Re: Monthly Progress Report for January 2007  
Moss-American Site, Milwaukee, Wisconsin

Dear Mr. Hart:

Weston Solutions, Inc. (WESTON®) has prepared this monthly progress report on behalf of the Settling Defendant for the Moss-American Superfund site, Tronox LLC (Tronox), formerly Kerr-McGee Chemical LLC. This monthly progress report has been prepared to document progress during January 2007.

#### Progress During January 2007

Progress during this reporting period includes:

- CPAH results for the December 2006 sediment sampling of Reach 4 / 5 were received, tabulated, validated, and mapped.

#### Activities Anticipated During February 2007

During February Tronox anticipates the following activities:

- On 8 February Tronox met with the Agencies to present a preliminary review of the recent Reach 4 / 5 sediment sampling task. Initial findings and implications were discussed. Tronox also provided some early results on its forensic analyses of the sediment samples. After discussing some of the possible remedial outcomes resulting from this data, Tronox and the Agencies agreed to meet during the week of 5 March to resume discussions on possible remedial outcomes for Reach 4 / 5. After reviewing the information presented in the 8 February meeting, the Agencies agreed to the following points:
  - Reach 4 / 5 sediment has been adequately characterized with respect to CPAH content.

Mr. Russell D. Hart  
U.S. EPA

-2-

12 February 2007

- The area of interest for further discussions is limited to the portion of the river between Station 49+00 and 92+00. Portions of the river upstream and downstream of this area are considered to meet applicable cleanup levels.
- Sediment greater than 15 inches below the surface is considered to meet applicable cleanup levels.
- Given the physical constraints associated with the area of interest, it is unlikely that river re-routing is feasible.
- Tronox will prepare a report documenting the Reach 4 /5 sediment sampling performed in December 2006.
- Tronox will prepare a report documenting the well installation/well abandonment tasks performed in November 2006.

Should further clarification of this progress report be required, please contact me at (847) 918-4142 or Keith Watson at (405) 775-5475.

Very truly yours,

Weston Solutions, Inc.

Thomas P. Graan, Ph.D.  
Principal Project Manager
