Re: Completion of the Remediation System Building Demolition and Removal at the
Oconomowoc Electroplating Co. Inc. Superfund Site

Dear Ms. Fassbender:

The U.S. Environmental Protection Agency (EPA) has received a copy of the Wisconsin Department of Natural Resources' (WDNR's) 09/12/2017 Remedial Action completion letter, which announced the successful demolition and removal of the groundwater treatment plant at the Oconomowoc Electroplating Co. Inc. Superfund Site. This work was carried out under a cooperative agreement between EPA and WDNR (Grant # 00E01492), and represents significant cost saving through a federal/state partnership. Thank you for sending us the notice of completion and congratulations on successfully completing the project.

Sincerely,

A handwritten signature in black ink, appearing to read "T. Short".

Subject: Remediation System Building Demolition and Removal at the Former Oconomowoc Electroplating Co. Inc. (OEI) Superfund Site, W2573 Oak St., Ashippun, Dodge County, WI. DNR BRRTS # 02-14-000905

Dear Mr. Haak:

The Wisconsin Department of Natural Resources (DNR) is issuing this letter as approval for the completion of the recent remedial action that removed the former groundwater treatment plant building at the OEI Superfund Site.

Your report submittal regarding the building demolition was received by the DNR on May 1, 2017, and it is available at: <http://dnr.wi.gov/botw/GetActivityDetail.do?adn=0214000905>. However, since the site restoration involved re-seeding the new topsoil, we waited a few months for grass to grow before issuing this completion letter.

To quote your subcontractor, Mr. Don Callen: "You'll never know that there was a building there before" and he is correct. We appreciated all the remedial work you did for this site.

Sincerely,

A handwritten signature in cursive script that reads 'Aristeo M. Pelayo'.
