Subject: Documentation Report for Management of Contaminated Soil  
USH 51 – Wisconsin & Dewitt Streets, Ontario Street to E. Pleasant Street  
Portage, Columbia County, Wisconsin  
WisDOT ID #6918-01-72

Dear Ms. Reynolds:

Enclosed is the Documentation Report for Management of Contaminated Soil for the USH 51 – Wisconsin & Dewitt Streets, Ontario Street to E. Pleasant Street project in Portage, Wisconsin. TRC recommends that the WisDOT take no further action to investigate or remediate soil or groundwater impacts that may remain at the investigated sites or within the construction project limits.

Feel free to contact me at (608) 347-2022, or Dan Haak at (608) 826-3628, if you have any questions.

Sincerely,

TRC

Tom Perkins  
Project Engineer

Dan Haak, P.E.  
Project Manager

## Executive Summary

The WisDOT has completed reconstruction of USH 51 (Wisconsin & Dewitt Streets, Ontario Street to E. Pleasant Street) in Portage, Columbia County, Wisconsin (WisDOT ID #6918-01-72). The WisDOT retained TRC Environmental Corporation (TRC) to provide environmental construction management services for this project. In accordance with the Special Provisions for the Management and Disposal of Contaminated Soil, TRC provided construction oversight services, including the field-screening of soil potentially contaminated with petroleum, chlorinated volatile organic compounds (CVOCs), and/or metals, and the documentation of contaminated soil and groundwater management at the following sites:

### Petroleum Contamination

- **Site 8 (Mael Estate – Triangle Property, 100 Edgewater St.)** - The entire parcel described as Station 102+00WI to 103+50WI from reference line to limits on LT, and from 538+30DE to 539+10DE from limits on RT to limits on LT
- **Wisconsin St./USH 51**
  - **Sites 5 and 7** - Station 99+25WI to 100+75WI, from limits on RT to limits on LT
  - **Sites 8, 11, 12, 13, 14, and 24** - Station 102+50WI to 107+75WI, from limits on RT to limits on LT
  - **Site 15** - Station 111+00WI to 111+75WI, from reference line to limits on LT
  - **Site 19** - Station 116+00WI to 117+25WI, from reference line to limits on RT
  - **Site 21** - Station 143+00WI to 144+60WI, from reference line to limits on LT
- **Edgewater St.**
  - **Sites 4 and 5** - West limit to Wisconsin St./USH 51 intersection, from limits on RT to limits on LT
  - **Sites 7 and 8** - Current Dewitt St. intersection to 100 feet west, from limits on RT to limits on LT
- **Dewitt St.**
  - **Site 3** - Station 546+50DE to 547+75DE, from 15 feet from limits on LT to centerline
  - **Site 8** - Current ROW along Site 8, from west limits to centerline

### CVOCs Contamination

- **Sites 11 and 24** - Station 103+00WI to 107+75WI, from limits on RT to limits on LT

### Metals Contamination

- **Site 24** - Station 102+50WI to 103+00WI, from center to limits on RT, and all sediment within the Portage Canal

TRC personnel were on site multiple dates from March 24, 2021, through August 4, 2021, to observe the highway contractor (A-1 Excavating, Inc.) during highway reconstruction and to field-screen potentially contaminated soil. Petroleum-contaminated soil was encountered during

construction at various depths at Sites 15, 19, and 21. CVOCs- and metals-contaminated soil was encountered at Sites 11 and 24.

Contaminated soil was transported off site for landfill disposal. A total of 625 tons of petroleum-contaminated soil was transported to Waste Management's Deer Track Park Landfill in Watertown, Wisconsin for treatment and disposal. A total of 556.04 tons of CVOCs- and metals-contaminated soil were transported to Waste Management's Madison Prairie Landfill in Sun Prairie, Wisconsin for disposal. Low-level contaminated soil (PID<10 ppm) was beneficially reused as backfill on site where applicable.

One underground storage tank (UST) was encountered in the Dewitt Street ROW during construction. The UST was abandoned with oversight provided by TRC, and was documented in an abandonment report previously submitted to the WDNR.

Groundwater, if encountered, did not require removal during construction in areas of potential contamination.

On the basis of the findings of the field observations, field-screening results, and information included in the Special Provisions, TRC recommends that the WisDOT take no further action to investigate or remediate soil or groundwater impacts that may remain at the investigated sites or within the construction project limits.

## 1.0 Introduction

### 1.1 Background

The WisDOT has completed reconstruction of USH 51, from Ontario Street to E. Pleasant Street in Portage, Columbia County, Wisconsin (WisDOT ID #6918-01-72). The WisDOT retained TRC to provide construction oversight and to document the management of contaminated soil and groundwater for this project. Appendix A includes select highway construction plans relevant to this report. The project location is shown on Figure 1.

KL Engineering completed a Phase I HMA for the project corridor in April 2017 (KL Engineering, 2017). The Phase 1 HMA investigated twenty-four sites for potential hazardous materials. TRC supplemented the Phase 1 report information with a WDNR file review to obtain additional information regarding soil & groundwater contamination, tank locations, cap maintenance plans, etc.

Based on the Phase I HMA and supplemental WDNR file review, TRC completed a Phase 2.5/3 Investigation of the WisDOT USH 51 reconstruction project corridor in August of 2017 to identify and determine the nature and extent of soil and groundwater contamination within construction limits of the project. A report summarizing the investigation results was submitted to the WDNR on October 31, 2017 (TRC, 2017a). A revised report was submitted to the WDNR on June 27, 2018, following WDNR comments (TRC, 2018).

Based on the results of the previous reports and the WisDOT construction plans, the following areas for the WisDOT ID #6918-01-72 project were identified as potentially containing contaminated soil, and included in the contract environmental Special Provisions:

#### **Petroleum Contamination**

- **Site 8 (Mael Estate – Triangle Property, 100 Edgewater St.)** - The entire parcel described as Station 102+00WI to 103+50WI from reference line to limits on LT, and from 538+30DE to 539+10DE from limits on RT to limits on LT
- **Wisconsin St./USH 51**
  - **Sites 5 and 7** - Station 99+25WI to 100+75WI, from limits on RT to limits on LT
  - **Sites 8, 11, 12, 13, 14, and 24** - Station 102+50WI to 107+75WI, from limits on RT to limits on LT
  - **Site 15** - Station 111+00WI to 111+75WI, from reference line to limits on LT
  - **Site 19** - Station 116+00WI to 117+25WI, from reference line to limits on RT
  - **Site 21** - Station 143+00WI to 144+60WI, from reference line to limits on LT
- **Edgewater St.**
  - **Sites 4 and 5** - West limit to Wisconsin St./USH 51 intersection, from limits on RT to limits on LT
  - **Sites 7 and 8** - Current Dewitt St. intersection to 100 feet west, from limits on RT to limits on LT

- **Dewitt St.**
  - **Site 3** - Station 546+50DE to 547+75DE, from 15 feet from limits on LT to centerline
  - **Site 8** - Current ROW along Site 8, from west limits to centerline

### CVOCs Contamination

- **Sites 11 and 24** - Station 103+00WI to 107+75WI, from limits on RT to limits on LT

### Metals Contamination

- **Site 24** - Station 102+50WI to 103+00WI, from center to limits on RT, and all sediment within the Portage Canal

The WDNR provided concurrence with the Special Provisions on July 30, 2018. The Special Provisions prepared for the management of contaminated soil and groundwater along with the WDNR concurrence letter are included in Appendix B.

In 2020, the City of Portage completed street and utility improvements for portions of USH 51 (Wisconsin & Dewitt Streets) and Thompson Street that coincided with this project. A documentation report was provided to the WDNR by TRC on December 18, 2020, which summarized the management of contaminated soil by the City of Portage and their construction contractor during these utility improvements (TRC, 2020)

## 1.2 Purpose and Scope

The purpose of this report is to document the results of field observations and field-screening of soil samples during the USH 51 reconstruction project (WisDOT ID 6918-01-72).

## 2.0 Field Summary

TRC observed the highway contractor, A-1 Excavating, Inc. (A-1), during construction within areas identified in the Special Provisions as potentially containing contaminated soil and groundwater. TRC provided oversight for the management of contaminated soil encountered during construction. A photographic log is included in Appendix C.

