L) in one of the two samples. The result was qualified by the laboratory as an estimated concentration. The results for the one VOC quantified in the two samples from MW14I (dichlorofluoromethane) were consistent at concentrations of 9.4 and 9.6 µg/L. The identified concentration of TCE is low, below

Mr. Jason Lowery
June 24, 2019
Page 4

the PAL of 0.5 µg/L, thus is not likely to indicate significant problems related to data quality (i.e., reproducibility).

A copy of this report as a portable document file (PDF) file is included on the enclosed CD. If you have any questions regarding this report, please contact Leslie Busse at 608-216-7343.

Sincerely,

Zach Watson

Bold+underlined values meet or exceed NR 140 enforcement standards.

Italic+underlined values meet or exceed NR 140 preventive action limits.

Laboratory Notes/Qualifiers:

C = Probable Lab Contamination

F1 = MS and/or MSD Recovery is outside acceptance limits.

J = Results reported between the Method Detection Limit (MDL) and Limit of Quantitation (LOQ) are less certain than results at or above the LOQ.

J1 = Reported value was between the limit of detection and the limit of quantitation.

* = LCS or LCSD is outside acceptance limits.

(1) Trichlorofluoromethane = LCS or LCSD is outside acceptance limits.

(2) Bromomethane = LCS or LCSD is outside acceptance limits. CCV Recovery is outside acceptance limits.

**Table 4. Historical Target Compound Detections
Annual Groundwater Report - April 2019
Stoughton City Landfill / SCS Engineers Project #25219092.00**

| Shallow Monitoring Wells | | | | |
|--------------------------|------------------------------------|-----|-------------------------|-------|
| Well | Current Event Concentration (µg/L) | | Historical Range (µg/L) | |
| | DCDFM | THF | DCDFM | THF |
| MW9S | 16 | ND | 22-400 | ND-22 |
| MW10S | ND | ND | ND-20 | ND-20 |
| MW14S | ND | ND | 2.4-710 | ND-50 |

| Intermediate and Deep Monitoring Wells | | | | |
|--|------------------------------------|-----|-------------------------|--------|
| Well | Current Event Concentration (µg/L) | | Historical Range (µg/L) | |
| | DCDFM | THF | DCDFM | THF |
| MW5D | ND | ND | 0.92-10 | ND-4.0 |
| MW9I | 16 | ND | 12-340 | ND-12 |
| MW9B | 1.5 J | ND | 2.3-25 | ND-2.4 |
| MW10I | 5.8 | ND | ND-280 | ND-21 |
| MW14I | ND | ND | 2.1-590 | ND-2.4 |

Abbreviations:

µg/L = micrograms per liter
DCDFM = dichlorodifluoromethane
J - Estimated concentration

