**Subject:** RE: Osceola Bulk Plant SOW adjustments

Eric said they were adding an additional 2' per well for five wells as there was ~4' of water in the first well. One of the borings got concrete refusal at 6' bgs and had to move. Also, because of the cold weather and having a hard time getting the drill rig started the work has gone into two extra days, thus we will need 2 additional consultant overnight per diems and 4 overnight per diems for the drill crew (2 additional nights for two crew members). Costs are as follows:

13a/DR05 – Drilling in Unconsolidated Soils w/sampling: 16 feet @ \$5.40/foot = \$86.40  
13d/DR45 – Drilling in Unconsolidated Soils w/sampling: 16 feet @ \$16.70/foot = \$267.20  
14/MWi10 – Monitoring Well Installation (26-75 ft bgs): 10 feet @ \$2.73/foot = \$27.30  
14/MWi15 – Monitoring Well Installation: 10 feet @ \$16.70/foot = \$167.00  
15/MDT25 – Commodity Service Provider Per Diem: 2 people/2nights @ \$203.28/night = \$813.12  
31/COPD05 – Consultant Overnight: 2 nights @ \$113.72 = \$227.44

**Total Additional Costs: \$1,588.46**

Any questions please call or email.  
Thanks,

### Jason Powell

Hi Jason. Larry has called me from the field (2/5 & 2/6) to let me know that he has extended the wells an extra 10' to ensure there will be water. I don't know how many wells though. He also stated he was approved for 1 per diem and will need 2 more due to cold and time he needs to develop wells. I am ok with this also. I just need a cost request from you and then I will let Chris know and will put a note in Tracker. If you have any questions, let me know. Thanks to Larry for being so "Johnny-on-the-spot! Have a great day! Carrie