### 2.1 Cap Modification

A post-closure cap consisting of buildings and paved areas was in place at each of the following closed BRRTS sites:

- **Site 7 (Mael Estate Property)** – 109 Edgewater St., BRRTS #03-11-168416
- **Site 19 (Crawford 66)** – 416 E. Wisconsin St., BRRTS #03-11-002155
- **Site 24 (Portage Canal)** - BRRTS #02-11-543021

WisDOT project construction activities within the cap extents required post closure modification of the cap. TRC submitted a Post Closure Modification Notification for the properties on October

31, 2017 (TRC, 2017b). The WDNR approved the cap modifications on December 4, 2017 (Appendix B). The existing cap materials at these sites were replaced with in-kind materials. Post-construction cap photographs are provided in Appendix C.

## **2.2 Soil Screening**

TRC personnel were on site multiple days between March 24, 2021, and August 4, 2021, to field-screen soil excavated for USH 51 reconstruction at Wisconsin, Dewitt, and Thompson Streets, as identified in the Special Provisions. TRC personnel field-screened soil based on data from previous investigations, visual observations, odor, and through the use of a PID. Evidence of contaminated soil was observed at various depths during the construction of stormwater utility at Site 15, Site 19, and Site 21. Based on previous investigation results and field observations, soil contaminated with CVOCs and/or metals was encountered during construction at Site 11 and Site 24. Field-screening results are included in Table 1 and contaminated soil extents are shown on Figures 2-1 to 2-4.

### **2.2.1 Site 3**

TRC personnel were on-site on March 24, 2021, to field-screen soil excavated for storm sewer installation within the limits of Site 3, as described in the Special Provisions. Petroleum-contaminated soil was not encountered during construction. Field-screening results can be found in Table 1.

### **2.2.2 Site 4, 5, 7, 8**

TRC personnel were on site multiple days from June 25, 2021 to June 28, 2021, to field-screen soil excavated for storm sewer installation and road grading work within the limits of Site 5, Site 7, and Site 8, as described in the Special Provisions. Petroleum-contaminated soil was not encountered during construction. Field-screening results can be found in Table 1. Storm sewer utility construction was not required within the limits of Site 4.

### **2.2.3 Site 11**

TRC personnel were on site on multiple dates between May 24, 2021 and July 7, 2021, to field-screen soil excavated for storm sewer installation and road grading work within the limits of Site 11, as described in the Special Provisions.

On May 24 and 25, 2021, soil samples SS-A, SS-B, and SS-C were collected from the base of the storm sewer excavation. Soil analytical results showed PCE concentrations in SS-B and SS-C that exceeded the NR 720 Soil Groundwater Pathway RCL. Soil sampling results are summarized in Table 2 and compared to NR 720 Soil RCLs. Cumulative Hazard Index and Cancer Risk values are provided in Table 2. Laboratory analytical reports are included in Appendix E.

On June 23, 2021, the highway contractor completed stormsewer construction in the eastbound lane of USH 51 within Site 11 limits, prior to notifying TRC. This included the installation of Catch Basin 4.21 and associated piping to the previously installed Catch Basin 4.23. A portion of the soil that was excavated during construction was beneficially reused in place. According to the highway contractor, an estimated 4 tons of potentially impacted material was transported to a City of Portage fill site. On June 25, 2021, TRC personnel were on site to oversee the highway

contractor install a test pit immediately south of catch basin 4.21, between the structure and the site source area. The test pit was excavated to the depth of the catch basin (approximately 8 ft bgs) and soil samples were collected from the excavation base directly south of the catch basin (SAMPLE-1), from the sidewall south of the catch basin (SAMPLE-2), from the sidewall west (SAMPLE-3), and the sidewall east (SAMPLE-4) in order to characterize the soil that had been previously excavated and transported off site. Soil analytical results showed PCE concentrations in SAMPLE-1, SAMPLE-2, and SAMPLE-3 that exceeded the NR 720 Soil Groundwater Pathway RCL. Soil sampling results are summarized in Table 2 and compared to NR 720 Soil RCLs. Cumulative Hazard Index and Cancer Risk values are provided in Table 2. Laboratory analytical reports are included in Appendix E.

On June 28, 2021, the highway contractor installed three test pits to approximately 2 ft bgs along the south side of USH 51 at Site 11. TRC personnel collected one sample from the base of each test pit for waste characterization prior to grading activities in the area. The maximum required depth for grading was up to 1.5 ft bgs. Based on previous investigation results, soil samples were analyzed for TCLP VOCs and TCLP Lead. Analytical results indicated that soil within the Site 11 limits at the required depth interval for surface grading contained non-hazardous concentrations of PCE. Therefore, all soil excavated for surface grading within the Site 11 limits was disposed by landfill as non-hazardous waste. Soil sampling results are provided in the laboratory analytical reports in Appendix E. A total of 88.39 tons of contaminated soil was excavated for grading purposes from Site 11 and was transported to Waste Management's Madison Prairie Landfill in Madison, Wisconsin, for treatment and disposal. Disposal documentation is included in Appendix D. Field-screening results can be found in Table 1. Contaminated soil extents and soil sample locations are shown on Figure 2-1.

#### **2.2.4 Site 12, 13, 14**

Based on previous investigations and prior utility construction conducted by the City of Portage in 2020, it was determined that soil contamination was only present in areas at or below the water table at Site 12, Site 13, and Site 14. Based on the location and the depth of storm sewer utility installation (above the groundwater table), it was anticipated that the highway contractor would not encounter contaminated soil or groundwater at Site 12, Site 13, or Site 14 during construction. TRC personnel maintained communication with the highway contractor during construction within the Site limits to confirm all utility construction was conducted above the groundwater table and that no evidence of soil contamination was encountered during construction at these areas.

#### **2.2.5 Site 15**

TRC personnel were on site on June 2, 2021, to field-screen soil excavated for storm sewer installation within the limits of Site 15, as described in the Special Provisions. Petroleum-contaminated soil was encountered during construction. Field-screening results can be found in Table 1 and contaminated soil extents are shown on Figure 2-2. A total of 329.99 tons of petroleum-contaminated soil were excavated during utility construction at Site 15 and transported to Waste Management's Deer Track Park Landfill in Watertown, Wisconsin, for treatment and disposal. Disposal documentation is included in Appendix D.

### **2.2.6 Site 19**

TRC personnel were on site on June 29, 2021, to field-screen soil excavated for storm sewer installation within the limits of Site 19, as described in the Special Provisions. Petroleum-contaminated soil was encountered during construction. Field-screening results can be found in Table 1 and contaminated soil extents are shown on Figure 2-3. A total of 93.51 tons of petroleum-contaminated soil were excavated during utility construction at Site 15 and transported to Waste Management's Deer Track Park Landfill in Watertown, Wisconsin, for treatment and disposal. Disposal documentation is included in Appendix D.

### **2.2.7 Site 21**

TRC personnel were on site on August 4, 2021, to field-screen soil excavated for surface grading within the limits of Site 21, as described in the Special Provisions. Contaminated soil was encountered during construction by the highway contractor, prior to notifying TRC. Contaminated soil was stockpiled for field-screening by TRC personnel. Field-screening results can be found in Table 1 and contaminated soil extents are shown on Figure 2-4. A total of 119.34 tons of petroleum-contaminated soil were excavated during utility construction at Site 21 and transported to Waste Management's Deer Track Park Landfill in Watertown, Wisconsin, for treatment and disposal. Disposal documentation is included in Appendix D.

### **2.2.8 Site 24**

TRC personnel were on site on multiple days between June 8, 2021 and June 15, 2021, to field-screen soil excavated for the installation of a culvert below Wisconsin Street and DeWitt Street at the Portage Canal (Site 24). Based on previous investigations, it was determined that sediment from the canal is contaminated with metals. Additionally, it was determined that some soils at the site are contaminated with CVOCs and metals. All sediment excavated from the canal during construction was considered contaminated with CVOCs and metals and was handled as such. Additionally, TRC personnel visually identified impacted soils during construction. Impacted soils along with sediment excavated from the canal was transported to the landfill for disposal. A total of 556.04 tons of metals-contaminated soil were excavated during utility construction at Site 24 and transported to Waste Management's Madison Prairie Landfill in Madison, Wisconsin, for treatment and disposal. Disposal documentation is included in Appendix D. During excavation, TRC personnel periodically field-screened soil and sediment. PID readings from soil and sediment excavated during excavation at the Portage canal were less than 1 ppm. Contaminated soil extents are shown on Figure 2-2.

