Lynne,

I hope all is well. Since we could not coordinate sampling over the summer, we need to schedule a time to verify the previous conditions. We have changed up how we sample slightly and would like to schedule this for Monday next week. We would come out and set a smaller sample in the basement and then return in 3-4 weeks to retrieve it. At that time, we would collect a sub-slab sample as we did last time, along with one from within the sewer cleanout in the basement. This will all take less than an hour. Can you please confirm Monday or another day and time this will work for you?

I have copied Josie Schultz from the WDNR if you have questions about why this is required. Her telephone number is (920) 366-5685. Or you could reach out to the health department if you like. A contact there is Curtis Hedman, and his email is curtis.hedman@dhs.wisconsin.gov and his telephone is 608.287.4152.

I will follow up with a phone call in the next day or so to see if you have any questions.

Thanks again for your help to finish out our work.
