Karen,

Thanks for the update, please let me know when you find out more. I started here in June, so I guess I'm still relatively new.

Paul

Paul,

The additional round of sampling was completed in May 2013. Due to some staff changes at Sigma, the data has not been reviewed. Kristin is now working on reviewing the data and will be submitting a proposal to me for additional work in the next couple weeks. I will keep you updated on our course of action when I receive the results.

I don't believe we've met – are you new to SE Region?

Thanks,
Karen

September 24, 2013

Subject: Request for Status Update
TRY-CHEM CORP site at 1333 W Pierce Street, Milwaukee, WI
WDNR FID #241078530; BRRTS # 02-41-409441

Dear Ms. Dettmer,

It has been a little over a year since the DNR has received any correspondence regarding the above site and is therefore requesting an update on recent environmental remediation activities. On June 11, 2012, the DNR received an e-mail stating that at least one more round of groundwater samples would be collected before applying for closure. Have additional samples been collected since that time? Are

any more sampling rounds planned, or is it anticipated that a request for closure will be made in the near future?

Any information you can provide regarding this case would be appreciated, thank you.