A total of 625 tons of petroleum-contaminated soil was transported to Waste Management's Deer Track Park Landfill in Watertown, Wisconsin, for treatment and disposal. A total of 556.04 tons of CVOCs- and metals-contaminated soil were transported to Waste Management's Madison Prairie Landfill in Sun Prairie, Wisconsin, for disposal. Landfill disposal documentation is included in Appendix D.

## **2.3 Groundwater Contamination**

Groundwater, if encountered, did not require removal during construction in areas of potential contamination.

## 2.4 Underground Storage Tank Removal

One UST was encountered in the DeWitt Street ROW during construction and was abandoned by removal with oversight provided by TRC on March 29, 2021. 82.16 tons of petroleum-contaminated soil was excavated from the area surrounding the UST and was treated/disposed at Waste Management Deer Track Park Landfill in Watertown, Wisconsin. The abandonment of the UST was summarized in TRC's Underground Storage Tank Abandonment Report submitted to the WDNR on June 11, 2021 (TRC, 2021).

## 3.0 Conclusions and Recommendations

TRC's field observations and field-screening results indicate the following:

- A total of 542.84 tons of petroleum-contaminated soil was transported from excavations at Site 15, Site 19, and Site 21 to Waste Management's Deer Track Park Landfill in Watertown, Wisconsin for treatment and disposal (Appendix D).
- A total of 556.04 tons of CVOCs- and metals-contaminated soil was transported from excavations at Site 11 and Site 24 to Waste Management's Madison Prairie Landfill in Sun Prairie, Wisconsin for disposal (Appendix D).
- Low-level contaminated soil encountered during construction was beneficially reused on site as backfill and capped by impervious material at various locations.
- Groundwater, if encountered, did not require removal during construction in areas of potential contamination.
- One UST was encountered in the DeWitt Street ROW during construction and was abandoned by removal with oversight provided by TRC. A total of 82.16 tons of petroleum-contaminated soil was excavated from the area surrounding the tank and transported to Waste Management's Deer Track Park Landfill in Watertown, Wisconsin for treatment and disposal (Appendix D)

On the basis of the results of field observations and field-screening of soil samples, the WisDOT managed contaminated soil in accordance with the Special Provisions during reconstruction of USH 51 (Wisconsin & Dewitt Streets, Ontario Street to E. Pleasant Street) in Portage, Columbia County, Wisconsin (WisDOT ID #6918-01-72). TRC recommends the WisDOT take no further action to investigate or remediate the contaminated sites.

Notes:

- 1 PID = Photoionization Detector
- 2 VOCs = Volatile Organic Compounds
- 3 TCLP = Toxicity Characteristic Leaching Procedure
- 4 VOCs and TCLP VOCs analyzed using method EPA 8260
- 5 µg/kg = micrograms per kilogram (ppb).
- 6 mg/kg = milligrams per kilogram (ppm)
- 7 Samples were collected by TRC and analyzed by Pace Analytical (WDNR Cert. #405132750)
- 8 - = Standard not established.
- 9 -- = Not analyzed
- 10 J = Result is less than the reporting limit but greater than or equal to the method detection limit and the concentration is an approximate value
- 11 RCLs = Residual Contaminant Levels.
- 12 *Italics* = indicates that the analyte exceeds the groundwater pathway RCL and BTV (if established)
- 13 **Bold** = indicates that the analyte and/or sample exceeds the NR 720 RCL for direct contact (non-industrial or industrial) and BTV (if established).

Footnotes:

- (1) Value is the generic RCL for the groundwater pathway.
- (2) Value is the generic RCL for exposure by direct contact.
- (3) RCLs from the Wisconsin DNR's NR 720 RCL Spreadsheet (December 2018 update) found here: <https://dnr.wi.gov/topic/Brownfields/soil.html>.
- (4) Background threshold value (BTV) was taken from the Wisconsin DNR's NR 720 RCL spreadsheet.
- (5) Only analytes detected in at least one sample are shown in the table.

## **Appendix B: Special Provisions and WDNR Concurrence**

below the theoretical pay limits. All work beyond the theoretical pay limits is incidental to the cost of work. The department will make no allowance for as-built quantities.

### **E Payment**

The department will pay for accepted measured quantities at the contract unit price under the following bid item:

ITEM NUMBER	DESCRIPTION	UNIT
SPV.0165.01	Wall Modular Block Mechanically Stabilized Earth (Levee Connection #1)	SF
SPV.0165.02	Wall Modular Block Mechanically Stabilized Earth (Levee Connection #2)	SF

Payment is full compensation for supplying a design and shop drawings; preparing the site, including all necessary excavation and disposal of materials; supplying all necessary wall components to produce a functional wall system including cap, copings, leveling pad, and leveling pad steps; constructing the retaining system and providing temporary drainage; providing backfill, backfilling, compacting, developing/completing/documenting the quality management program, and performing compaction testing.

The department will pay separately for parapets, traffic barriers, railings, and other items above the wall cap or coping.

## **72. Concrete Sidewalk Thickened Edge, Item SPV.0165.03.**

### **A Description**

Perform work according to the applicable provisions of standard spec 504 and as detailed in the plans.

### **B (Vacant)**

### **C (Vacant)**

### **D Measurement**

The department will measure Concrete Sidewalk Thickened Edge by the square foot, acceptably completed.

### **E Payment**

The department will pay for measured quantities at the contract unit price under the following bid item:

ITEM NUMBER	DESCRIPTION	UNIT
SPV.0165.03	Concrete Sidewalk Thickened Edge	SF

Payment is full compensation for providing all materials, including all concrete and steel reinforcement; for all excavating, for backfilling, disposing of surplus material, and for cleaning out and restoring the work site.

## **73. Sidewalk Vault Closure, Item SPV.0165.04.**

### **A Description**

This special provision describes constructing a concrete masonry retaining wall (if necessary and directed by the engineer) and completely filling the existing vault opening with Backfill Granular as directed by the engineer.

### **B Materials**

Concrete Masonry Retaining Wall shall meet the requirements of standard spec 504.2.

Backfill Granular shall meet the requirements of standard spec 209.2.

### **C Construction**

Construction of concrete masonry retaining wall (if necessary and directed by the engineer) is according to standard spec 504.3. If the engineer determines that a concrete masonry retaining wall is not required, fill the existing vault opening with Backfill Granular.

Construction of Backfill Granular is according to standard spec 209.3.

## D Measurement

The department will measure Sidewalk Vault Closure by the square foot, acceptably completed.

## E Payment

The department will pay for measured quantities at the contract unit price under the following bid item:

ITEM NUMBER	DESCRIPTION	UNIT
SPV.0165.04	Sidewalk Vault Closure	SF

Payment is full compensation for furnishing and installing the Concrete Masonry Retaining Wall (if necessary and directed by the engineer), for waterproofing membrane painting on all exposed foundation wall surfaces and for furnishing all labor, tools, equipment and incidentals necessary to complete the work. Removing Sidewalk and the Backfill Granular of the vault shall be paid for separately under the respective bid items.

## 74. Excavation, Hauling, and Disposal of Contaminated Soil (Bioremediation), Item SPV.0195.01; Excavation, Hauling, and Disposal of Contaminated Soil (Direct landfill), Item SPV.0195.02.

### A Description

#### A.1 General

This special provision describes excavating, segregating, loading, hauling, and disposing of contaminated soil, sediment, and groundwater. Contaminated groundwater shall be disposed of in the City of Portage sanitary sewers. Contaminated soil and sediment shall be disposed of at a WDNR-licensed facility. The closest WDNR-licensed facilities are:

Waste Management Madison Prairie Landfill  
6002 Nelson Road  
Sun Prairie, WI 53590

Advanced Disposal - Madison  
300 Raemisch Road  
Waunakee, WI 53597

Perform this work according to standard spec 205 and with pertinent parts of Chapters NR 700-754 of the Wisconsin Administrative Code, as supplemented herein. Per NR 718.07, a solid waste collection and transportation service-operating license is required under NR 502.06 for each vehicle used to transport contaminated soil.

Prior to transport, sufficiently dewater soils and sediments so as not to contain free liquids.

This special provision also describes pumping and disposing of contaminated groundwater (if dewatering is necessary) to the sanitary sewers for treatment at the City of Portage Wastewater Treatment Facilities. Contaminated water encountered, but not requiring removal as a standard course of construction, shall remain in-place and shall not be managed according to this special provision.

