Hello Ron,

Below are the revisions to the closure request/database packet requested by the Department:

- The groundwater ES plume should include G-3 and G-17 on all applicable maps, including D.2, showing extent of ES exceedances in groundwater
- On the Closure Form
 - page 9, section L
 - Add G-3 & G-17
 - page 10, CO table
 - Remove the X for ROW line i
 - Add X for ROW line ii
 - Add X for ROW line iii
 - Add X for Source Property, line Xiii
 - page 15, add Wisconsin Street
 - Add X for residual groundwater
 - Add X for residual soil
 - Also add: Date of Letter, Type of Property: ROW, Parcel ID NO: NA
 - page 16, the required signatures of PE and PG are to be provided
- Figure D.2 does not need to include the entire building as a cap. You could chose to limit it to a portion of the building and other areas with DC exceedances or impervious cover over groundwater pathway soil exceedances. Reducing the cap to a portion of the building can alleviate some future post-closure modification issues. If you reduce the size of the cap, the language will have to be revised in the cap maintenance plan as it refers to the entire building.
- Please only send in the requested, revised pages and not the entire packet.

If you would like to discuss anything further, feel free to give me a call.

Andy