ND = Not Detected
THF = tetrahydrofuran

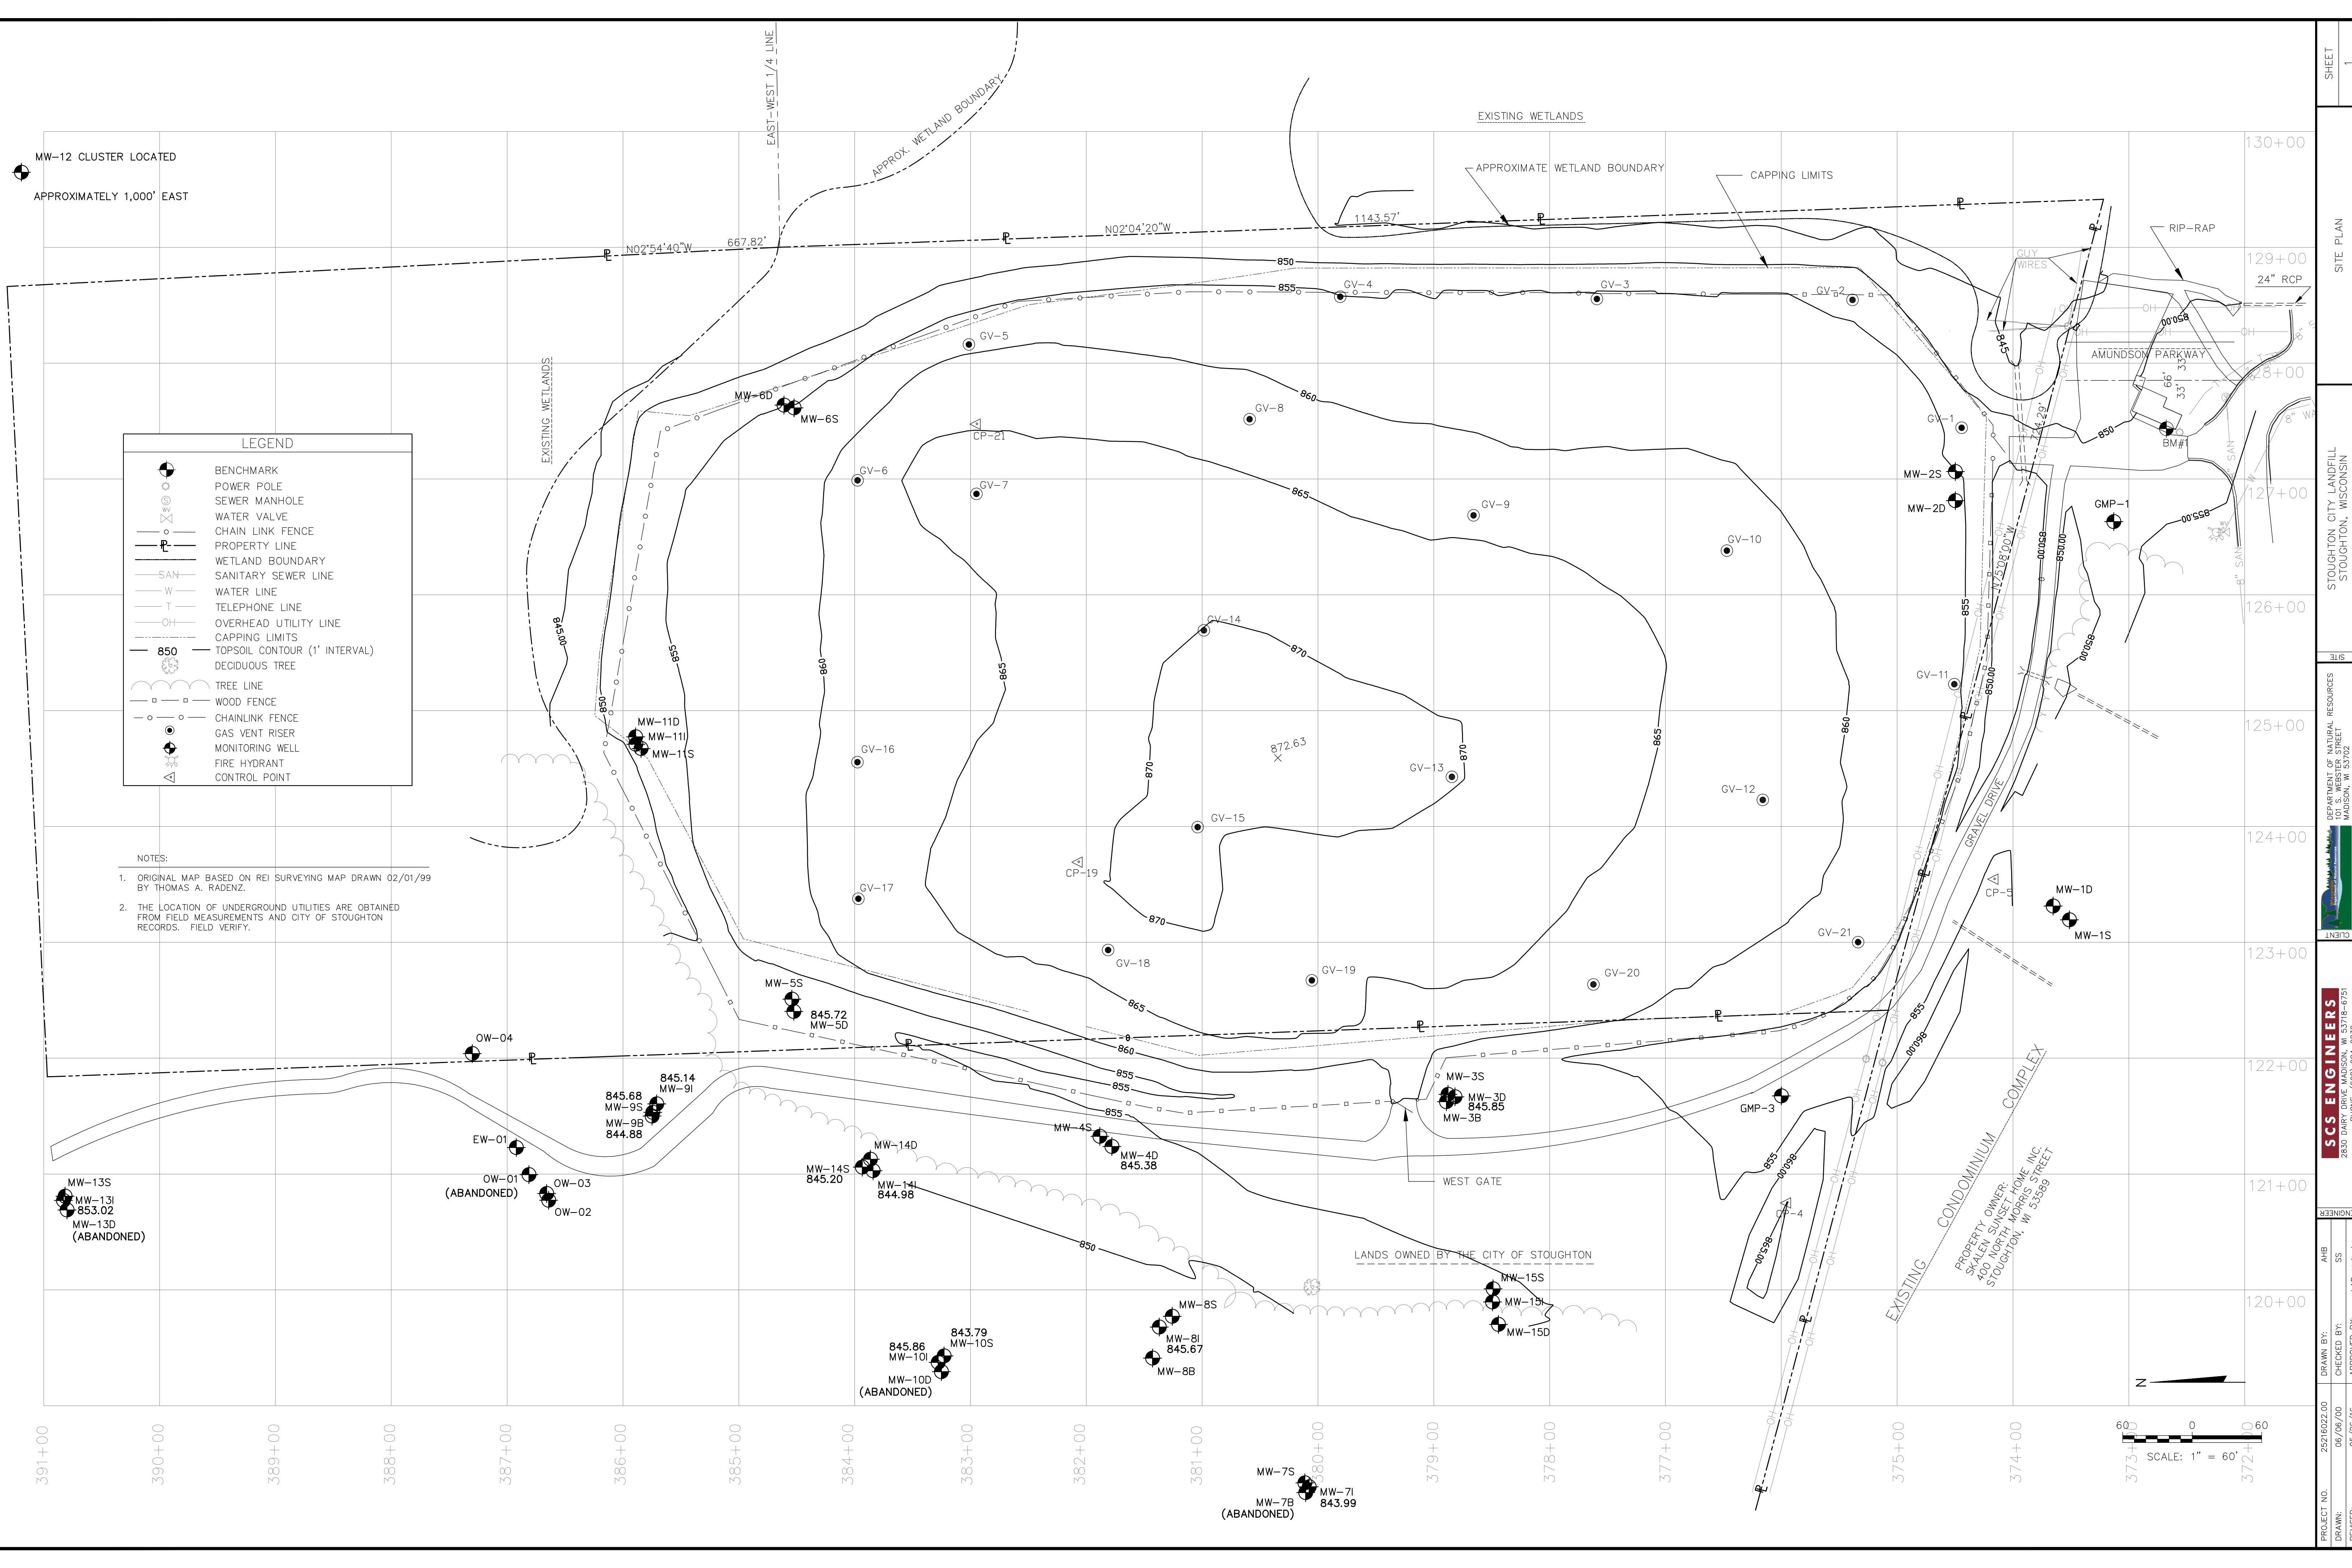

Historical range includes 9 rounds of sampling performed by BT², Inc. (8/00, 4/01, 11/01, 4/02, 11/02, 4/03, 11/03, 4/04, 11/04) and two rounds performed by Roy F. Weston in April 1998 and April 1999.

The test results in this report meet all 2003 NELAC and 2009 TNI requirements for accredited parameters, exceptions are noted in this report. This report may not be reproduced except in full, and with written approval from the laboratory. For questions please contact the Project Manager at the e-mail address or telephone number listed on this page.

This report has been electronically signed and authorized by the signatory. Electronic signature is intended to be the legally binding equivalent of a traditionally handwritten signature.

Results relate only to the items tested and the sample(s) as received by the laboratory.

No additional comments.

Receipt

The samples were received on 4/27/2019 10:00 AM; the samples arrived in good condition, properly preserved and, where required, on ice. The temperature of the cooler at receipt was 0.4° C.

GC/MS VOA

The laboratory control sample (LCS) for 484003 recovered outside control limits for the following analyte: Methyl tert-butyl ether. This analyte was biased high in the LCS and was not detected in the associated samples; therefore, the data have been reported.

