Request for Exemption from Location Criteria of NR 718.12(1)(c) for Managing Soil as an Immediate Action

Form 4400-315A (R 06/19)

Wisconsin DNR – NR 700 Process

Remediation and Redevelopment Program **April 2017**

Purpose

The purpose of this document is to provide a consistent format for requesting an exemption from Wis. Admin. Code § NR 718.12(1)(c) location criteria. If the location criteria will not be met, the person conducting the immediate action may request a written exemption from the DNR from these requirements by demonstrating that the proposed activities will not cause a threat to public health, safety, welfare and the environment.

Introduction

Contaminated soil at a site or facility excavated or otherwise managed as part of an immediate action may be exempted from the Solid Waste Rules in Wis. Stat. § 289 and Wis. Admin. ch. NR 500 to NR 538 by Wis. Admin. § NR 718.12(1) if soil contaminant concentrations are less than Wis. Admin. Code § NR 720 Residual Contaminant Levels. Management as an immediate action is generally self-implementing and does not require prior approval from the Department of Natural Resources (DNR) if the requirements of Wis. Admin. Code § NR 718.12(1) are met. This includes placing excavated soil at a site or facility that meets the location criteria specified in Wis. Admin. Code § NR 718.12(1)(c).

Document Instructions

Complete all sections of this document as instructed below. Some portions of the document may be filled in directly as indicated, other responses will need to be completed separately and attached. Both versions, electronic and hardcopy, of the completed document and accompanying attachments should be submitted to the DNR project manager for the site where soil is being generated. If you do not know who the project manager is or one has not been assigned, submit this document to the Environmental Program Associate (EPA) in the appropriate region. A list of EPAs can be found here: http://dnr.wi.gov/topic/Brownfields/Contact.html.

Section 2 – Locational criteria

Indicate if excavated waste material will be placed in any of the following locations:

- ☐ Within a floodplain.
- ☐ Within 100 feet of any wetland or critical habitat area.
- ☐ Within 300 feet of any navigable river, stream, lake, pond, or flowage.
- ☐ Within 100 feet of any on-site water supply well or 300 feet of any off-site water supply well.
- ☐ Within three (3) feet of the high groundwater level.
- ☐ At a depth greater than the depth of the original excavation from which the contaminated soil was removed.

Provide the justification for exempting the proposed waste management activity from the indicated criteria as described below.

Explain below why granting an exception to the Wis. Admin. Code § NR 718.12(1)(c) location criteria will not cause a threat to public health, safety, welfare and the environment by assessing how all potential exposure and migration pathways of concern (including direct contact exposure, vapor intrusion, groundwater, surface water, sediment and any other relevant pathway) will be addressed by the proposed management. Consider the quantity and characteristics of the waste being managed, the geologic and hydrogeological characteristics of the receiving site, the unavailability of other environmentally suitable alternatives, and whether the activities will comply with other state and federal regulations including other portions of Wis. Admin. Code §§ NR 700 to NR 754.

Section 3- Attachments

Attach copies of the following documents:

☒ A table summarizing the analytical results of all waste samples collected at the generating site or facility. Clearly indicate which of these samples were collected from material that is proposed to be managed.

☒ The analytical package for all samples listed on the above table. The package should include the sample results, chain of custody, sampling methods and QA/QC data.

☒ Figure(s) that clearly depict the items listed below, if applicable to the immediate action being conducted. All maps should be drawn to scale not larger than 1 inch equal to 100 feet and labeled with the site or facility name and address. The location of the property and the specific disposal area must be provided in sufficient detail to allow DNR personnel to inspect these areas in the future.

- o The boundaries of each property involved in the project as well as named and unnamed roads or access points, buildings and other surface features, underground utilities, land uses on adjacent properties, and known and potential sources of hazardous substances.
- o The location of wetlands, critical habitat areas, floodplains, surface water bodies, water supply wells, or other possible receptors located near or within the area where material will be managed.
- o The lateral extent and depth of planned excavation, grading, or otherwise disturbed areas.
- o The lateral extent and thickness of excavated material placement locations.
- o Soil sample locations at the generating and receiving sites. Depict applicable soil contaminant concentration data and sample depths. Indicate the extent of contamination exceeding a RCL.
- o Depth to groundwater.

