Subject: Cermatics, Inc. Request for Case Closure GIS Registry fees and well abandonment  
10014 N. Wasauke Rd., Mequon, WI  
**WDNR FID#246046350 BRRTS#02-46-529481**

Dear Mr. Luedtke:

Last March I sent you a letter requesting that you submit fees related to closure of the above referenced site. This site and the adjacent property are required to be placed on the GIS Registry because of residual soil and groundwater contamination. The Department will not consider site closure until the fees have been paid. The fees are \$250 for groundwater and \$200 for soil. The other outstanding condition of site closure is abandonment of the groundwater monitoring wells. At this time, you should ask your environmental consultant to abandon the wells in accordance with Department requirements. Once the wells have been properly abandoned, submit the well abandonment documentation along with the GIS Registry fees and the Department will complete the closure process for this case.

The Department reminds you that you are obligated to complete the cleanup requirements for this site. If you are not able to financially meet these obligations all at once, you should consider first abandoning the wells. Please respond to me within 30 days from the date of this letter what your intent is for meeting these requirements and include a schedule for when you expect to comply.

Please contact me at (414) 263-8533 if you have any questions or concerns regarding this letter.

Sincerely,

Nancy D. Ryan, Hydrogeologist  
Remediation and Redevelopment