Perform all work necessary to control, handle, and dispose of groundwater and surface water, and all other water that may be encountered within contaminated areas, as required for performance of the work. Perform this work according to standard spec 205 and with all local and state regulations, including, but not limited to, pertinent parts of the:

- Wisconsin Administrative Code, Chapters NR 100-299,
- Wisconsin Statutes, Chapters 30 and 31,
- Erosion Control Implementation Plan (ECIP), and
- WDNR Technical Standards, Sediment Control Water Application of Polymers No. 1051, Dewatering No. 1061, Sediment Trap No. 1063, and Sediment Basin No. 1064.

## A.2 Notice to the Contractor – Contaminated Soil & Sediment Locations

The department completed testing for soil, sediment, and groundwater contamination within this project where excavation is required. Testing indicated that contaminated soil, sediment, and/or groundwater is present at the following locations:

### Petroleum Contamination

- **Site 8 (Mael Estate – Triangle Property, 100 Edgewater St.)** – The entire parcel described as Station 102+00WI to 103+50WI from reference line to limits on LT, and from 538+30DE to 539+10DE from limits on RT to limits on LT.
- Wisconsin St./USH 51
  - **Sites 5 and 7** - Station 99+25WI to 100+75WI, from limits on RT to limits on LT
  - **Sites 8, 11, 12, 13, 14, and 24** - Station 102+50WI to 107+75WI, from limits on RT to limits on LT
  - **Site 15** - Station 111+00WI to 111+75WI, from reference line to limits on LT
  - **Site 19** - Station 116+00WI to 117+25WI, from reference line to limits on RT
  - **Site 21** - Station 143+00WI to 144+60WI, from reference line to limits on LT
- Edgewater St.
  - **Sites 4 and 5** - West limit to Wisconsin St./USH 51 intersection, from limits on RT to limits on LT
  - **Sites 7 and 8** - Current Dewitt St. intersection to 100 feet west, from limits on RT to limits on LT
- Dewitt St.
  - **Site 3** - Station 546+50DE to 547+75DE, from 15 feet from limits on LT to centerline.
  - **Site 8** - Current right-of-way along Site 8, from west limits to centerline.

### Chlorinated Compound Contamination

- **Wisconsin St./USH 51**
  - **Sites 11 and 24** - Station 103+00WI to 107+75WI, from limits on RT to limits on LT.

### Metals Contamination

- **Site 24** – Station 102+50WI to 103+00WI, from center to limits on RT, and all sediment within the Portage Canal.

Groundwater contamination with petroleum and chlorinated compounds at concentrations exceeding the Enforcement Standards identified in s. NR 140.10 Wisconsin Administrative Code and/or exceeding the Effluent Limits of the Wisconsin Department of Natural Resources General Permit to Discharge Under the Wisconsin Pollutant Discharge Elimination System, Contaminated Groundwater from Remedial Action Operations Permit, are likely to be encountered during excavation activities.

Contaminated soil, sediment, groundwater, and/or underground storage tanks (USTs) may be encountered at other locations within the construction limits. If contaminated soil, sediment, groundwater, and/or USTs are encountered elsewhere on the project, terminate excavation activities in the area and notify the engineer. If petroleum film or odors are observed during dewatering activities at other locations on the project, terminate dewatering activities and notify the engineer. Contaminated soil, sediment, and/or groundwater at other locations shall be managed by the contractor under this contract, under direction of the engineer and the environmental consultant. USTs will be removed by others.

For further information regarding previous investigation and remediation activities at these sites contact:

Name: Brian Taylor  
Wisconsin DOT, Southwest Region  
Address: 2101 Wright St.  
Madison, WI 53704-2559  
Phone: (608) 245-2630  
E-mail: [BrianF.Taylor@dot.wi.gov](mailto:BrianF.Taylor@dot.wi.gov)

Name: Dan Haak  
TRC Environmental Corporation  
Address: 708 Heartland Trail, Suite 3000  
Madison, WI 53717  
Phone: (608) 826-3628  
Fax: (608) 886-7423  
E-mail: [dhaak@trcsolutions.com](mailto:dhaak@trcsolutions.com)

### **A.3 Coordination**

Coordinate work under this contract with the environment consultant retained by the department:

Consultant: TRC Environmental Corporation  
Address: 708 Heartland Trail, Suite 3000, Madison, WI 53717  
Fax: 608-826-3941  
Contact: Dan Haak  
Phone: (608) 826-3628 office, (608) 886-7423 mobile  
E-mail: [DHaak@trcsolutions.com](mailto:DHaak@trcsolutions.com)  
Contact: Alia Schroeder  
Phone: (608) 826-3646 office, (608) 572-3845 mobile  
E-mail: [ASchroeder@trcsolutions.com](mailto:ASchroeder@trcsolutions.com)

The role of the environmental consultant will be limited to:

1. Determining the location and limits of contaminated soil, sediment, and groundwater based on analytical results from previous investigations, visual observations, and field screening of soil and sediment that is excavated;
2. Identifying contaminated soils and sediments to be hauled to the bioremediation and landfill facilities and contaminated groundwater to be pumped into the sanitary sewer;
3. Documenting that activities associated with management of contaminated soil, sediment, and groundwater are in conformance with the contamination management methods for this project as specified herein; and
4. Obtaining the necessary approvals for disposal of contaminated soil and sediment from the bioremediation and disposal facilities.

Provide at least a 14-calendar day notice of the preconstruction conference date to the environmental consultant. At the preconstruction conference, provide a schedule for all excavation activities in the areas of contamination to the environmental consultant. Also, notify the environmental consultant at least 3 calendar days prior to commencement of excavation activities in each of the contaminated areas.

Identify the WDNR-licensed bioremediation and disposal facilities that will be used for disposal of contaminated soil and sediment and provide this information to the environmental consultant no later than 30 calendar days prior to commencement of excavation activities in the contaminated areas or at the preconstruction conference, whichever comes first. The environmental consultant will be responsible for obtaining the necessary approvals for disposal of contaminated soil and sediment from the bioremediation and disposal facilities.

Coordinate with the environmental consultant to ensure that the environmental consultant is present during excavation and dewatering activities in the contaminated areas. Perform excavation work in each of the contaminated areas on a continuous basis until excavation work is completed. Do not pump or haul contaminated groundwater offsite without specific approval from the environmental consultant. Do not transport contaminated soil or sediment offsite without prior approval from the environmental consultant.

### **A.4 Protection of Groundwater Monitoring Wells**

Groundwater monitoring wells may be present within the construction limits. Protect all groundwater monitoring wells to maintain their integrity. Adjust wells that do not conflict with utilities, structures, curb and gutter, etc. to be flush with the final grade. For wells that conflict with the previously mentioned items, notify the environmental consultant, and coordinate with the environmental consultant for the abandonment or adjustment of the wells by others. The environmental consultant will provide maps indicating the locations of all known monitoring wells, if requested by the contractor.

Coordinate with the environmental consultant to ensure that the environmental consultant is present to abandon and/or document the location of the groundwater monitoring wells during excavation activities.

## **A.5 Excavation Management Plan Approval**

The excavation management plan for this project has been designed to minimize the off-site disposal of contaminated material. The excavation management plan, including these special provisions, has been developed in cooperation with the WDNR. The WDNR's concurrence letter is on file at the Wisconsin Department of Transportation. For further information regarding the investigations, including waste characterization within the project limits, contact Brian Taylor with the department, at (608) 245-2630.

## **A.6 Health and Safety Requirements for Workers Remediating Contamination**

*Supplement standard spec 107.1 with the following:*

During excavation and dewatering activities, expect to encounter soil and groundwater contaminated with petroleum products; soil and groundwater contaminated with chlorinated compounds; and sediment contaminated with metals. Site workers taking part in activities that will result in the reasonable probability of exposure to safety and health hazards associated with hazardous materials shall have completed health and safety training that meets the Occupational Safety and Health Administration (OSHA) requirements for Hazardous Waste Operations and Emergency Response (HAZWOPER), as provided in 29 CFR 1910.120.

Prepare a site-specific Health and Safety Plan, and develop, delineate and enforce the health and safety exclusion zones for each contaminated site location as required by 29 CFR 1910.120. Submit the site-specific health and safety plan and written documentation of up-to-date OSHA training to the engineer prior to the start of work.

Disposal of contaminated soil and sediment at the bioremediation and landfill facilities is subject to the facilities' safety policies.

## **B (Vacant)**

## **C Construction**

*Supplement standard spec 205.3 with the following:*

Control operations in the contaminated areas to minimize the quantity of contaminated soil and sediment excavated. Ensure that excavations do not extend beyond the minimum required to construct utilities and highway improvements unless expressly directed to do so by the engineer.