1.0 INTRODUCTION

The purpose of this document is to provide the Wisconsin Department of Natural Resources (WDNR) with a description of the proposed project and provide a detailed description of how the contaminated soils will be managed at the Klinke Cleaners-Fox Run property located at 2346 West St. Paul Avenue in the City of Waukesha, Waukesha County, Wisconsin (the "Site"). The location of the Site is depicted on **Figure B.1.a –Location Map**. This Soil Management Plan applies to the area of residual soil and groundwater contamination associated with the former Klinke Cleaners location in the northern portion of the Site, specifically associated with the proposed Fox Den Apartments development. The residual area of contamination in relation to the proposed Fox Den Apartments development is depicted on **Figure B.1.B – Detailed Site Map**.

1.1 SITE DESCRIPTION

The Klinke Cleaners site is located on a parcel identified with Tax Key WAKC1328999001 totaling approximately 11.6-acres. The Site is the former location of a vacant commercial strip mall (2306 to 2350 West St. Paul Avenue) where Klinke Cleaners was formerly located in the 2346 West St. Paul Avenue tenant space (2346 tenant space. An unimproved 1.7815-acre parcel adjoins the aforementioned parcel to the west.

2.0 SITE AND PROJECT DESCRIPTION

2.1 SITE LOCATION AND DESCRIPTION

The Site is located in the Southeast ¼ of the Southeast ¼ of Section 8, Township 6 North, Range 19 East. WTM coordinates for the approximate center of the Site are 661,073 / 281,170. The Site is identified by the Wisconsin Department of Natural Resources (WDNR) with Facility Identification (FID) number 238188910. The environmental repair program (ERP) case associated with the Klinke Cleaners is identified with Bureau of Remediation and Redevelopment Tracking System (BRRTS) No. 02-68-535535.

2.2 SITE TOPOGRAPHY

The Site is relatively flat and is situated at an elevation of approximately 802 feet above mean sea level (ft amsl). The surface topography in the vicinity of the Site slopes gently to the east. The nearest surface water body is the Fox River located approximately 500 feet to the east. Based upon groundwater flow data previously collected on the Site and topographic map interpretation, the direction of shallow groundwater flow beneath the subject property is primarily to the northeast.

2.3 PROPOSED REDEVELOPMENT PLAN

The redevelopment will include three (3) 24-unit, two (2) story apartment buildings with a single level of underground parking in each. A depiction of the proposed redevelopment of the Site is shown on **Figure B.1.c**.

2.4 SUBSURFACE CONDITIONS

In general, soils on the Site consist of native silty fine sand, silt and silty clay. Relatively thin layers of fine sand or crushed limestone fill was encountered beneath the floor slabs, sidewalks and pavements at the Site. The Site is relatively flat and is situated at an elevation of approximately 802 feet above mean sea level (ft amsl). The surface topography in the vicinity of the Site slopes gently to the east.

2.5 WATER LEVEL MEASUREMENTS

Depth to water measurements were collected from the 11 permanent groundwater wells and one (1) piezometer located on the Site and two (2) permanent groundwater wells on the adjoining property to the north on October 6, 2020. The depth to groundwater in the monitoring wells ranged between 7.35 ft bgs to 10.93 ft bgs.

3.0 SUBSURFACE CONDITIONS

Several iterations of soil and groundwater sampling activities have been performed in the northwest portion of the Site in order to delineate the horizontal and vertical extent of the area of soil and groundwater contaminated with chlorinated volatile organic compounds (CVOCs) from the former Klinke Cleaners operation. Most recently, a *Report of Additional Site Investigation Activities* was submitted to the WDNR on November 16, 2020. On December 1, 2020, the WDNR provided the following written comments regarding the *Report of Additional Site Investigation Activities;*

- Sampling activities have generally defined the horizontal extent of soil contamination. No further soil sampling is being requested at this time.
- The DNR is not currently requiring additional monitoring wells to be installed. We do agree with the recommendation made in the Report to continue quarterly groundwater sampling at all on-site monitoring wells until plume stability and groundwater flow direction is confirmed. Additional wells may need to be installed after further sampling is conducted if the existing network is found to not be sufficient to evaluate groundwater conditions.
- You should also continue to assess the need to maintain impervious surfaces over soil contamination, collect soil vapor samples at newly constructed buildings, and request approvals to manage contaminated soil as this development project progresses.