The laboratory control sample (LCS) for 484267 recovered outside control limits for the following analyte: Methyl tert-butyl ether. This analyte was biased high in the LCS and was not detected in the associated samples; therefore, the data have been reported.

The laboratory control sample (LCS) for 484122 recovered outside control limits for the following analyte: Bromomethane. This analyte was biased high in the LCS and was not detected in the associated samples; therefore, the data have been reported.

The continuing calibration verification (CCV) 29C0507P associated with batch 484122 recovered above the upper control limit for Bromomethane. The samples associated with this CCV were non-detects for the affected analyte; therefore, the data have been reported. The following samples are impacted: MW14S (500-162370-5), MW14I (500-162370-6), MW10I (500-162370-7), MW14I DUP (500-162370-8), 01 FB (500-162370-9) and TB (500-162370-10).

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Definitions/Glossary

Client: SCS Engineers
Project/Site: Stoughton LF #25216022

Job ID: 500-162370-1

Qualifiers

GC/MS VOA

| Qualifier | Qualifier Description |
|-----------|--|
| * | LCS or LCSD is outside acceptance limits. |
| ^c | CCV Recovery is outside acceptance limits. |
| J | Reported value was between the limit of detection and the limit of quantitation. |

Glossary

| Abbreviation | These commonly used abbreviations may or may not be present in this report. |
|----------------|---|
| □ | Listed under the "D" column to designate that the result is reported on a dry weight basis |
| %R | Percent Recovery |
| CFL | Contains Free Liquid |
| CNF | Contains No Free Liquid |
| DER | Duplicate Error Ratio (normalized absolute difference) |
| Dil Fac | Dilution Factor |
| DL | Detection Limit (DoD/DOE) |
| DL, RA, RE, IN | Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample |
| DLC | Decision Level Concentration (Radiochemistry) |
| EDL | Estimated Detection Limit (Dioxin) |
| LOD | Limit of Detection (DoD/DOE) |
| LOQ | Limit of Quantitation (DoD/DOE) |
| MDA | Minimum Detectable Activity (Radiochemistry) |
| MDC | Minimum Detectable Concentration (Radiochemistry) |
| MDL | Method Detection Limit |
| ML | Minimum Level (Dioxin) |
| NC | Not Calculated |
| ND | Not Detected at the reporting limit (or MDL or EDL if shown) |
| PQL | Practical Quantitation Limit |
| QC | Quality Control |
| RER | Relative Error Ratio (Radiochemistry) |
| RL | Reporting Limit or Requested Limit (Radiochemistry) |
| RPD | Relative Percent Difference, a measure of the relative difference between two points |
| TEF | Toxicity Equivalent Factor (Dioxin) |
| TEQ | Toxicity Equivalent Quotient (Dioxin) |

