**Subject:** 1404 S Webster

Rob,

Thank you for the conversation this afternoon regarding the status of the 1404 S Webster site, BRRTS # 02-05-514372. As mentioned during the call, DNR is requesting you proceed with resampling of 930 S Derby and submit a workplan as soon as possible as there is an acute health risk concern with the TCE that was detected in indoor air. This should be performed concurrently with the resampling and expansion of the sanitary sewer investigation, and resampling of the other buildings. I'm also requesting submittal of the groundwater sampling results to the DNR.

Please let me know if you have any questions or concerns moving forward.

Thanks,  
Josie
