RE: Water Supply Well Sample Results for W14297 Charles St Property, Ripon, WI

Dear Mr. Gaastra:

Pursuant to the Wisconsin Department of Natural Resources' (WDNR) requirement, Ashley Weimer from Tetra Tech collected a water sample from your water supply well on April 26, 2013 for volatile organic compound (VOC) analysis. I am happy to report no VOCs were detected in this sample.

If you have any further questions concerning the enclosed information, please contact me at 920-748-4914 or Gary Edelstein with the WDNR at 608-267-7563. Your cooperation in this matter is greatly appreciated.

Sincerely,

Lori Rich

RE: Water Supply Well Sample Results for W14298 Charles St Property, Ripon, WI

Dear Mr. and Mrs. Perry:

Pursuant to the Wisconsin Department of Natural Resources' (WDNR) requirement, Ashley Weimer from Tetra Tech collected a water sample from your water supply well on April 26, 2013 for volatile organic compound (VOC) analysis. No contamination related to former FF/NN landfill was found. Methylene chloride was detected at very low levels and is believed to be contributed by the lab during analytical testing. The level of methylene chloride is well below the health advisory level. Thus there is no reason to believe that the water from your well poses any health risk.

If you have any further questions concerning the enclosed information, please contact me at 920-748-4914 or Gary Edelstein with the WDNR at 608-267-7563. Your cooperation in this matter is greatly appreciated.

Sincerely,

Lori Rich
