

Spill Notification for WRR Environmental Services Co., Inc.

EPA ID# WID990829475

FID# 618026530

Spill ID# Unknown

ID 20220209WC18-1 – Water with Flammable Solvents

Per Condition 86 of WRR Environmental Services' current Feasibility and Plan of Operations Report (FPOR), WRR is making the following spill report to the Department's designated Hazardous Waste Inspector assigned to WRR, to the Department's designated Hazardous Waste plan review staff person assigned to WRR and to the Department's designated Spills Coordinator.

This notification, required by Condition 86 of the WRR FPOR and NR 706.05(1), contains the following information to the extent practicable or applicable:

1. Name, address, and telephone number of the person reporting the discharge.

Becky Anderson – Director of Compliance  
WRR Environmental Services Co., Inc.  
5200 Ryder Road  
Eau Claire WI 54701  
715-577-7755 (Cell)

2. Name, address, and telephone number of the discharger, or owner and operator of the UST system and any other potentially responsible persons.

WRR Environmental Services Co., Inc.  
5200 Ryder Road  
Eau Claire WI 54701  
715-834-9624 Main Number

3. Date, time, and duration of the discharge.

February 9, at 03:10 am. Time to clean up the release was 8.0 hours.

Location of the discharge including street address, county, town, city or village

WRR Environmental Services Co., Inc.  
5200 Ryder Road  
Eau Claire WI 54701

Town of Washington

4. Identity, physical state, and quantity of the material discharged.

~300 gallons of water contaminated with flammable solvents. This volume also includes snow and ice recovered during the cleanup.

The hazardous waste codes associated with this waste is D001, F003 and F005.

5. Physical, chemical, hazardous, and toxicological characteristics of the substance.

The release is water saturated with flammable solvents.

6. Cause of the discharge.

WRR personnel set up lines to top off a hazardous wastewater tanker from a wastewater storage tank. The operator does not remember turning on the pump before sealing up another tanker and then going on a break. The release was discovered by personnel working in the area.

7. Immediate actions being taken and the name of the contractor or other person performing the action.

The pump was immediately shut off and cleanup operations were started. Shovels, brooms, clay absorbent and pads were used to pick up the bulk of the release, ice and snow.

All cleanup activities were conducted by WRR personnel.

8. Source, speed of movement, and destination or probable destination of the discharged hazardous substance.

The release was contained to the concrete area loading area. No material impacted soil or contaminated the WRR stormwater collection area.

Included with this report is a facility map with the release location marked with a red arrow.

9. Actual or potential impacts to human health or the environment, including actual or potential impacts to drinking water supplies.

No drinking water supplies were impacted by the spill.

This waste contained.

10. Weather conditions existing at the scene, including presence of precipitation and wind direction and velocity.

The weather at the time of the release was clear with no precipitation, the temperature was 25F and a breeze of 2 mph.

11. Other agencies on-scene during the discharge incident.

No agencies were on-site during the discharge or clean-up.