Based on the responses above, and in an effort to provide more detailed subsurface information within the areas to be excavated as part of the proposed Fox Den Apartments development, additional soil sampling was performed. Specifically, eight (8) additional soil borings were advanced along the southern extent of the area of soil contamination. Two (2) soil borings (GP-13 and GP-14) were advanced within northeast edge of the centrally located apartment building, two (2) soil borings (GP-19 and GP-20) were advanced in the northwest corner of the eastern apartment building and four (4) soil borings (GP-15, GP-16, GP-17 and GP-18) were advanced within the access ramp to the subsurface parking level beneath the easternmost apartment building. The locations of the soil borings relative to the proposed development are depicted on **Figure B.2.a**. Soil Boring Logs and Borehole Abandonment Forms prepared during the additional sampling activities area attached in **Appendix A**.

The soil borings were advanced to depths of four (4) feet below the ground surface (ft bgs) or eight (8) ft bgs, depending on the depth of the excavation for the proposed development. Soil borings GP-13, GP-14, GP-17, GP-18, GP-19 and GP-20 were advanced to eight (8) ft bgs, while soil borings GP-15 and GP-16 were advanced to four (4) ft bgs. A soil sample from each two (2) foot interval at each boring location was submitted for laboratory VOC analysis. The locations of the soil borings relative to the proposed redevelopment features is depicted on **Figure B.2.b**.

Of the 28 individual soil samples submitted for analysis from each two (2) ft interval, only two (2) samples contained elevated concentrations of tetrachloroethene (PCE) above its limit of detection (LOD). The soil sample collected from the six (6) to eight (8) ft bgs interval at the GP-13 location in the northeast corner of the centrally located apartment building contained an estimated

concentration of 0.042 milligrams per kilogram (mg/kg). The result was reported as an estimate, as the concentration was above the LOD, but less than its limit of quantitation (LOQ). The sample collected from the two (2) to four (4) ft bgs interval at the GP-16 location contained PCE at concentration of 0.14 mg/kg.

Both the estimated concentration detected in the six (6) to eight (8) ft bgs sample at GP-13 and the reported concentration in the two (2) to four (4) ft bgs interval at the GP-16 location exceeded the soil-to-groundwater pathway residual contaminant level (RCL). However, both results were significantly less than the non-industrial direct contact RCL.

The Analytical Results and Chain-of-Custody form are attached as **Appendix B**.

Based on these findings, the extent of the soil contamination within the area of the excavation associated with the proposed development is limited to the base of the excavation in the northeast corner of the centrally located apartment building, as well as the northernmost portion of the access ramp to the underground parking level in the easternmost apartment building. The extent of the contamination related to the proposed excavation is depicted on **Figure B.2.c.**

4.0 SOIL MANAGEMENT PLAN

As shown on the Cut/Fill drawing attached as **Figure B.2.c**, the vast majority of the extent of soil contamination in excess of the soil-to-groundwater RCL for PCE will require the placement of fill to establish subgrade elevations for the construction of concrete and asphalt pavement sections or the additional of topsoil and grass or landscape plantings. Cuts of up to eight (8) feet are required along the southern extent of the area of contamination for the construction of the subsurface parking level beneath each apartment building as well as the vehicle access ramp to the underground level of parking in the eastern building. The access ramp is proposed to enter the west side of the easternmost building.

4.1 MATERIAL MANAGEMENT PLAN

Based on the Cut/Fill plan as provided as **Figure B.2.c**, the excavation of contaminated soils associated with the proposed development is limited to:

- Soils from zero (0) to approximately four (4) ft bgs at the GP-4 location (0.72 to 0.82 mg/kg PCE) within the access ramp;
- Soils from two (2) to four (4) ft bgs at the GP-16 location (0.14 mg/kg PCE) within the access ramp;
- Soils from six (6) to six and one-half (6.5) ft bgs at the GP-13 location (0.042 mg/kg PCE) in the north corner of the central building; and,
- The surficial soils requiring excavation for the parking lot within the former 2340, 2344 and 2346 tenant spaces (5.4 mg/kg to 21.8 mg/kg PCE).

While all of the detected concentrations exceed the soil-to-groundwater pathway RCL for PCE, none of the concentrations described above exceed the non-industrial direct contact RCL for PCE. Based on the delineated horizontal extent of the contamination, we propose the excavated soils from the areas specifically identified above be properly managed onsite. We propose these soils be placed in the base of the proposed screening berm along the north edge of the Site.

The proposed onsite management of these soils would not result in the placement of contaminated soils at depths greater than where they were excavated from, does not include the movement of soils containing direct contact RCL exceedances and ensures the construction of a direct contact and infiltration barrier in the form of concrete or asphalt pavement and clean soil over the area of contamination. Additionally, the contaminated soils would not be located within a floodplain, within 100 feet of any wetland or critical habitat area, within 300 feet of any navigable river, stream, lake, pond or flowage or within 300 feet of any offsite water supply well.

