

November 6, 2002

Scott Ferguson/Larry Fox
SE District Spill Coordinators

Here are some pictures giving you a more accurate location for the source of the product that is running into the westbound lane of Silver Spring Drive.

Your point of contact for Milwaukee County Highway DPW would be:

Brian at 257-6566. They discovered this and would meet you there if you desired.

North of the source is Silver Spring Road. It runs from North 118th street to 124th Street. Several companies and a vacant industrial site border the Road and their rear boundaries overlook Silver Spring Drive.

Thanks for the follow up.

- Was fill site -

West Silver Spring Drive, just east of North 124th Street between the railroad overpasses, looking Northwesterly. The water source is located about 30 feet from the curb directly behind the "No Parking" sign.

West Silver Spring Drive, just east of North 124th Street between the railroad overpasses, looking Northeasterly.

Shown here is a chemical spring emanating from the ground at the north side of West Silver Spring Drive, just east of North 124th Street between the railroad overpasses.