The environmental consultant will periodically evaluate soil excavated from the contaminated areas to determine if the soil will require offsite disposal. The environmental consultant will evaluate excavated soil based on field screening results, visual observations, and soil analytical results from previous environmental investigations. Assist the environmental consultant in collecting soil samples for evaluation using excavation equipment. The sampling frequency shall be a maximum of one sample for every 20 cubic yards excavated.

On the basis of the results of such field-screening, the material will be designated for disposal as follows:

- Excavation Common consisting of clean soil and/or clean construction and demolition fill (such as clean soil, boulders, concrete, reinforced concrete, bituminous pavement, bricks, building stone, and unpainted or untreated wood), which under NR 500.08 are exempt materials, or
- Low-level contaminated material (for petroleum-contaminated, PID readings less than 10 ppm for and no observation of staining or odor; for chlorinated compound-contaminated, identified based on laboratory detection) for reuse as fill within the construction limits as allowed, or
- Significant petroleum-contaminated soil (significant petroleum odor, staining, and/or PID readings greater than 10 ppm) for off-site bioremediation and disposal at the WDNR-licensed bioremediation facility, or
- Significant chlorinated compound-contaminated soil and metals-contaminated soil and sediment (identified based on laboratory detection) for off-site direct disposal at the WDNR-licensed disposal facility, or
- Potentially contaminated for temporary stockpiling and additional characterization prior to disposal.

Some material may require additional characterization prior to disposal. Provide for the temporary onsite stockpiling of up to 100 cubic yards of contaminated soil or sediment that require additional characterization. Construct and maintain a temporary stockpile of the material according to NR 718.05(3), including, but not limited to, placement of the contaminated soil/fill material on an impervious surface and

covering the stockpile with impervious material to prevent infiltration of precipitation. The department's environmental consultant will collect representative samples of the stockpiled material, laboratory-analyze the samples, and advise the contractor of disposal requirements within 10 business days of the construction of the stockpile. The stockpiled material shall be disposed according to one of the designations listed above. As an alternative to temporarily stockpiling contaminated soil/fill material that requires additional characterization, the contractor has the option of suspending excavation in those areas where such soil is encountered until such time as characterization is completed.

Directly load and haul soil and sediment designated by the environmental consultant for offsite disposal to the WDNR-licensed facility. Verify that vehicles used to transport contaminated material are licensed for such activity according to applicable state and federal regulations. Use loading and hauling practices that are appropriate to prevent any spills or releases of contaminated soils, sediments, or residues. Prior to transport, sufficiently dewater soils and sediments so as not to contain free liquids.

When material is encountered outside the above-identified limits of known contamination that appears to have been impacted with petroleum or other chemical products, or when other obvious potentially contaminated materials are encountered or material exhibits characteristics of industrial-type wastes, such as fly ash, foundry sand, and cinders, or when underground storage tanks are encountered, suspend excavation in that area and notify the engineer and the environmental consultant.

Groundwater may be present within the construction limits. Water generated during dewatering operations (if necessary) is expected to be permitted to discharge to the surface except in the contaminated locations.

Contaminated groundwater generated from dewatering activities within the contaminated areas may exceed the surface water discharge limits specified in the DNR's "General Permit to Discharge under the Wisconsin Pollutant Discharge Elimination System" for "Contaminated Groundwater from Remedial Action Operations" (WPDES Permit No. WI-0046566-5), Table 3.1.

The City of Portage has granted permission to discharge contaminated water generated during dewatering into the sanitary sewer for disposal/treatment at the City of Portage Wastewater Treatment Facilities. Notify Aaron Jahncke, City of Portage Director of Public Works/City Engineer, at (608)742-2176 Ext. 325 prior to discharge of contaminated groundwater to the sanitary sewer. Also notify the environmental consultant prior to pumping contaminated groundwater.

Control operations in the contaminated locations to minimize the quantity of contaminated water managed. Minimize the amount of open trenches, and construct diversion berms and implement other controls to minimize the infiltration of surface water into excavations in areas of known contamination. Maintain surface water controls until construction of utilities in the areas of contamination are complete. Allow contaminated water encountered, but not requiring removal as a standard course of construction, to remain in-place and do not manage according to this special provision.

Ensure continuous dewatering and excavation safety at all times. Provide, operate, and maintain adequate pumping equipment, and drainage and disposal facilities. Notify the engineer of any dewatering activities and obtain any permits necessary to discharge water. Provide copies of such permits to the engineer. Meet any requirements and pay any costs for obtaining and complying with such permit use. Follow all applicable legislative statutes, judiciary decisions, and regulations of the State of Wisconsin.

#### **D Measurement**

The department will measure Management of Contaminated Soil, Sediment, and Groundwater in tons of contaminated soil or sediment accepted by the bioremediation or disposal facility as documented by weight tickets generated by the facility. Load tickets must be delivered to the engineer within 10 business days of the date on which the soil or sediment was accepted by the facility.

#### **E Payment**

The department will pay for measured quantities at the contract unit price under the following bid item:

ITEM NUMBER	DESCRIPTION	UNIT
SPV.0195.01	Excavation, Hauling, and Disposal of Contaminated Soil (Bioremediation)	TON
SPV.0195.02	Excavation, Hauling, and Disposal of Contaminated Soil (Direct Landfill)	TON

Payment is full compensation for excavating, segregating, loading, hauling, and treatment via bioremediation of petroleum-contaminated soil; excavating, segregating, loading, hauling, and disposal of chlorinated compound-contaminated soil and metal-contaminated sediment; tipping fees; obtaining solid waste collection and transportation service operating licenses; assisting in the collection of soil samples for field evaluation; dewatering of soils and sediment prior to transport, if necessary; controlling

contaminated water and preventing non-contaminated surface water and precipitation from entering the areas of contamination; managing and pumping contaminated water from excavations in the area of contamination to the designated discharge point; and for furnishing all labor, tools, equipment, and incidentals necessary to complete the work.

**Subject:** Initial Approval - Post Closure Modification Request - USH 51 Corridor, Portage, Columbia County (WisDOT ID#6918-01-02)

Hello Dan and Brian,

On November 3, 2017 the Department received a copy of the Post-Closure Modification Requests for the USH 51 Corridor in Portage, Columbia County, Wisconsin from TRC Environmental Corporation. The request includes information for the following three closed WDNR contaminated sites with continuing obligations to maintain a cap barrier:

Site 7: Mael Estate Property – 109 Edgewater St. – BRRTS# 03-11-168416

Site 19: Crawford 66 – 416 E. Wisconsin St. – BRRTS# 03-11-002155

Site 24: Portage Canal – BRRTS# 02-11-543021

We have reviewed the requests dated October 31, 2017 and found that the approach to maintaining continuing obligations on the three sites is acceptable.

Since the cap barriers will be essentially replaced in kind during improvements to paved sidewalks and roadways, and there will be minimal disturbance of soils during utility work in the project corridor, no fee will be required for these post-closure modifications. However, final documentation of the modifications must be provided to the Department after the modifications are made. The final documentation of modifications should include: an updated cap maintenance plan, photos, cover location maps and all other applicable information.

After documentation is received and reviewed, the Department will be able to officially approve the Post-Closure Modifications to each site.

If you have any questions or concerns please feel free to contact me.

**We are committed to service excellence.**

Subject: Approval of Special Provisions Revision 2, USH 51, Wisconsin & DeWitt Streets, Portage, WI

Dear Mr. Haak:

On July 27, 2018 the Department received a letter "Special Provisions Revision 2" with an attached Special Provisions (revised July 2018) from TRC Environmental Corporation for the USH 51 (Wisconsin and DeWitt Streets), Ontario St. to E. Pleasant St., Portage, Wisconsin, road reconstruction project. The Special Provisions outline the procedures that the Department of Transportation and any of its contractors will follow for management of contaminated soil and/or groundwater in the zone of construction.

The letter, Special Provisions, and the previously submitted Phase 2.5/3 Soil Investigation and Special Revisions, Revision 1, dated July 27, 2018, constitute the Excavation Management Plan (EMP) for the project.

The plan submitted appears to be an acceptable approach for the management of contaminated soil and/or groundwater in the project corridor, based on Department of Natural Resources guidelines. The Department hereby approves the proposed Special Provisions Revision 2 (revised July 2018).

