Ms. Liz Lundmark
Murphy Oil U.S.A
PO Box 2066
Superior, WI 54880

Subject: Spill of 210 gallons of Crude Oil inside Tank 48 Berm
at the Murphy Oil Refinery, on June 26, 1999, Superior, Wisconsin

Dear Ms. Lundmark:

The purpose of this letter is to inform you of your legal responsibilities regarding the spill with which you are currently involved. Under State Law, section 292.11, Statutes, you must clean-up any contamination resulting from your spill to state standards. Because a hazardous substance has been discharged, you are responsible for restoring the environment.

The Hazardous Substance Spills Law, section 292.11(3), Wisconsin Statutes states:

"A person who possesses or controls a hazardous substance which is discharged or who causes the discharge of a hazardous substance shall take the actions necessary to restore to the environment to the extent practicable and minimize the harmful effects from the discharge to the air, lands, or waters of the state."

Required Actions:

As the responsible party of the discharge of a hazardous substance, you have the responsibility to assess the immediate impact of the discharge on human health and the environment and to act immediately to minimize these impacts. Furthermore, you must clean-up the discharge to acceptable State standards and take any other actions necessary to restore the environment to the extent practicable. Following the initial response and clean-up, if impacts of the discharge remain in the soils, water and/or groundwater, additional investigation and clean up may be required by the Department.

Spill clean-up should occur as quickly as possible to prevent extensive migration of the spill and also keep response, cleanup, and restoration costs from escalating. Clean-up progress should be reported to the Department on a regular basis as the clean-up occurs. **Within 30 days of the date of the letter**, return to the following address a **narrative clean-up summary, site map, copies of documents confirming the proper disposal of contaminated materials and/or soils, and any sample results which confirm contaminant removal.**

*Quality Natural Resources Management

RECEIVED

JUL 01 1999

DNR-SUPERIOR

Mr. James Hosch
Wisconsin Department of Natural Resources
1401 Tower Avenue
Superior, WI 54880

Dear Mr. Hosch:

Re: Release of Crude Oil

Murphy Oil USA, Inc. (Murphy), with this letter, is providing the Department written confirmation of the verbal notification given on June 26, 1999 of the release of crude oil into the dike area of tank 48 at its Superior refinery. Tank 48 is located within the refinery facility at 2407 Stinson Avenue, Superior, Wisconsin. The map coordinates for the refinery are NW1/4, NW1/4, Sect. 36, T 49N, R 14N.

On June 26, 1999 Murphy experienced a release of approximately 210 gallons of crude oil from tank 48 into its containment area. The release occurred as the result of an oil movements operator becoming distracted while carrying out other tank gauging duties which ultimately resulted in failure to meet the safe-fill timing for tank 48. All released crude oil remained inside the tank 48 containment dike.

Immediately upon discovery of the release Murphy began site remediation. The tank was secured and liquid crude oil, to the extent possible, recovered and transported to the slop oil treating system. Approximately 35 to 40 yards of visually contaminated soils were removed from a 40 ft x 40 ft area to a depth of approximately 8 inches. The soil was transported to Murphy's 3-sided contaminated soil storage building.

Field screening is expected to begin, next week, as soon as arrangements have been made with a contractor. Excavation of contaminated soil followed by confirmation that the site has been remediated will follow.

Mr. James Hosch