As the remainder of the required excavations for the proposed buildings and access ramps are located outside of the areal extent of the soils containing concentrations of PCE which exceed the soil-to-groundwater RCL, we propose these soils be considered “clean” soil allowed to be used as general fill on the Site, including using this material to cap the non-paved portion of the areal extent of soil-to-groundwater RCL exceedances.

Following grading of the surficial soils, an engineered barrier consisting of concrete walkways and curbs, asphalt pavement and clean imported soil with topsoil and grass and/or mulch in landscaped areas will be placed.

Following the completion of redevelopment activities, a geographic information system (GIS) Registry package will be prepared and submitted to the WDNR. The GIS Registry package will include a Barrier Maintenance Plan.

4.2 OVERSIGHT AND DOCUMENTATION

A representative of Endpoint will be onsite during excavation and grading activities within the delineated area of contamination. Endpoint will provide direction to the earthwork contractor regarding the movement of the Site soils and will document the conditions on the Site with photographs. Following completion of the excavation and grading activities, Endpoint will prepare a Construction Documentation Report summarizing our observations.

SUBJECT PROPERTY
APPROXIMATE LOCATION OF PROPOSED BUILDING (PER VJS PRELIMINARY SITE PLAN SHEET C1.01 REVISED 11/05/19)
BUILDING PERIMETER AND DEMISING WALL
APPROXIMATE LIMITS OF REMEDIAL EXCAVATION (8FT BELOW GROUND SURFACE (BGS))
APPROXIMATE EXTENT OF BASEMENT
APPROX. EXTENT OF SOILS EXCEEDING SOIL-TO-GW PATHWAY RESIDUAL CONTAMINANT LEVEL (RCL) (0.0045 mg/kg)
APPROX. EXTENT OF SOILS EXCEEDING NON-INDUSTRIAL DIRECT CONTACT RCL (33 mg/kg)
0,29
MONITORING WELL LOCATION
ABANDONED MONITORING WELL
HISTORIC SOIL BORING
SOIL GAS SAMPLE LOCATION
SOIL BORING (ENDPOINT 2020)
SOIL BORING (SAGA 2011)
PROBE/TEMPORARY WELL LOCATION (DRAKE 2005)
INJECTION CONFIRMATION SAMPLE (SAGA 2011)
WALL CONFIRMATION SAMPLE (SAGA 2011)
BASE CONFIRMATION SAMPLE (SAGA 2011)
TETRACHLOROETHENE (PCE) CONCENTRATIONS IN SOIL VALUES ARE IN MILLIGRAMS PER KILOGRAM (mg/kg)
NOTE: ALL SAMPLE LOCATIONS SHOWN ARE APPROXIMATE
"J" - ESTIMATED RESULT BETWEEN LOD AND LOQ
LOD - LIMIT OF DETECTION
LOQ - LIMIT OF QUANTITATION
ND - NONE DETECTED

o-Xylene																			

1) VOC - Volatile Organic Compound
2) mg/kg - milligrams per kilogram
3) RCL - Residual Contaminant Level
4) ----- - Standard not established
5) Historic data provided in micrograms per kilogram (µg/kg) converted to mg/kg for this table
6) *Italicized* result indicates industrial direct contact RCL exceedance
7) Underlined result indicates non-industrial RCL exceedance
8) **Bold** result indicates soil-to-groundwater pathway RCL exceedance
9) NA - Not Analyzed
10) NR - Not Reported

Table A.2.a
Soil VOC Results -

Klinke Cleaners - Fox Run
2346 W. St. Paul Avenue
Waukesha, Wisconsin

1) VOC - Volatile Organic Compound
2) mg/kg - milligrams per kilogram
3) RCL - Residual Contaminant Level
4) ----- - Standard not established
5) Historic data provided in micrograms per kilogram (µg/kg) converted to mg/kg for this table
6) *Italicized* result indicates industrial direct contact RCL exceedance
7) Underlined result indicates non-industrial RCL exceedance
8) **Bold** result indicates soil-to-groundwater pathway RCL exceedance
9) NA - Not Analyzed
10) NR - Not Reported

1) VOC - Volatile Organic Compound
2) mg/kg - milligrams per kilogram
3) RCL - Residual Contaminant Level
4) ----- - Standard not established
5) Historic data provided in micrograms per kilogram (µg/kg) converted to mg/kg for this table
6) *Italicized* result indicates industrial direct contact RCL exceedance
7) Underlined result indicates non-industrial RCL exceedance
8) **Bold** result indicates soil-to-groundwater pathway RCL exceedance
9) NA - Not Analyzed
10) NR - Not Reported