If you have any questions, please feel free to contact me by email at [john.mason@wisconsin.gov](mailto:john.mason@wisconsin.gov) or by phone at 608-275-3222.

Sincerely,

A handwritten signature in blue ink that reads "John Mason".

Profile Number: 134854WI

### C. MATERIAL INFORMATION

Describe Process Generating Material (Continued from page 1): If more space is needed, please attach additional pages.

underground storage tanks, which were removed prior to sampling. Contaminated soil conditions are unchanged since sampling.

Material Composition and Contaminants (Continued from page 1): If more space is needed, please attach additional pages.

5.	
6.	
7.	
8.	
9.	
Total composition must be equal to or greater than 100%	
	≥100%

### D. REGULATORY INFORMATION

**Only questions with a "Yes" response in Section D on the EZ Profile™ form (page 1) need to be answered here.**

**1. EPA Hazardous Waste**

a. Please list all USEPA listed and characteristic waste code numbers:

- b. Is the material subject to the Alternative Debris standards (40 CFR 268.45)?  Yes  No
- c. Is the material subject to the Alternative Soil standards (40 CFR 268.49)? → If Yes, complete question 4.  Yes  No
- d. Is the material exempt from Subpart CC Controls (40 CFR 264.1083)?  Yes  No  
 → If Yes, please check **one** of the following:
  - Waste meets LDR or treatment exemptions for organics (40 CFR 264.1082(c)(2) or (c)(4))
  - Waste contains VOCs that average <500 ppmw (CFR 264.1082(c)(1)) – will require annual update.

2. State Hazardous Waste → Please list all state waste codes: \_\_\_\_\_

3. For material that is Treated, Delisted, or Excluded → Please indicate the category, below:  
 Delisted Hazardous Waste       Excluded Waste under 40 CFR 261.4 → Specify Exclusion: \_\_\_\_\_  
 Treated Hazardous Waste Debris       Treated Characteristic Hazardous Waste → If checked, complete question 4.

4. Underlying Hazardous Constituents → Please list all Underlying Hazardous Constituents:  
 \_\_\_\_\_

**5. Industries regulated under Benzene NESHAP include petroleum refineries, chemical manufacturing plants, coke by-product recovery plants, and TSDFs.**

- a. Are you a TSDF? → If yes, please complete Benzene NESHAP questionnaire. If not, continue.  Yes  No
  - b. Does this material contain benzene?  Yes  No  
 1. If yes, what is the flow weighted average concentration? \_\_\_\_\_ ppmw
  - c. What is your facility's current total annual benzene quantity in Megagrams?  <1 Mg    1–9.99 Mg    ≥10 Mg
  - d. Is this waste soil from a remediation?  Yes  No  
 1. If yes, what is the benzene concentration in remediation waste? \_\_\_\_\_ ppmw
  - e. Does the waste contain >10% water/moisture?  Yes  No
  - f. Has material been treated to remove 99% of the benzene or to achieve <10 ppmw?  Yes  No
  - g. Is material exempt from controls in accordance with 40 CFR 61.342?  Yes  No  
 → If yes, specify exemption: \_\_\_\_\_
  - h. Based on your knowledge of your waste and the BWON regulations, do you believe that this waste stream is subject to treatment and control requirements at an off-site TSDF?  Yes  No
6. 40 CFR 63 GGGGG → Does the material contain <500 ppmw VOHAPs at the point of determination?  Yes  No
7. CERCLA or State-Mandated clean up → Please submit the Record of Decision or other documentation with process information to assist others in the evaluation for proper disposal. A "Determination of Acceptability" may be needed for CERCLA wastes not going to a CERCLA approved facility.
8. NRC or state regulated radioactive or NORM Waste → Please identify Isotopes and pCi/g: \_\_\_\_\_

 Multiple Generator Locations (Attach Locations)  Request Certificate of Disposal  Renewal? Original Profile Number: \_\_\_\_\_

**A. GENERATOR INFORMATION (MATERIAL ORIGIN)**

- 1. Generator Name: City of Portage (WisDOT ID#6918-01-72)
- 2. Site Address: USH 51  
(City, State, ZIP) Portage WI 53901
- 3. County: Columbia
- 4. Contact Name: Aaron Jahncke
- 5. Email: Aaron.Jahncke@portagewi.gov
- 6. Phone: (608) 742-2176 x325 7. Fax: \_\_\_\_\_
- 8. Generator EPA ID: \_\_\_\_\_  N/A
- 9. State ID: \_\_\_\_\_  N/A

**C. MATERIAL INFORMATION**

- 1. Common Name: Metals and Chlorinated Compound Contaminated Soil  
Describe Process(es) Generating Material:  See Attached  

Highway contractor will be installing underground utilities during road reconstruction of USH 51. Contaminated soil will be excavated from utility trenches. Source of lead contamination comes from urban runoff and industrial discharges
- 2. Material Composition and Contaminants:  See Attached  

1. Soil	100 %
2.	
3.	
4.	
Total comp. must be equal to or greater than 100%	
	≥100%
- 3. State Waste Codes: \_\_\_\_\_  N/A
- 4. Color: Brown/black
- 5. Physical State at 70°F:  Solid  Liquid  Other: \_\_\_\_\_
- 6. Free Liquid Range Percentage: \_\_\_\_\_ to \_\_\_\_\_  N/A
- 7. pH: \_\_\_\_\_ to \_\_\_\_\_  N/A
- 8. Strong Odor:  Yes  No Describe: \_\_\_\_\_
- 9. Flash Point:  <140°F  140°-199°F  ≥200°  N/A

**E. ANALYTICAL AND OTHER REPRESENTATIVE INFORMATION**

- 1. Analytical attached  Yes  
Please identify applicable samples and/or lab reports:  

Solid matrix - GP-11A, GP-24D
- 2. Other information attached (such as MSDS)?  Yes

**G. GENERATOR CERTIFICATION (PLEASE READ AND CERTIFY BY SIGNATURE)**

By signing this EZ Profile™ form, I hereby certify that all information submitted in this and all attached documents contain true and accurate descriptions of this material, and that all relevant information necessary for proper material characterization and to identify known and suspected hazards has been provided. Any analytical data attached was derived from a sample that is representative as defined in 40 CFR 261 - Appendix 1 or by using an equivalent method. All changes occurring in the character of the material (i.e., changes in the process or new analytical) will be identified by the Generator and be disclosed to Waste Management prior to providing the material to Waste Management.

I am an Authorized Agent signing on behalf of the Generator, and I have confirmed with the Generator that information contained in this profile, as well as supporting documents provided, are accurate and complete.

Name (Print): Aaron Jahncke Date: Mar 10, 2021  
Title: DPW/ City Engr.  
Company: City of Portage

**B. BILLING INFORMATION**

SAME AS GENERATOR

- 1. Billing Name: A-1 Excavating, Inc.
- 2. Billing Address: 408 26th Ave.  
(City, State, ZIP) Bloomer WI WI 54724
- 3. Contact Name: Al Gingras
- 4. Email: agingras@a1excavating.com
- 5. Phone: (715) 568-4141 6. Fax: \_\_\_\_\_
- 7. WM Hauled?  Yes  No
- 8. P.O. Number: \_\_\_\_\_
- 9. Payment Method:  Credit Account  Cash  Credit Card

**D. REGULATORY INFORMATION**

- 1. EPA Hazardous Waste?  Yes\*  No  
Code: \_\_\_\_\_
- 2. State Hazardous Waste?  Yes  No  
Code: \_\_\_\_\_
- 3. Is this material non-hazardous due to Treatment, Delisting, or an Exclusion?  Yes\*  No
- 4. Contains Underlying Hazardous Constituents?  Yes\*  No
- 5. From an industry regulated under Benzene NESHAP?  Yes\*  No
- 6. Facility remediation subject to 40 CFR 63 GGGGG?  Yes\*  No
- 7. CERCLA or State-mandated clean-up?  Yes\*  No
- 8. NRC or State-regulated radioactive or NORM waste?  Yes\*  No
- \*If Yes, see Addendum (page 2) for additional questions and space.**
- 9. Contains PCBs? → If Yes, answer a, b and c.  Yes  No
  - a. Regulated by 40 CFR 761?  Yes  No
  - b. Remediation under 40 CFR 761.61 (a)?  Yes  No
  - c. Were PCB imported into the US?  Yes  No
- 10. Regulated and/or Untreated Medical/Infectious Waste?  Yes  No
- 11. Contains Asbestos?  Yes  No  
→ If Yes:  Non-Friable  Non-Friable - Regulated  Friable

**F. SHIPPING AND DOT INFORMATION**

- 1.  One-Time Event  Repeat Event/Ongoing Business
- 2. Estimated Quantity/Unit of Measure: 2,800  
 Tons  Yards  Drums  Gallons  Other: \_\_\_\_\_
- 3. Container Type and Size: Dump trucks
- 4. USDOT Proper Shipping Name: \_\_\_\_\_  N/A

Certification Signature

**Only complete this Addendum if prompted by responses on EZ Profile™ (page 1) or to provide additional information. Sections and question numbers correspond to EZ Profile™.**

Profile Number: 134856WI

### C. MATERIAL INFORMATION

Describe Process Generating Material (Continued from page 1): If more space is needed, please attach additional pages.

over a significant period of time to the Portage canal. PCE contamination comes from a dry cleaning operation located adjacent to the excavation area. Contaminated soil conditions are likely unchanged since sampling.