Creator: Buckley, Paula M

| Question | Answer | Comment |
|---|--------|---------|
| Radioactivity wasn't checked or is \leq background as measured by a survey meter. | True | |
| The cooler's custody seal, if present, is intact. | True | |
| Sample custody seals, if present, are intact. | True | |
| The cooler or samples do not appear to have been compromised or tampered with. | True | |
| Samples were received on ice. | True | |
| Cooler Temperature is acceptable. | True | |
| Cooler Temperature is recorded. | True | 0.4 |
| COC is present. | True | |
| COC is filled out in ink and legible. | True | |
| COC is filled out with all pertinent information. | True | |
| Is the Field Sampler's name present on COC? | True | |
| There are no discrepancies between the containers received and the COC. | True | |
| Samples are received within Holding Time (excluding tests with immediate HTs) | True | |
| Sample containers have legible labels. | True | |
| Containers are not broken or leaking. | True | |
| Sample collection date/times are provided. | True | |
| Appropriate sample containers are used. | True | |
| Sample bottles are completely filled. | True | |
| Sample Preservation Verified. | True | |
| There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs | True | |
| Containers requiring zero headspace have no headspace or bubble is <math><6\text{mm}</math> (1/4"). | True | |
| Multiphasic samples are not present. | True | |
| Samples do not require splitting or compositing. | True | |
| Residual Chlorine Checked. | N/A | |

The test results in this report meet all 2003 NELAC and 2009 TNI requirements for accredited parameters, exceptions are noted in this report. This report may not be reproduced except in full, and with written approval from the laboratory. For questions please contact the Project Manager at the e-mail address or telephone number listed on this page.

This report has been electronically signed and authorized by the signatory. Electronic signature is intended to be the legally binding equivalent of a traditionally handwritten signature.

Results relate only to the items tested and the sample(s) as received by the laboratory.

Definitions/Glossary

Client: SCS Engineers
Project/Site: Stoughton LF #25216022

Job ID: 500-162371-1

Glossary

| Abbreviation | These commonly used abbreviations may or may not be present in this report. |
|----------------|---|
| α | Listed under the "D" column to designate that the result is reported on a dry weight basis |
| %R | Percent Recovery |
| CFL | Contains Free Liquid |
| CNF | Contains No Free Liquid |
| DER | Duplicate Error Ratio (normalized absolute difference) |
| Dil Fac | Dilution Factor |
| DL | Detection Limit (DoD/DOE) |
| DL, RA, RE, IN | Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample |
| DLC | Decision Level Concentration (Radiochemistry) |
| EDL | Estimated Detection Limit (Dioxin) |
| LOD | Limit of Detection (DoD/DOE) |
| LOQ | Limit of Quantitation (DoD/DOE) |
| MDA | Minimum Detectable Activity (Radiochemistry) |
| MDC | Minimum Detectable Concentration (Radiochemistry) |
| MDL | Method Detection Limit |
| ML | Minimum Level (Dioxin) |
| NC | Not Calculated |
| ND | Not Detected at the reporting limit (or MDL or EDL if shown) |
| PQL | Practical Quantitation Limit |
| QC | Quality Control |
| RER | Relative Error Ratio (Radiochemistry) |
| RL | Reporting Limit or Requested Limit (Radiochemistry) |
| RPD | Relative Percent Difference, a measure of the relative difference between two points |
| TEF | Toxicity Equivalent Factor (Dioxin) |
| TEQ | Toxicity Equivalent Quotient (Dioxin) |

