RE: Request for extension of time to submit Sampling & Analysis Plan
Sheboygan River and Harbor Superfund Site

Dear Mr. Lammers,

By email on July 21, September 8, and September 19, 2023, and correspondence on July 14, 2023, SME on behalf of PRS seeks an extension of time to submit the Sampling and Analysis Plan requested by EPA in its May 8, 2023 correspondence.

As discussed, since concurrence is needed on the risk-based values used for delineation efforts for soils, EPA concurs that a meeting in October is needed to reach agreement on the risk factors, exposure pathways and Conceptual Site Model, before setting a new deadline. Once we agree on the Exposure Pathway Model and Draft CSM, via the collaboration and review checkpoints referenced, we can establish a new deadline.

If you have any additional questions or wish to discuss this information further, please contact me at (312) 353-2111 or kelly.joseph@epa.gov.

Sincerely,

Joseph C. Kelly, PG
Remedial Project Manager
Superfund & Emergency Management Division
