Subject: Remedial Action Options Report Review
Tecumseh Products Company, New Holstein WI
BRRTS# 02-08-363333

Dear Mr. Harvey and Mr. Smith:

On November 1st, 2019 the Department of Natural Resources (DNR) received a Remedial Action Options Report (RAOR) for the Tecumseh Products Company chromium line site in New Holstein WI. A review fee of \$1050 was also submitted with the RAOR. This RAOR was submitted in response to the DNR's July 10, 2019 letter documenting the review of the 2019 Groundwater Monitoring Report.

The DNR approves the RAOR for this site with the following conditions:

- That annual groundwater sampling as approved in the 2017 Long Term Groundwater Monitoring Plan be continued until the RAOR is implemented. Groundwater sample results are to be submitted to the DNR as required in Wis. Adm. Code § NR 716.14.
- Plans for cap replacement in accordance with the current cap maintenance plan(s) should be coordinated with and included in the City of New Holstein's building demolition and cap restoration plan.
- This approval may be reevaluated by the DNR if site conditions or development plans change.

If you have questions regarding this approval, please contact me at 920-424-7890 or by email at kevin.mcknight@wisconsin.gov.

Sincerely,

Kevin D. McKnight
Remediation and Redevelopment Program
