Got your message. There are 6 Geoprobe borings and also one of the monitoring well borings that we will also be sampling for Pb and PAH in the top four feet. It is the proposed MW located in the area between G-10, -12, & -16. Any questions let me know.

Thanks,

Jason Powell

Carrie, we have the Drilling Project scheduled for Feb. 5-6th and the Geoprobe Project scheduled for Feb. 20th or 21st. In going through the cost estimate one soil PAH and one soil Pb were removed from the deferment request and shouldn't have been as we will be short on laboratory analysis. Could you approve of those two samples (they are not blanks) and just an email confirmation is okay with us.

Thanks,

Jason Powell
