Subject: Long-Term Monitoring Plan Approval
Former Tecumseh Products, Former Plating Line
New Holstein, Wisconsin
BRRTS# 02-08-363333

Dear Mr. Harvey,

The Department has reviewed the June 21, 2017, *2017 Groundwater Monitoring Report* and the July 11, 2017 addendum to the report. Included in this report was a request and review fee of \$425 to approve a Long-Term Groundwater Monitoring Plan for the site. The Department APPROVES the groundwater monitoring plan described in these reports with the following conditions.

- That all work be performed as described unless otherwise noted in this letter.
- Groundwater monitoring location NH-7 is added to the annual monitoring schedule. This well exceeds the enforcement standard for total chromium and is located on the northern boundary of the groundwater plume.
- Groundwater monitoring locations MW-5, TEC-1, MW-24, and MW-F (at a minimum) should be sampled in the final sampling event prior to submittal of a case closure request.
- If groundwater contaminant trends in source area wells (TEC-3, TEC-4 and NH-26) do not allow for case closure after the 2019 sampling event, evaluation of additional remedial alternatives will need to be conducted to facilitate site closure.

If you have questions regarding this letter, please contact me at 920-424-7890 or kevin.mcknight@wisconsin.gov.

Sincerely,

Kevin D. McKnight
Hydrogeologist
