Subject: Cermatics, Inc. Request for Case Closure GIS Registry fees
10014 N. Wasaukee Rd., Mequon, WI
WDNR FID#246046350 BRRTS#02-460529481

Dear Mr. Luedtke:

The Department recently received an updated request for closure of the above-referenced case which was submitted on your behalf by Christian Mielke of E2M. Based on the residual soil and groundwater contamination associated with the volatile organic compounds at the site, site closure will be conditioned on placing the property and the adjacent off-site property on the Department's GIS Registry. The Department will not review the closure request until we have received required GIS Registry fees. Please submit the fees (\$250 for groundwater and \$200 for soil for a total of \$450) to the attention of the Victoria Stovall, Remediation and Redevelopment Environmental Program Associate at the letterhead address and reference the BRRTS number listed above. Will you also please confirm that the on-site potable well has not been abandoned.

I hope that our review of the new closure information will allow us to determine that you have met your obligation to comply with the requirements of ch. NR 700 Wis. Adm. Code. Please let me know if you have any questions or concerns regarding this letter.

Sincerely,

Nancy D. Ryan, Hydrogeologist
Remediation and Redevelopment
