Subject: Foundry Sand Containing PCB Contamination
East Lot, Perkins Avenue Site
Waukesha, Wisconsin
Versar Project No. 1871.004

Dear Mr. Edquist:

The purpose of this letter is to provide an update on Phase III remedial action activities taken at the above referenced site since Versar, Inc's. (Versar) last correspondence dated February 2, 1994. This letter serves to amend both the previous correspondence and Versar's Phase III Assessment and Conceptual Action Plan submitted in November 1993. We have included the figures from the referenced letter report on remedial actions taken at the site. These figures detail the excavation limits, depths, and clean-up validation sampling.

The site has an area which contains fill deposits composed of foundry sand with minor amounts of wood, brick, and concrete fragments. PCBs were detected in surface and test pit sampling during the Phase II investigation. Completion of the Phase III investigations delineated PCB contaminant extent and in place quantities through the use of soil borings with surface and subsurface sampling. Both hazardous and non-hazardous levels of PCBs were found in the fill. PCBs in concentrations above 50 parts per million (ppm) are considered hazardous, while levels less than 50 ppm are considered non-hazardous. The Wisconsin Department of Natural Resources (WDNR) has set 5 ppm as an action level for remediation of PCB contamination.

Initial remedial activities were performed by E & K Hazardous Waste, and occurred on December 9th and 10th. All on-site activities were observed by a Versar field geologist. Based on analytical results, previously presented in the Phase III Assessment Report, soil was excavated and segregated into hazardous and non-hazardous stockpiles. Each of the stockpiles were placed on and covered with plastic to isolate the material from the ground and contact with precipitation. Refer to Figure 9, of the Phase III report and also found in Attachment 1, for sample locations and excavation depths.

Analytical results from excavation floor and sidewall samples indicate PCB concentrations above action levels in four floor (ie; F-2, F-4, F-6, and F-9) sample locations. PCB concentrations ranging between 5 and 50 ppm were found in three locations. A fourth location was found to contain PCBs in excess of 50 ppm.

1871.004\corres\4

E & K mobilized by the site on December 17th for a subsequent phase of soil removal. Additional soils were removed in the location of the four floor samples which exceeded the WDNR action limits and placed into appropriate stockpiles. Four additional floor samples were taken which replicated the failed sample locations. Analytical results indicate that one (ie; F-10) of the four samples contained PCB concentrations above the 5 ppm action level. Refer to Figure 10, of the Phase III report and also found in Attachment 1, for sample locations and excavation depths during the second phase of remedial activities.

The single analytical hit, sample F-10, from the second remedial effort was located at the deepest portion of the excavation. Versar mobilized to the site on December 23rd to take four more floor samples (ie; F-14, F-15, F-16, and F-17) in the vicinity of F-10. Two samples were from the same level as F-10 and two samples were taken from a horizon four to six inches deeper than the failed sample. Analytical results indicate that the small area around F-10 still contain concentrations of PCBs which require remedial action as special waste (ie; F-14, and F-17). However, the lower horizons in this area are free of PCBs above state action levels (ie; F-15, and F-16). Refer to Figure 11, of the Phase III report and also found in Attachment 1, for sample locations during the final phase of sampling. The remaining foundry fill found to be above WDNR action levels were removed at a later date and placed in to DOT-approved drums. Material was removed to the elevation of the clean samples F-15 and F-16.

Versar calculated that approximately 60 cubic yards of hazardous and 100 cubic yards on non-hazardous soil would be removed. This estimate was based on the net in place air space volume as determined by previous analytical results. The final stockpile geometry has an estimated volume between 75 to 85 cubic yards of hazardous and 120 to 130 cubic yards of non-hazardous soil. The difference between the initial estimate and final soil volume can be attributed to both excavation of additional soils due to failed floor samples, and bulking from removing compacted soil and placing it into uncompacted stockpiles.

