SUBJECT: Final Approval of Post-Closure Modification
WI DOT Eggers Industries West Plt, 1702 13th Street, Two Rivers, WI
DNR BRRTS Activity #: 02-36-521430
FID #: 436010300

Dear Mr. Buckley and Mr. McDonald:

On October 31, 2014, the Department of Natural Resources (DNR) received a post-closure modification request for utility work in 14th Street and partially on private property at 1702 13th Street in Two Rivers, WI, that proposed to disturb and replace part of an asphalt cap that was required to be maintained as a continuing obligation for the WI DOT Eggers Industries West Plt contamination case closed by DNR in January 2007. Documentation for the proposed utility work and an update for the portion of the utility work already completed was provided by the City of Two Rivers on October 31, 2014. Plan sheets for the utility project provided by the City of Two Rivers indicated that all the soil excavated to date for the project had been returned to the utility trench as backfill since it was granular in nature, and the areas where the utility work was complete was repaved. The DNR provided a notice to proceed with the post-closure modification on November 3, 2014, and requested that final documentation be submitted once the utility work and replacement of the required cap was complete at 1702 13th Street.

The DNR requested in 2014, 2018, and 2021 that the City of Two Rivers submit final documentation to provide a project summary and to confirm the cap was adequately replaced. The DNR never received the final documentation. The DNR conducted a continuing obligation audit for the closed case on September 10, 2021. During the site visit for the audit, the DNR was able to confirm the replacement of the asphalt cap that occurred for this utility project. Due to the minimal disturbance and replacement of the required asphalt cap and the confirmation of cap replacement during the audit, the DNR considers this post-closure modification to be complete.

However, for any future projects that requires a post-closure modification request, the City of Two Rivers needs to follow the post-closure modification process for review and approval prior to the initiation of a project and provide final documentation after post-closure modification actions are completed. Refer to *Guidance on Post-Closure Modifications (RR-982)* at dnr.wi.gov, search "RR-982."

The documentation outlined in this letter is included in the Bureau for Remediation and Redevelopment Tracking System (BRRTS) on the Web (BOTW). Find BOTW at dnr.wi.gov, search "BOTW." An online map view of the site can also be found on the RR Sites Map (RRSM) at dnr.wi.gov, search "RRSM."