Material Composition and Contaminants (Continued from page 1): If more space is needed, please attach additional pages.

5.	
6.	
7.	
8.	
9.	
Total composition must be equal to or greater than 100%	≥100%

### D. REGULATORY INFORMATION

**Only questions with a "Yes" response in Section D on the EZ Profile™ form (page 1) need to be answered here.**

**1. EPA Hazardous Waste**

a. Please list all USEPA listed and characteristic waste code numbers:

- b. Is the material subject to the Alternative Debris standards (40 CFR 268.45)?  Yes  No
- c. Is the material subject to the Alternative Soil standards (40 CFR 268.49)? → If Yes, complete question 4.  Yes  No
- d. Is the material exempt from Subpart CC Controls (40 CFR 264.1083)?  Yes  No  
 → If Yes, please check **one** of the following:
  - Waste meets LDR or treatment exemptions for organics (40 CFR 264.1082(c)(2) or (c)(4))
  - Waste contains VOCs that average <500 ppmw (CFR 264.1082(c)(1)) – will require annual update.

2. State Hazardous Waste → Please list all state waste codes: \_\_\_\_\_

3. For material that is Treated, Delisted, or Excluded → Please indicate the category, below:  
 Delisted Hazardous Waste       Excluded Waste under 40 CFR 261.4 → Specify Exclusion: \_\_\_\_\_  
 Treated Hazardous Waste Debris       Treated Characteristic Hazardous Waste → If checked, complete question 4.

4. Underlying Hazardous Constituents → Please list all Underlying Hazardous Constituents:  
 \_\_\_\_\_

**5. Industries regulated under Benzene NESHAP include petroleum refineries, chemical manufacturing plants, coke by-product recovery plants, and TSDFs.**

- a. Are you a TSDF? → If yes, please complete Benzene NESHAP questionnaire. If not, continue.  Yes  No
- b. Does this material contain benzene?  Yes  No  
 1. If yes, what is the flow weighted average concentration? \_\_\_\_\_ ppmw
- c. What is your facility's current total annual benzene quantity in Megagrams?  <1 Mg    1–9.99 Mg    ≥10 Mg
- d. Is this waste soil from a remediation?  Yes  No  
 1. If yes, what is the benzene concentration in remediation waste? \_\_\_\_\_ ppmw
- e. Does the waste contain >10% water/moisture?  Yes  No
- f. Has material been treated to remove 99% of the benzene or to achieve <10 ppmw?  Yes  No
- g. Is material exempt from controls in accordance with 40 CFR 61.342?  Yes  No  
 → If yes, specify exemption: \_\_\_\_\_
- h. Based on your knowledge of your waste and the BWON regulations, do you believe that this waste stream is subject to treatment and control requirements at an off-site TSDF?  Yes  No

6. 40 CFR 63 GGGGG → Does the material contain <500 ppmw VOHAPs at the point of determination?  Yes  No

7. CERCLA or State-Mandated clean up → Please submit the Record of Decision or other documentation with process information to assist others in the evaluation for proper disposal. A "Determination of Acceptability" may be needed for CERCLA wastes not going to a CERCLA approved facility.

8. NRC or state regulated radioactive or NORM Waste → Please identify Isotopes and pCi/g: \_\_\_\_\_

## **Appendix E: Laboratory Analytical Reports**

June 03, 2021

DAN HAAK  
TRC - MADISON  
708 HEARTLAND TRAIL  
Madison, WI 53717

RE: Project: 421202 USH 51 PORTAGE  
Pace Project No.: 40227646

Dear DAN HAAK:

Enclosed are the analytical results for sample(s) received by the laboratory on May 27, 2021. The results relate only to the samples included in this report. Results reported herein conform to the applicable TNI/NELAC Standards and the laboratory's Quality Manual, where applicable, unless otherwise noted in the body of the report.

The test results provided in this final report were generated by each of the following laboratories within the Pace Network:

- Pace Analytical Services - Green Bay

If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Tod Noltemeyer  
tod.noltemeyer@pacelabs.com

## REPORT OF LABORATORY ANALYSIS

This report shall not be reproduced, except in full,  
without the written consent of Pace Analytical Services, LLC.

## PROJECT NARRATIVE

Project: 421202 USH 51 PORTAGE

Pace Project No.: 40227646

---

**Method:** EPA 8260

**Description:** 8260 MSV Med Level Normal List

**Client:** TRC - MADISON

**Date:** June 03, 2021

**General Information:**

3 samples were analyzed for EPA 8260 by Pace Analytical Services Green Bay. All samples were received in acceptable condition with any exceptions noted below or on the chain-of custody and/or the sample condition upon receipt form (SCUR) attached at the end of this report.

**Hold Time:**

The samples were analyzed within the method required hold times with any exceptions noted below.

**Sample Preparation:**

The samples were prepared in accordance with EPA 5035/5030B with any exceptions noted below.

**Initial Calibrations (including MS Tune as applicable):**

All criteria were within method requirements with any exceptions noted below.

**Continuing Calibration:**

All criteria were within method requirements with any exceptions noted below.

**Internal Standards:**

All internal standards were within QC limits with any exceptions noted below.

**Surrogates:**

All surrogates were within QC limits with any exceptions noted below.

**Method Blank:**

All analytes were below the report limit in the method blank, where applicable, with any exceptions noted below.

**Laboratory Control Spike:**

All laboratory control spike compounds were within QC limits with any exceptions noted below.

QC Batch: 386936

L1: Analyte recovery in the laboratory control sample (LCS) was above QC limits. Results may be biased high.

- LCS (Lab ID: 2232303)
- 1,2-Dibromo-3-chloropropane

**Matrix Spikes:**

All percent recoveries and relative percent differences (RPDs) were within acceptance criteria with any exceptions noted below.

**Additional Comments:**

This data package has been reviewed for quality and completeness and is approved for release.

## REPORT OF LABORATORY ANALYSIS

## QUALIFIERS

Project: 421202 USH 51 PORTAGE

Pace Project No.: 40227646

---

### DEFINITIONS

DF - Dilution Factor, if reported, represents the factor applied to the reported data due to dilution of the sample aliquot.

ND - Not Detected at or above LOD.

J - Estimated concentration at or above the LOD and below the LOQ.

LOD - Limit of Detection adjusted for dilution factor, percent moisture, initial weight and final volume.

LOQ - Limit of Quantitation adjusted for dilution factor, percent moisture, initial weight and final volume.

S - Surrogate

1,2-Diphenylhydrazine decomposes to and cannot be separated from Azobenzene using Method 8270. The result for each analyte is a combined concentration.

Consistent with EPA guidelines, unrounded data are displayed and have been used to calculate % recovery and RPD values.

LCS(D) - Laboratory Control Sample (Duplicate)

MS(D) - Matrix Spike (Duplicate)

DUP - Sample Duplicate

RPD - Relative Percent Difference

NC - Not Calculable.

SG - Silica Gel - Clean-Up

U - Indicates the compound was analyzed for, but not detected at or above the adjusted LOD.

N-Nitrosodiphenylamine decomposes and cannot be separated from Diphenylamine using Method 8270. The result reported for each analyte is a combined concentration.

Pace Analytical is TNI accredited. Contact your Pace PM for the current list of accredited analytes.

TNI - The NELAC Institute.

### ANALYTE QUALIFIERS

L1 Analyte recovery in the laboratory control sample (LCS) was above QC limits. Results may be biased high.