E & K obtained disposal permits for both hazardous and non-hazardous fractions of soil stockpiled at the site. Excavated foundry fill found to be hazardous was disposed at a U.S. Pollution Control, Inc. (USPCI) located in Clive, Utah. A total of 175.49 tons of hazardous material was handled through a Superior Services rail terminal for shipment to USPCI. Excavated foundry fill found to have PCB concentrations above WDNR's action level but below hazardous levels were disposed of at Wayne Services located in Belleville, Michigan. A total of 292.55 tons of non-hazardous PCB contaminated material was shipped to Wayne Services. Copies of both hazardous and non-hazardous waste manifest are found in Attachment 2. Each of the stockpiles were removed down to the plastic that had been placed prior to excavation.

E & K backfilled the excavation with gravel after stockpiles were taken for disposal. E & K and Versar mobilized to the site on April 29, 1994 to remove the last remaining soils above WDNR action levels (ie. F-14 and F-17). E & K utilized a small backhoe to remove clean stone backfill above the excavation area

Mr. David Edquist

where failed samples were located and impacted foundry fill. The removed fill, found to be above WDNR action levels from sampling on December 23rd, was placed into three DOT-approved drums for later shipment and disposal. E & K is presently arranging disposal of the three drums as non-hazardous PCB waste at Wayne Services in Michigan. Due to a recent office fire at the disposal site, the Wayne Services has been delayed in processing disposal permits. The drums will be removed as soon as the permit is secured.

Manifest copies for these drums will be forwarded to you after E & K completes this additional task. Please feel free to contact us at (708) 990-7555 if you have any questions or comments.

Sincerely,

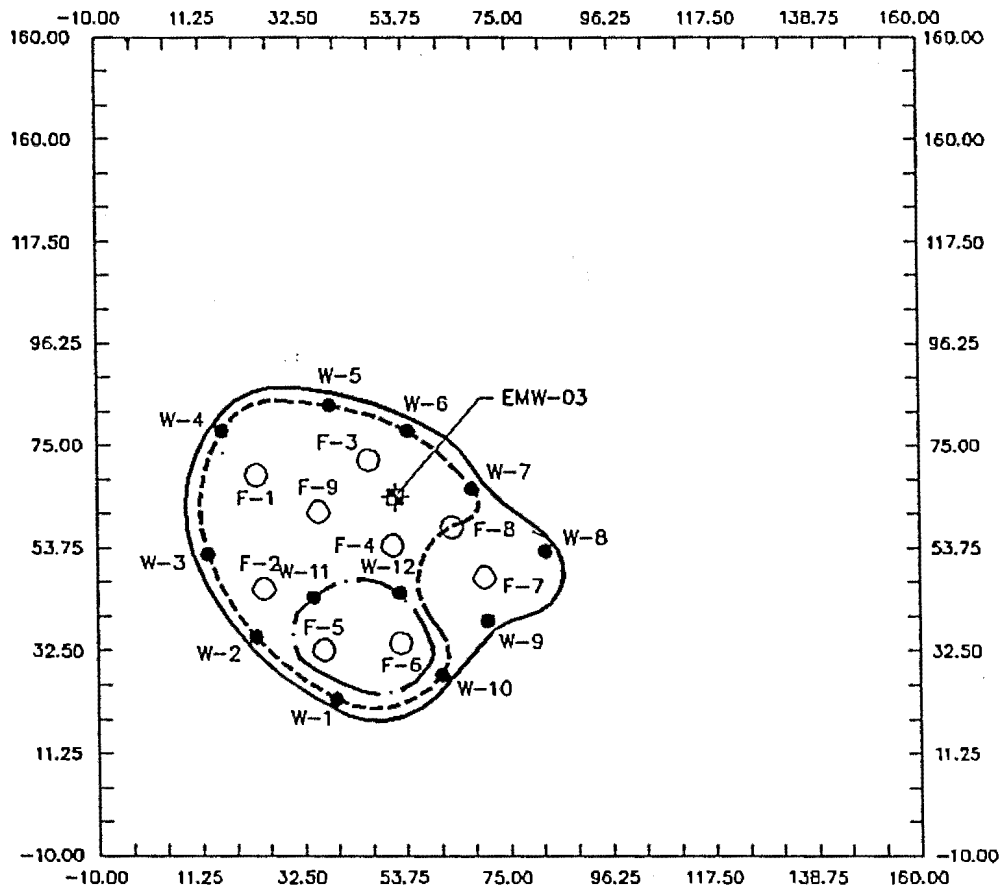

Michael Melton
Project Geologist

SECTION V

RESTRICTED WASTE NOTIFICATION

_____ I notify that I have personally examined and am familiar with the waste through analysis and testing or through knowledge of the waste to support this notification that the waste does not comply with the treatment standards specified in 40 CFR 268, Subpart D and must be treated to the appropriate regulatory treatment standard prior to land disposal.

