Re: Work Plan for Mallory Improvements Property
1005 Perkins Avenue, Waukesha, WI

Dear Mr. Ferguson:

This letter will confirm our telephone conversation today that also included Rick Smith and Bill Looney of McLaren/Hart Environmental Engineering Corporation. Specifically, we clarified the following items which were raised by your letter dated May 6, 1996.

1. We confirmed that the trenches will be excavated to 12 feet, unless native soil is encountered at a more shallow depth than 12 feet. In that case, the trenches will be excavated to native soil.
2. We confirmed that McLaren/Hart will stake out the trench locations for approval by Mike Ellenbecker, who will be on-site during the investigation work.
3. We confirmed that, as provided in the Work Plan, the excavated soil will be temporarily stored on a tarp adjacent to the trench and then will be returned to the trench at the completion of the excavation. You confirmed that the excavated soil is not subject to the Land Disposal Restrictions.

Finally, in order to avoid any confusion, although the Work Plan was submitted on behalf of Hein Werner by SECOR International, the personnel that we were working with at SECOR are now employed by McLaren/Hart Environmental. McLaren/Hart will be executing the Work Plan on behalf of Hein Werner. On behalf of Hein Werner, McLaren/Hart has initiated the investigation work by contacting subcontractors. We anticipate being on-site within
