Date stamped: April 24, 2007

Date reviewed: April 19, 2007

Name and description of site:

Shorewood Village/Queens Way Dry Clean
4300 North Oakland Avenue
Shorewood, WI

Who is submitting and for whom? (Consultant and client)

J Hnat, SER R&R for Queensway and the Village of Shorewood

What has been submitted?

Limited Soil Assessment in North Oakland Avenue Right-of-Ways, dated April 12, 1995

Description of contamination:

PCE soil contamination at 0.23 ppm at 1-3 feet bgs in a right-of-way sample.

Any references to other documents available, but not submitted?

No

What is being requested?

Change the ERP to NAR

Conclusions:

After review of the file, J Hnat in consultation with J Schmidt, SER Supervisor, decided to change the ERP file to NAR for the following reasons:

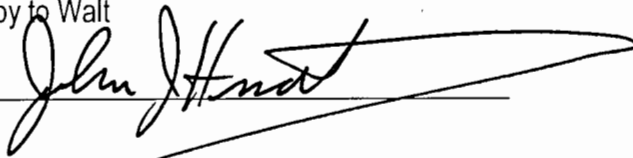

- The low concentration in the soil from 1-3 feet bgs in a right-of-way.
- The area is covered by concrete and asphalt.
- Thirteen years since a sample was taken.
- No reported spills or complaints

- PCE is below the screening level for ingestion and inhalation of volatiles, but above the soil to groundwater screening level of 0.041 ppm.
- The case will be reopened if and when additional information is received indicating a release from Queensway