SECTION VI

UNRESTRICTED WASTE NOTIFICATION

X I notify that I have personally examined and am familiar with the waste through analysis and testing or through knowledge of the waste and hereby certify, under penalty of law, that this waste is not restricted as specified in 40 CFR 268, Subpart D, and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA Section 3004(d).

SECTION VII

SIGNATURES

This notification must be attached to the manifest for shipment.

Please attach waste analysis if available.

I believe that the information I submitted is true, accurate, and complete. I am aware that there are significant penalties for submitting false notification, including the possibility of a fine and imprisonment.

_____	_____	_____	_____	_____	_____
_____	_____	_____	_____	_____	_____
_____	_____	_____	_____	_____	_____

For additional Waste Codes attach additional pages.

SECTION V

RESTRICTED WASTE NOTIFICATION

____ I notify that I have personally examined and am familiar with the waste through analysis and testing or through knowledge of the waste to support this notification that the waste does not comply with the treatment standards specified in 40 CFR 268, Subpart D and must be treated to the appropriate regulatory treatment standard prior to land disposal.

SECTION VI

UNRESTRICTED WASTE NOTIFICATION

I notify that I have personally examined and am familiar with the waste through analysis and testing or through knowledge of the waste and hereby certify, under penalty of law, that this waste is not restricted as specified in 40 CFR 268, Subpart D, and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA Section 3004(d).

SECTION VII

SIGNATURES

This notification must be attached to the manifest for shipment.

Please attach waste analysis if available.

I believe that the information I submitted is true, accurate, and complete. I am aware that there are significant penalties for submitting false notification, including the possibility of a fine and imprisonment.

SECTION VI

UNRESTRICTED WASTE NOTIFICATION

I notify that I have personally examined and am familiar with the waste through analysis and testing or through knowledge of the waste and hereby certify, under penalty of law, that this waste is not restricted as specified in 40 CFR 268, Subpart D, and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA Section 3004(d).

SECTION VII

SIGNATURES

This notification must be attached to the manifest for shipment.

Please attach waste analysis if available.

I believe that the information I submitted is true, accurate, and complete. I am aware that there are significant penalties for submitting false notification, including the possibility of a fine and imprisonment.

12. SPECIAL INSTRUCTIONS: This manifest is to be used only for the transportation of hazardous waste from a generator to a transporter or a treatment, storage, and disposal facility (TSDF). It is not to be used for the transportation of non-hazardous waste, or for the transportation of hazardous waste from a TSDF to another TSDF.

13. I am a large quantity generator, and I hereby certify that the waste described in this manifest is hazardous waste as defined in 49 CFR 171.3, and that the waste is being transported in accordance with the requirements of 49 CFR 173.13. I am not a large quantity generator, and I hereby certify that the waste described in this manifest is not hazardous waste as defined in 49 CFR 171.3, and that the waste is being transported in accordance with the requirements of 49 CFR 173.13.

16. GENERATOR'S CERTIFICATION: I hereby declare that the contents of this consignment are fully and accurately described above by proper shipping name and are classified, packed, marked, and labeled, and are in all respects in proper condition for transport by highway according to applicable international and national government regulations.
I am a large quantity generator, I certify that I have a program in place to reduce the volume and toxicity of waste generated to the degree I have determined to be economically practicable and that I have selected the practicable method of treatment, storage, or disposal currently available to me which minimizes the present and future threat to human health and the environment; OR: if I am a small quantity generator, I have made a good faith effort to minimize my waste generation and select the best waste management method that is available to me and that I can afford.
