Hi Brad,

The message right now is that additional PFAS sampling is not needed, but DNR cannot guarantee that no more sampling will be required due to this site being in VPLE and rules for PFAS are in flux.

Please let me know if you have any questions.

Thanks,
Josie

Josie,

Hope you are doing well. On the Gunderson-Neenah matter, I believe you mentioned in an email that you would need to get with your risk group and see if additional PFAS groundwater sampling was required. We are putting together costs to do the WDNR requested additional groundwater sampling and need to know if we need to include PFAS. If you could let me know I would appreciate it.

Thanks,

Brad K. Lewis, CHMM, Principal Scientist
