SUBJECT: Proposed Second Replacement Sentinel Monitoring Well Work Plan Approval for the
Ripon HWY FF/NN Landfill
License #467, Ripon, WI
WDNR BRRTS #02-20-000915

Dear Mr. Tracy:

The Department has reviewed the proposal for second new sentinel monitoring well (P-118) prepared by Tetra Tech and received by email on June 6, 2017. The proposal is approved subject to the following condition:

1. Monitoring well P-117 and new monitoring well P-118 shall follow the same sampling frequency and parameters as P-116. This is quarterly monitoring to include water levels, VOCs, and natural attenuation parameters. The groundwater monitoring plan that was approved in our April 18, 2013 letter approval is hereby amended to include this condition.

The Department will evaluate the need for monitoring of the 2 private wells at a regular frequency at N8851 CTH PP, the Schroeder and Washkovick wells, based on the monitoring results for new well P-118.

The Department appreciates your efforts to restore the environment at this site. Should you have any questions regarding this letter, please call me at (608)267-7563 or email me at gary.edelstein@wisconsin.gov. Thank you for your cooperation.

Sincerely,

A handwritten signature in black ink, appearing to read 'Gary Edelstein', is written over the word 'Sincerely,'.

Gary A. Edelstein
Waste Management Engineer
Remediation & Redevelopment Program
