Spoke with Dianna Williams

920-210-1490

- asked for update on consultant hiring
Dianna does not have a contract with a consultant yet, she has talked to Engel
- recommended she consider agent process - PECFA
- reminded her that cleanup can take a long time - need to start soon - PECFA ends June 30, 2020
- may have to go to enforcement if work doesn't start soon
- requested she send in notification of consultant contract within 30 days to DNR

RE: PECFA Number: 53039-9999-07
DNR Reference Number (BRRTS): 03-14-530057

Dear Claimant:

The Department of Natural Resources (Department) has received your request to access the Petroleum Environmental Cleanup Fund Award (PECFA) program. Your request identified the above site for a petroleum contamination clean up.

Assigned to this site, for claim identification purposes with this office, is the PECFA number: **53039-9999-07**. Please include your assigned PECFA number with all correspondence to our Department and on all forms in the spaces provided.

From the information available to the PECFA program, it appears that a discharge from the tank system **is eligible** under the PECFA program for petroleum contamination clean-up costs.

A **final determination of site eligibility will be made at the time of claim review**. The tank system(s) identified as inclusive with this eligibility finding is/are: 281744 ELIGIBLE.

The program deductible is based on a per "occurrence" (contamination plume) basis. An "occurrence" is defined as a contiguous contaminated area of one or more petroleum products. The number of occurrences for this site has not been determined; a final determination will be made at the time of claim review. The tank type classification that your eligibility falls under is: UNDERGROUND MARKETER. Please read the explanation regarding your tank type in the enclosed brochure.

The cost of remedial action, soil testing, clean-up and other costs associated with non-eligible tank system(s) or products are **not** reimbursable under the program. Any PECFA clean-up must be done in the most cost-effective manner possible. All invoices submitted for reimbursement must be adequately itemized to document remedial tasks performed. **A final determination of eligible costs will be made at the time of claim review**.

The necessary claim forms are enclosed for the submittal of your claim to the PECFA program. If you have any questions about the Petroleum Environmental Cleanup Fund program, please feel free to contact me.

Sincerely,

Timothy A. Prosa

RE: PECFA Number: 53039-9999-07
DNR BRRTS: 03-14-530057
Status: NON-ELIGIBLE PECFA-NEW ABOVEGROUND SYSTEM

Dear Claimant:

Thank you for submitting your request for a Petroleum Environmental Cleanup Fund Award (PECFA) site eligibility letter.

After a search of our Petroleum Product Tank Inventory records, tank registration numbers: 203236, 203237, is/are not eligible for the PECFA reimbursement. The Department has determined that this tank system does not qualify for PECFA reimbursement per Wis. Statute §292.63 (3) (ah) New Aboveground systems.

New aboveground systems. An owner or operator is not eligible for an award under this section for costs incurred because of a petroleum product discharge from a petroleum product storage system that is not an underground petroleum product storage tank system and that meets the performance standards in rules of the department of agriculture, trade and consumer protection relating to petroleum product storage systems that are not underground petroleum product storage tank systems and that are installed after April 30, 1991, if the discharge is confirmed after December 22, 2001.

If you have any questions regarding the Petroleum Environmental Cleanup Fund Award Program, please feel free to call me at the number listed below, thank you.

Sincerely,

Timothy A. Prosa
