Hello Tim, just a follow up on our conversation yesterday. REI struggled contracting with a drilling provider for the approved wells but was able to get them installed without utilizing air rotary drilling methods and significant savings were realized. One line item was exceeded on the drilling invoice versus the approved costs and that was for decontamination. The drillers invoice was \$100 greater than the approved amount and REI is seeking DERF eligibility approval for that additional \$100.00. Additionally, REI was required to retain the services of a hauling contractor to transport the drums of soil cuttings to the approved landfill for proper disposal. The cost for this service was \$2,675.00 and REI is also seeking DERF eligibility approval for this charge. If you have any questions, please do not hesitate to reach out to me to discuss.

Thank you,  
*David N. Larsen P.G*
