Subject: Review of Wis. Admin. Code § NR 724.15 Remedial Action Documentation Report  
Tecumseh Products Co - New Holstein, 1604 Michigan Avenue, New Holstein, WI  
BRRTS# 02-08-363333

Dear Mr. Smith:

On January 3, 2022 the Wisconsin Department of Natural Resources (DNR) received a report titled "Remedial Action Documentation Report" (RADR) from your consultant TRC. This report was submitted to meet the requirements of Wis. Admin. Code § NR 724.15 and included a \$350.00 review fee. On February 10, 2022, the DNR completed the review of this report and determined that it satisfactorily met the requirements of Wis. Admin. Code § NR724.15. This RADR documented remediation via chemical injection and soil mixing to treat hexavalent chromium in the north and south plating lines and chemical storage area.

This report did not include information regarding pre-remedial soil sampling requested by the DNR in the July 2, 2021 Remedial Action Plan (RAP) approval and the August 13, 2021 response to Tecumseh Products Companies questions regarding the RAP approval. Pre-remedial soil sampling results should be submitted to the DNR. If pre-remedial soil sampling was not performed, it should be discussed in the next project update report.

Based on the RAP approval, the first round of groundwater sampling should occur around May 2022 and submittal of a post-remedial soil sampling work plan for the mixing areas is required.

The DNR appreciates your efforts to remediate this site. Please contact me at 920-808-0170 or [kevin.mcknight@wisconsin.gov](mailto:kevin.mcknight@wisconsin.gov) if you have questions related to this letter.

Regards,

Kevin D. McKnight  
Hydrogeologist  
Remediation and Redevelopment Program