Table A.2.a
Soil VOC Results -

Klinke Cleaners - Fox Run
2346 W. St. Paul Avenue
Waukesha, Wisconsin

1) VOC - Volatile Organic Compound
2) mg/kg - milligrams per kilogram
3) RCL - Residual Contaminant Level
4) ----- - Standard not established
5) Historic data provided in micrograms per kilogram (µg/kg) converted to mg/kg for this table
6) *Italicized* result indicates industrial direct contact RCL exceedance
7) Underlined result indicates non-industrial RCL exceedance
8) **Bold** result indicates soil-to-groundwater pathway RCL exceedance
9) NA - Not Analyzed
10) NR - Not Reported

Table A.2.a
Soil VOC Results -

Klinke Cleaners - Fox Run
2346 W. St. Paul Avenue
Waukesha, Wisconsin

1) VOC - Volatile Organic Compound
2) mg/kg - milligrams per kilogram
3) RCL - Residual Contaminant Level
4) ----- - Standard not established
5) Historic data provided in micrograms per kilogram (µg/kg) converted to mg/kg for this table
6) *Italicized* result indicates industrial direct contact RCL exceedance
7) Underlined result indicates non-industrial RCL exceedance
8) **Bold** result indicates soil-to-groundwater pathway RCL exceedance
9) NA - Not Analyzed
10) NR - Not Reported

Table A.2.a
Soil VOC Results -

Klinke Cleaners - Fox Run
2346 W. St. Paul Avenue
Waukesha, Wisconsin

1) VOC - Volatile Organic Compound
2) mg/kg - milligrams per kilogram
3) RCL - Residual Contaminant Level
4) ----- - Standard not established
5) Historic data provided in micrograms per kilogram (µg/kg) converted to mg/kg for this table
6) *Italicized* result indicates industrial direct contact RCL exceedance
7) Underlined result indicates non-industrial RCL exceedance
8) **Bold** result indicates soil-to-groundwater pathway RCL exceedance
9) NA - Not Analyzed
10) NR - Not Reported

Table A.2.a
Soil VOC Results -

Klinke Cleaners - Fox Run
2346 W. St. Paul Avenue
Waukesha, Wisconsin

Well / Drillhole / Borehole Filling & Sealing Report

Form 3300-005 (R 4/2015)

Notice: Completion of this report is required by chs. 160, 281, 283, 289, 291-293, 295, and 299, Wis. Stats., and chs. NR 141 and 812, Wis. Adm. Code. In accordance with chs. 281, 289, 291-293, 295, and 299, Wis. Stats., failure to file this form may result in a forfeiture of between $10-25,000, or imprisonment for up to one year, depending on the program and conduct involved. Personally identifiable information on this form is not intended to be used for any other purpose. Return form to the appropriate DNR office and bureau. See instructions on reverse for more information.

Well / Drillhole / Borehole Filling & Sealing Report

Form 3300-005 (R 4/2015)

Notice: Completion of this report is required by chs. 160, 281, 283, 289, 291-293, 295, and 299, Wis. Stats., and chs. NR 141 and 812, Wis. Adm. Code. In accordance with chs. 281, 289, 291-293, 295, and 299, Wis. Stats., failure to file this form may result in a forfeiture of between $10-25,000, or imprisonment for up to one year, depending on the program and conduct involved. Personally identifiable information on this form is not intended to be used for any other purpose. Return form to the appropriate DNR office and bureau. See instructions on reverse for more information.

☐ **Verification Only of Fill and Seal**

Route to DNR Bureau:

"J" Flag: Analyte detected between LOD and LOQ LOD Limit of Detection LOQ Limit of Quantitation

Code	*Comment*
1	Laboratory QC within limits.

All solid sample results reported on a dry weight basis unless otherwise indicated. All LOD's and LOQ's are adjusted for dilutions but not dry weight. Subcontracted results are denoted by SUB in the analyst field.

"J" Flag: Analyte detected between LOD and LOQ LOD Limit of Detection LOQ Limit of Quantitation

Code	*Comment*
1	Laboratory QC within limits.

All solid sample results reported on a dry weight basis unless otherwise indicated. All LOD's and LOQ's are adjusted for dilutions but not dry weight. Subcontracted results are denoted by SUB in the analyst field.