RE: Project: 421202 WISDOT-USH 51,PORTAGE  
Pace Project No.: 40229173

Dear DAN HAAK:

Enclosed are the analytical results for sample(s) received by the laboratory on June 29, 2021. The results relate only to the samples included in this report. Results reported herein conform to the applicable TNI/NELAC Standards and the laboratory's Quality Manual, where applicable, unless otherwise noted in the body of the report.

The test results provided in this final report were generated by each of the following laboratories within the Pace Network:

- Pace Analytical Services - Green Bay

If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Tod Noltemeyer  
tod.noltemeyer@pacelabs.com

## PROJECT NARRATIVE

Project: 421202 WISDOT-USH 51,PORTAGE  
Pace Project No.: 40229173

---

**Method:** EPA 8260  
**Description:** 8260 MSV Med Level Normal List  
**Client:** TRC - MADISON  
**Date:** July 01, 2021

### General Information:

4 samples were analyzed for EPA 8260 by Pace Analytical Services Green Bay. All samples were received in acceptable condition with any exceptions noted below or on the chain-of custody and/or the sample condition upon receipt form (SCUR) attached at the end of this report.

### Hold Time:

The samples were analyzed within the method required hold times with any exceptions noted below.

### Sample Preparation:

The samples were prepared in accordance with EPA 5035/5030B with any exceptions noted below.

### Initial Calibrations (including MS Tune as applicable):

All criteria were within method requirements with any exceptions noted below.

### Continuing Calibration:

All criteria were within method requirements with any exceptions noted below.

### Internal Standards:

All internal standards were within QC limits with any exceptions noted below.

### Surrogates:

All surrogates were within QC limits with any exceptions noted below.

### Method Blank:

All analytes were below the report limit in the method blank, where applicable, with any exceptions noted below.

### Laboratory Control Spike:

All laboratory control spike compounds were within QC limits with any exceptions noted below.

### Matrix Spikes:

All percent recoveries and relative percent differences (RPDs) were within acceptance criteria with any exceptions noted below.

QC Batch: 389418

A matrix spike and/or matrix spike duplicate (MS/MSD) were performed on the following sample(s): 40229176003

R1: RPD value was outside control limits.

- MSD (Lab ID: 2245866)
  - 1,2-Dibromo-3-chloropropane
  - Dichlorodifluoromethane

### Additional Comments:

This data package has been reviewed for quality and completeness and is approved for release.

## QUALIFIERS

Project: 421202 WISDOT-USH 51,PORTAGE

Pace Project No.: 40229173

---

### DEFINITIONS

DF - Dilution Factor, if reported, represents the factor applied to the reported data due to dilution of the sample aliquot.

ND - Not Detected at or above LOD.

J - Estimated concentration at or above the LOD and below the LOQ.

LOD - Limit of Detection adjusted for dilution factor, percent moisture, initial weight and final volume.

LOQ - Limit of Quantitation adjusted for dilution factor, percent moisture, initial weight and final volume.

S - Surrogate

1,2-Diphenylhydrazine decomposes to and cannot be separated from Azobenzene using Method 8270. The result for each analyte is a combined concentration.

Consistent with EPA guidelines, unrounded data are displayed and have been used to calculate % recovery and RPD values.

LCS(D) - Laboratory Control Sample (Duplicate)

MS(D) - Matrix Spike (Duplicate)

DUP - Sample Duplicate

RPD - Relative Percent Difference

NC - Not Calculable.

SG - Silica Gel - Clean-Up

U - Indicates the compound was analyzed for, but not detected at or above the adjusted LOD.

N-Nitrosodiphenylamine decomposes and cannot be separated from Diphenylamine using Method 8270. The result reported for each analyte is a combined concentration.

Pace Analytical is TNI accredited. Contact your Pace PM for the current list of accredited analytes.

TNI - The NELAC Institute.

### ANALYTE QUALIFIERS

R1 RPD value was outside control limits.

RE: Project: 421202 WISDOT - USH51 PORTAGE  
Pace Project No.: 40229167

Dear DAN HAAK:

Enclosed are the analytical results for sample(s) received by the laboratory on June 29, 2021. The results relate only to the samples included in this report. Results reported herein conform to the applicable TNI/NELAC Standards and the laboratory's Quality Manual, where applicable, unless otherwise noted in the body of the report.

The test results provided in this final report were generated by each of the following laboratories within the Pace Network:

- Pace Analytical Services - Green Bay

If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Tod Noltemeyer

## PROJECT NARRATIVE

Project: 421202 WISDOT - USH51 PORTAGE

Pace Project No.: 40229167

---

**Method:** EPA 6010D

**Description:** 6010D MET ICP, TCLP

**Client:** TRC - MADISON

**Date:** July 06, 2021

**General Information:**

3 samples were analyzed for EPA 6010D by Pace Analytical Services Green Bay. All samples were received in acceptable condition with any exceptions noted below or on the chain-of custody and/or the sample condition upon receipt form (SCUR) attached at the end of this report.

**Hold Time:**

The samples were analyzed within the method required hold times with any exceptions noted below.

**Sample Preparation:**

The samples were prepared in accordance with EPA 3010A with any exceptions noted below.

**Initial Calibrations (including MS Tune as applicable):**

All criteria were within method requirements with any exceptions noted below.

**Continuing Calibration:**

All criteria were within method requirements with any exceptions noted below.

**Method Blank:**

All analytes were below the report limit in the method blank, where applicable, with any exceptions noted below.

**Laboratory Control Spike:**

All laboratory control spike compounds were within QC limits with any exceptions noted below.

**Matrix Spikes:**

All percent recoveries and relative percent differences (RPDs) were within acceptance criteria with any exceptions noted below.

**Additional Comments:**

## REPORT OF LABORATORY ANALYSIS

This report shall not be reproduced, except in full,

## PROJECT NARRATIVE

Project: 421202 WISDOT - USH51 PORTAGE

Pace Project No.: 40229167

---

**Method:** EPA 8260

**Description:** 8260 MSV TCLP

**Client:** TRC - MADISON

**Date:** July 06, 2021

**General Information:**

3 samples were analyzed for EPA 8260 by Pace Analytical Services Green Bay. All samples were received in acceptable condition with any exceptions noted below or on the chain-of custody and/or the sample condition upon receipt form (SCUR) attached at the end of this report.

**Hold Time:**

The samples were analyzed within the method required hold times with any exceptions noted below.

**Initial Calibrations (including MS Tune as applicable):**

All criteria were within method requirements with any exceptions noted below.

**Continuing Calibration:**

All criteria were within method requirements with any exceptions noted below.

**Internal Standards:**

All internal standards were within QC limits with any exceptions noted below.

**Surrogates:**

All surrogates were within QC limits with any exceptions noted below.

**Method Blank:**

All analytes were below the report limit in the method blank, where applicable, with any exceptions noted below.

**Laboratory Control Spike:**

All laboratory control spike compounds were within QC limits with any exceptions noted below.

**Matrix Spikes:**

All percent recoveries and relative percent differences (RPDs) were within acceptance criteria with any exceptions noted below.

**Additional Comments:**

This data package has been reviewed for quality and completeness and is approved for release.

## QUALIFIERS

Project: 421202 WISDOT - USH51 PORTAGE

Pace Project No.: 40229167

---

### DEFINITIONS

DF - Dilution Factor, if reported, represents the factor applied to the reported data due to dilution of the sample aliquot.

ND - Not Detected at or above LOD.

J - Estimated concentration at or above the LOD and below the LOQ.

LOD - Limit of Detection adjusted for dilution factor, percent moisture, initial weight and final volume.

LOQ - Limit of Quantitation adjusted for dilution factor, percent moisture, initial weight and final volume.

S - Surrogate

1,2-Diphenylhydrazine decomposes to and cannot be separated from Azobenzene using Method 8270. The result for each analyte is a combined concentration.

Consistent with EPA guidelines, unrounded data are displayed and have been used to calculate % recovery and RPD values.

LCS(D) - Laboratory Control Sample (Duplicate)

MS(D) - Matrix Spike (Duplicate)

DUP - Sample Duplicate

RPD - Relative Percent Difference

NC - Not Calculable.

SG - Silica Gel - Clean-Up

U - Indicates the compound was analyzed for, but not detected at or above the adjusted LOD.

N-Nitrosodiphenylamine decomposes and cannot be separated from Diphenylamine using Method 8270. The result reported for each analyte is a combined concentration.

Pace Analytical is TNI accredited. Contact your Pace PM for the current list of accredited analytes.

TNI - The NELAC Institute.