List Source: Eurofins TestAmerica, Chicago

List Number: 1

Creator: Buckley, Paula M

| Question | Answer | Comment |
|--|--------|---------|
| Radioactivity wasn't checked or is </= background as measured by a survey meter. | True | |
| The cooler's custody seal, if present, is intact. | True | |
| Sample custody seals, if present, are intact. | True | |
| The cooler or samples do not appear to have been compromised or tampered with. | True | |
| Samples were received on ice. | True | |
| Cooler Temperature is acceptable. | True | |
| Cooler Temperature is recorded. | True | 0.4 |
| COC is present. | True | |
| COC is filled out in ink and legible. | True | |
| COC is filled out with all pertinent information. | True | |
| Is the Field Sampler's name present on COC? | True | |
| There are no discrepancies between the containers received and the COC. | True | |
| Samples are received within Holding Time (excluding tests with immediate HTs) | True | |
| Sample containers have legible labels. | True | |
| Containers are not broken or leaking. | True | |
| Sample collection date/times are provided. | True | |
| Appropriate sample containers are used. | True | |
| Sample bottles are completely filled. | True | |
| Sample Preservation Verified. | True | |
| There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs | True | |
| Containers requiring zero headspace have no headspace or bubble is <6mm (1/4"). | True | |
| Multiphasic samples are not present. | True | |
| Samples do not require splitting or compositing. | True | |
| Residual Chlorine Checked. | N/A | |

Appendix B

Certification, Data Summary, and Exceedance Report

Notice: Personally identifiable information collected will be used for program administration and enforcement purposes. The Department may also provide this information to requesters as required under Wisconsin's Open Records law, ss. 19.31 to 19.39, Wis. Stats. When submitting monitoring data, the owner or operator of the facility, practice or activity is required to notify the Department in writing that a groundwater standard or an explosive gas level has been attained or exceeded, as specified in ss. NR 140.24(1)(a); NR 140.26(1)(a); NR 507.30NR 635.14(9)(a); NR 635.18(20) and NR 507.30, Wis. Adm. Code. Failure to report may result in fines, forfeitures or other penalties resulting from enforcement under ss. 289.97, 291.97 or 299.95, Wis. Stats.

Instructions:

- Prepare one form for each license or monitoring ID.
- Please type or print legibly.
- Attach a notification of any values that attain or exceed groundwater standards (that is, preventive action limits, enforcement standards or alternative concentration limits). The notification must include a preliminary analysis of the cause and significance of each value.
- Attach a notification of any gas values that attain or exceed explosive gas levels.
- Send the original signed form, any notification, and Electronic Data Deliverable [EDD] to: GEMS Data Submittal Contact - WA/5
 Wisconsin Department of Natural Resources
 P.O. Box 7921
 Madison, WI 53707-7921

Monitoring Data Submittal Information

Name of entity submitting data (laboratory, consultant, facility owner)
 TestAmerica Laboratories Inc.

Contact for questions about data formatting. Include data preparer's name, telephone number and Email address:

| | |
|---|---|
| Name Sandra Fredrick | Phone No. (include area code) (920) 261-1660 |
| Email Sandie.Fredrick@testamericainc.com | |

Facility Name
 Stoughton City Landfill - 25216022

| | |
|----------------------------------|--------------------------------|
| License # / Monitoring ID 133 | Facility ID (FID) 113005950 |
|----------------------------------|--------------------------------|

| | |
|--|--|
| Actual sampling dates (e.g., July 2-6, 2003) April 25th, 2019 | The enclosed results are for sampling required in the month(s) of: (e.g., June 2003) April 2019 |
|--|--|

Type of Data Submitted (Check all that apply):

- | | |
|---|--|
| <input checked="" type="checkbox"/> Groundwater monitoring data from monitoring wells | <input type="checkbox"/> Gas monitoring data |
| <input type="checkbox"/> Groundwater monitoring data from private water supply wells | <input type="checkbox"/> Air monitoring data |
| <input type="checkbox"/> Leachate monitoring data | <input type="checkbox"/> Other (specify): |

Notification attached?

- No. No groundwater standards or explosive gas limits were exceeded.
- Yes, a notification of values exceeding a groundwater standard is attached. It includes a list of monitoring points, dates, sample values, groundwater standard and preliminary analysis of the cause and significance of any concentration.
- Yes, a notification of values exceeding an explosive gas limit is attached. It includes the monitoring points, dates, sample values and explosive gas limits.

Certification

To the best of my knowledge, the information reported and statements made on this data submittal and attachments are true and correct. Furthermore, I have attached complete notification of any sampling values meeting or exceeding groundwater standards or explosive gas levels, and a preliminary analysis of the cause and significance of concentrations exceeding groundwater standards.

Comments: Purge water from MW9I was disposed of at MMSD on 4/25/2019.

Sampling Device: Bailer

Meter calibrated @ 0900 on 4/26/2019.

Purging Method: Bailer & Monsoon

Cleaning Method: Tap water for Monsoon & nondedicated bailers Form # _____
